

SafeMoonArmy

WHITE PAPER

THE UPCOMING PLATFORM

WALLET AND EXCHANGE.

Development of the wallet and exchange with ability to store, buy, sell and swap.

NFT.

Our platform will be powered by [SafeMoonArmy](#) utility-token and users of our platform will be able to stake our token to claim or issue NFT's.

We are setting out to become the easiest NFT platform to use by amongst other things implementing simple drag & drop solutions. First, we are releasing a web version and later apps for both Android & IOS.

Our apps will enable the creation of NFT's from phones.

MARKETPLACE

We are creating a marketplace that will be integrated into our platform. This will enable anyone to easily sell their NFT's. The users of our marketplace will be able to choose either selling their NFT's spot-style or auction-style.

SafeMoonArmy has a total supply of 250 trillion tokens.

Right before [SafeMoonArmy](#)

Exclusive Launch on [BakerySwap](#) we will burned 50% of tokens.
