

H2E Patent Non-Assertion Pledge

X Development LLC (“X”) is committed to making a positive impact in combating water stress around the world. In support of this commitment, X pledges the free use of the following patent application (“H2E Patent”): US Application No. 17/211,690.

X hereby pledges to each person or entity (a “Recipient”) that X will not bring a lawsuit or other legal proceeding against a Recipient for patent infringement under the H2E Patent (the “Pledge”). It is X’s intent that this Pledge be legally binding, irrevocable and enforceable against X and its successors and assigns, and in each case limited to the specifically listed H2E Patent only. Thus, X will require any person or entity to whom it transfers the H2E Patent to agree, in writing, to abide by the Pledge and to place a similar requirement on any subsequent transferees to do the same.

The Pledge is not an assurance that the H2E Patent covers any particular technology or is enforceable, that any activities covered by the Pledge will not infringe patents or other intellectual property rights of a third party, or that X will add any other patents to the H2E Patent. Except as expressly stated in the Pledge, no other rights are waived or granted by X, Alphabet Inc. or any of their respective affiliates, or received by a Recipient, whether by implication, estoppel, or otherwise.
