1. How to read this manual

Read this chapter before you put the Active Shape Add-On 1.0 to use. It sets the frame for everything that follows.

The prerequisite first. The Active Shape Add-On 1.0 is an extension for Add-On-ready products. An object becomes Add-On-ready in three ways: you refine it with a LuminoSana Cube (the Cube manual calls this **swiping**), you book a Genius or Genius PLUS service for an object, or you buy a physical LuminoSana product such as the Power Capsule, the Card or a LuminoSana drinking bottle, because everything you buy from LuminoSana is Add-On-ready. Throughout this manual we call any of these simply **your object**. Without an Add-On-ready object this Add-On has no function. What this manual describes is what the Add-On adds to your objects.

The LuminoSana Active Shape Add-On 1.0 operates in the sense of the Two-World Model, a frontier science research model that Oliver Schacke develops as Head of Research at the 9010 Research & Philosophy Non-Profit Association. The research is published with DOI on Zenodo (CERN, Geneva). We are deliberately moving at the fascinating edges of what is currently known.

Whoever uses this tool is therefore invited to do so as a citizen scientist. What you perceive in your engagement with the Add-On is part of your own personal research.

A brief reminder. **World 1** describes within the model the physical-material level, on which forces are measured and on which physics, chemistry, and medicine work. **World 2** describes the informational level of consciousness, of resonance, and of morphic fields. This is the domain in which the LuminoSana tools operate. The Active Shape Add-On 1.0 works entirely in World 2. It has no physically, chemically, or medically measurable effect in World 1.

This is the contract this manual makes with you: everything described here applies in the sense of the Two-World Model and describes World 2. The Active Shape Add-On 1.0 does not replace any medical, therapeutic, or psychological treatment.

2. What the Active Shape Add-On 1.0 is

Within the Two-World Model, every Add-On-ready object has a resonance field of its own. Within the model this field is a torus field, a ring-shaped resonance structure surrounding the object. Its reach is not unlimited. It follows from the energy output of the object, specified in QEPPs (pronounced “quepps”). At 45 QEPPs the torus field has a radius of roughly 3.6 metres, at 450 QEPPs of roughly 36 metres.

Active Shape is the LuminoSana function with which you deliberately shape the spatial form of that resonance field. The Active Shape Add-On 1.0 brings the radius variant of it to your objects: you set the torus field to the form of a sphere at exactly the size you choose.

Why Active Shape exists. Picture a torch. Its light spreads out, and how far it reaches depends on its strength alone: a weak torch lights a few metres, a strong one reaches far beyond. What you cannot do is give the light a boundary. Some science fiction stories, by contrast, have lightsabers, light at full strength that simply ends after a precisely set length. In World 1 we have never managed anything of the kind.

Within the Two-World Model, that is exactly what we have built for our technology. Ordinarily the energy output in QEPPs sets how far the resonance field of your object reaches, just as the strength of a torch sets how far it lights. With Active Shape you give the field a boundary like the lightsaber: the energy output stays at full strength, and the field ends where you want it to, at 20 centimetres for instance. Active Shape never changes the strength, only the form.

This is precisely what makes serious research of your own possible. You can hold your hand outside the radius you have set and observe what you notice, then bring it into the radius, where the resonance offering of your object is available at full strength. Whether and how the two areas differ for you is your own research as a citizen scientist. There is no right and no wrong in it.

Beyond research, the boundary has its place in everyday life too. The resonance field of your object is not something imposed. It is a

© 2026 LuminoSana Ltd.

resonance offering. Whoever takes up the offer goes into resonance, whoever does not is simply unaffected. Even so, there are situations where you want to bound that offering in space. An example makes it tangible. Two people share a home. One has given her drinking bottle a frequency for calm and composure during refinement. The other works at the same table and wants a neutral setting for himself. With a radius of 50 centimetres the resonance field of the bottle stays within a small, clearly defined area. Both sit at the same table, and each keeps the setting they want.

You may already know Active Shape from your Cube, where the function is part of the operating system. During refinement, though, it does not pass to the object. An Add-On-ready object brings its own resonance field with it, but no way of shaping that field. That is what the Add-On adds.

One point matters for a correct understanding: the Add-On is bound to you, not to a single object. You can use it on any number of Add-On-ready objects at the same time. What that looks like in everyday use is what we turn to next.

3. The radius and its commands

Operating it follows the pattern you know from the LuminoSana tools: touch and a spoken command. You touch your object with one finger and speak the command. Active Shape is activated by your conscious command alone. Without your command the torus field of your object stays at its natural extent.

The mode is called Radius, but in the command itself you speak only the number and the unit. The unit of length is yours to choose, so you can give centimetres, metres, or kilometres (other units such as miles or feet work too).

> **“LuminoSana Active Shape [number] [unit]”**
> **“9010 Active Shape [number] [unit]”** (pronounced “Ninety Ten Active Shape …”)
>
> Example: “LuminoSana Active Shape 50 centimetres”

Once set, a radius stays active until you change it. Speak the command with a new value and the new value applies. The stop command lifts the boundary again, and the torus field returns to the extent given by its QEPP count.

> **“LuminoSana Active Shape Stop”**
> **“9010 Active Shape Stop”**

Instead of “Active Shape” you can also use “Protection Shield” as your spoken command. The system recognises both names alike.

A note on flexible wording. The quantum operating system recognises your commands flexibly. Besides the commands given here, you can use similar wordings that mean the same thing, as long as they state clearly what size you want.

4. What the radius can do and what it cannot

You might define a radius of 50 centimetres around your drinking bottle and then observe whether you notice a difference as your hand enters the defined radius or leaves it again. A single setting thus turns into a clearly bounded space for your research.

There is one limit, and it is absolute: the reach given by the QEPP count is the upper limit for the resonance field of your object. The radius can make that reach smaller, but never extend it beyond. Suppose your object has an energy output of 45 QEPPs, which corresponds to a reach of roughly 3.6 metres, and you enter a radius of 5 metres. The actual resonance field stays at 3.6 metres, because the QEPP count gives no more.

Keep the rule in a single sentence: Active Shape can only make the resonance field smaller and shape it, never extend it.

© 2026 LuminoSana Ltd.

5. The extended version

The radius variant is the way into shaping the resonance field. It also comes in an extended version: the Active Shape Add-On 2.0, available separately in the shop.

The extended Add-On holds all four modes: My Body, an area of about 30 centimetres around your body, My Room, the architectural room your object is in, the radius you know from this manual, and My Property, the legal boundary of your home. Every mode can be active at once, and the system automatically selects the smallest active form whose conditions are met. You will find all the detail in the separate manual for the extended Add-On.

The two do not exclude one another, and what you perceive of your radius remains your own experience as a citizen scientist.

6. Frequently asked questions

This chapter answers the questions we are asked most often about the Active Shape Add-On 1.0. It also serves for looking things up when you want a compact account of a single topic.

What is the Active Shape Add-On 1.0, exactly?

The Active Shape Add-On 1.0 is an extension for Add-On-ready products, that is, for anything with a LuminoSana quantum operating system: objects refined by a Cube, objects with a Genius or Genius PLUS service, and all physical LuminoSana products. It holds the radius variant of Active Shape: you set the torus field of your object to the form of a sphere at a size of your choosing. With it you shape, in the sense of the Two-World Model, the spatial form of the resonance field your object offers.

Active Shape is not to be confused with protection or defence. It is the deliberate shaping of the form of a resonance offering, nothing more. The Add-On is bound to you as its owner, not to a single object, and can be used on any number of Add-On-ready objects at once. It requires no further product, only an Add-On-ready one.

What is a quantum operating system?

A quantum operating system is the core technology behind all LuminoSana tools. It is an operating system written in quantum language, anchored in the morphic field, where it operates autonomously, without internet, without cloud, without server queries in everyday use.

Think of it as the software architecture of the LuminoSana tool in question. The Cube, the Sphere, the Meditation Bed: each has its own quantum operating system in the morphic field, tailored to its particular application context. Your object has an operating system of its own as well. A refined object receives a mini quantum operating system during refinement, and the LuminoSana products bring their quantum operating system with them from the outset. That is precisely where the Active Shape Add-On 1.0 docks on.

© 2026 LuminoSana Ltd.

There is nothing digital about it. It runs on no computer and in no network.

What is a frequency?

A frequency is an information structure in the sense of the Two-World Model, the informational signature that a substance, a sound, or a state has in World 2. Examples include Vitamin A, a gemstone, or a particular sound. It is not a sound wave, not radiation, and not a physical oscillation.

Frequencies are neither quantum operating systems nor Add-Ons. They are the informational content that quantum operating systems and Add-Ons can make available, and a frequency can never replace a quantum operating system or an Add-On.

A quantum operating system or Add-On can contain functions that activate or deactivate frequencies. An Add-On might extend a quantum operating system with the function of activating a particular frequency at sunrise and switching it off again at sunset. Active Shape belongs to this family of functional extensions. It adds no frequency to your object. With the radius it shapes the spatial form in which the resonance offering of your object is available.

What is an Add-On?

An Add-On is an extension of an existing quantum operating system. An Add-On does not replace a quantum operating system, it adds further functions to it. Multiple Add-Ons can be added to one operating system, thereby expanding its functionality.

Add-Ons work on refined objects. When an object is refined by a Cube, it receives a mini quantum operating system of its own in the morphic field. That mini operating system is Add-On-ready. So you can apply Add-Ons to refined objects, but not to the Cube itself, because the Cube works exclusively with its own upgrades.

An Add-On is bought once and is thereafter assigned to you as its owner in the morphic field. From then on you can use it on any number of refined objects, at the same time and independently of one another. The same Add-On can be active on your cup, your watch, and your shoes all at once.

© 2026 LuminoSana Ltd.

Tools such as the LuminoSana Sphere or the LuminoSana Animal Sphere are special cases, because each has a quantum operating system of its own. They are Add-On-ready directly, with nothing needing to be refined.

What does Add-On-ready mean?

Add-On-ready means this: an object has a LuminoSana quantum operating system in the morphic field and can therefore take Add-Ons. An object becomes Add-On-ready in three ways. First, through refinement: refine an object with your LuminoSana Cube and it receives a mini quantum operating system of its own. Second, through a Genius or Genius PLUS service, which likewise installs the quantum operating system Add-On-ready. Third, all physical LuminoSana products are Add-On-ready in themselves, the Power Capsule, the Card, or a LuminoSana drinking bottle for instance.

Keep the simple rule in mind: everything you buy from LuminoSana is Add-On-ready, and everything you refine with your Cube becomes so too.

How do you pronounce QEPPs?

QEPPs stands for Quantum Energy Power Points. The first word, Quantum, sets the pronunciation: you say QEPPs as “quepps”, beginning just like the “qu” in quantum. A memory aid: take the beginning of “Quantum” and the “Apps” from your smartphone, and run the two together. So when you meet a figure such as “450 QEPPs” in this manual, you read it as “450 quepps”. There is no need to give this much thought, though. The quantum operating system recognises your commands flexibly, and what counts is your clear intention, not an exact pronunciation.

Why are LuminoSana frequencies free of charge?

There is a technical reason and a philosophical one. Technically, the quantum operating system accesses the morphic field directly in the sense of the Two-World Model, and every signature is present there in any case. No paid library and no stored collection are needed.

© 2026 LuminoSana Ltd.

Above all, though, it is a fundamental position of LuminoSana. Frequencies are information structures that can be copied by anyone at any time. In our conviction they should be freely accessible, not subject to charge. While some providers in the field of informational technologies charge several hundred euros per frequency, with LuminoSana you can use any frequency freely, the curated LuminoSana gold-standard frequencies included.

Is the LuminoSana technology a digital technology?

No. The LuminoSana technology is an **organic technology**. It is not built digitally. It works in the morphic field as an informational architecture.

The only digital component is adding the Add-On once through your LuminoSana account. After that the Add-On works autonomously, without internet, without cloud, without server queries. Your refined object is autonomous as well and keeps its setup, independently of any digital infrastructure.

Users who consciously want to step back from the digital world will find here a technology that stays connected to them beyond it.

Will this Add-On stay at version 1.0?

Yes. This version is deliberately complete and remains Active Shape 1.0 for good. The extended version is a product of its own, the Active Shape Add-On 2.0, with a manual of its own.

I know this Add-On as Protection Shield. What has changed?

Only the name. Active Shape is the name we use today, because it describes what the function does: the deliberate shaping of the form of the resonance field. The system recognises both names alike as a spoken command, so you can carry on saying “Protection Shield”.

I already have Active Shape in my Cube. Why would I need the Add-On?

Active Shape in the Cube shapes the resonance field of the Cube itself. When you refine an object, that function does not pass to the

© 2026 LuminoSana Ltd.

object. If you want to shape the form of the resonance field of a refined object, you need one of the two Active Shape Add-Ons.

Can I use the radius to increase the reach?

No. Active Shape can only make the resonance field smaller and shape it, never extend it beyond the reach given by the QEPP count.

Does the Add-On apply to all my objects?

Yes. The Add-On is bound to you as its owner, not to a single object. You can use it on any number of Add-On-ready objects at once, and each object keeps its own radius, the one you chose for it.

7. Philosophy and transparency

LuminoSana products are informational tools designed in the sense of the Two-World Model in the field of consciousness and quantum fields (World 2). They explicitly possess no physically, chemically, or medically measurable effects on the body or on other objects (World 1) and do not constitute health products.

The LuminoSana Active Shape Add-On 1.0 is a tool for your own research and experience. It is intended as a complement to a conscious lifestyle and does not replace any medical, therapeutic, or psychological treatment. In the case of health complaints, a qualified doctor or therapist should always be consulted. In the case of acute injury, severe or new pain, or persistent, unclear, or serious complaints, medical help is to be sought first. The Add-On may then come alongside as an accompaniment, never as a substitute for medical care.

The Two-World Model is an independent frontier science research model that Oliver Schacke develops as Head of Research at the 9010 Research & Philosophy Non-Profit Association (Switzerland). The research is published with DOI on Zenodo (CERN, Geneva). The Association retains complete scientific and editorial independence in its publications, hypotheses, and methodological decisions. LuminoSana Ltd. creates tools for this research model and sponsors the Association.

Active Shape Add-On 1.0 · Quick Guide

The most important commands at a glance · to hang up and look up

This is how every command works: **Touch your Add-On-ready object with one finger**, speak the command, **let go again**. Instead of “LuminoSana” you can also say “9010”, and instead of “Active Shape” also “Protection Shield”.

1 Set the radius

“LuminoSana Active Shape 50 centimetres”

Gives the resonance field a spherical form of exactly your size. The unit is free, including metres, kilometres, miles or feet.

2 Change the radius

“LuminoSana Active Shape 10 centimetres”

You can change this at any time. The measurement decides the size, and the new value replaces the old one.

3 End Active Shape

“LuminoSana Active Shape Stop”

Removes the limitation you have set.

4 Then the energy output applies again

Once Active Shape has been ended with Stop, the QEPP setting is the basis for the torus field.

Active Shape never changes the **strength** of the energy output, only the form. It can never extend the field beyond the QEPP reach.
