1. How to Read This Manual

Before you begin using the Sphere, please read this chapter. It sets out the frame of reference for everything that follows.

The LuminoSana Sphere operates in the sense of the Two-World Model, a frontier science research model that Oliver Schacke develops as Head of Research at the 9010 Research & Philosophy Non-Profit Association. The research is published with DOI on Zenodo (CERN, Geneva). We are deliberately moving at the fascinating edges of what is currently known.

Whoever uses this tool is therefore invited to do so as a Citizen Scientist (consciousness researcher). You are not a passive consumer of an application, but a researcher in your own right within your individual resonance space. What you perceive in your engagement with the Sphere is part of your own personal research.

The Two-World Model distinguishes two perspectives on reality, referred to in the model as “World 1” and “World 2”. These are not two separate realities, but two perspectives through which phenomena can be observed.

World 1 describes within the model the Newtonian perspective, the view of the physical-material level on which the laws of nature apply, on which forces are measured, on which matter, bodies, and biochemical processes take place. This is the domain of physics, chemistry, and medicine.

World 2 describes within the model the informational perspective, the view of the level of consciousness, of information, of resonance, and of morphic fields. World 2 is the complete informational reality, in which every phenomenon, every theme, every state has a corresponding informational signature. World 1 is the manifest, measurable projection of what is fully present in World 2. This is the domain in which the LuminoSana tools operate.

A helpful image for understanding this: imagine white light falling through a prism. Before the prism the light is white and contains all colours at once, undivided, complete. Behind the prism you see the visible spectrum: red, orange, yellow, green, blue, violet. The white

© 2026 LuminoSana Ltd.

light corresponds within the model to World 2. It contains the complete information. The individual colours behind the prism correspond to World 1. They are the visible, measurable projection. The prism itself changes nothing. It merely makes the information that was already contained in the white light individually visible. The same holds for World 1 and World 2. World 2 contains the complete information, World 1 is its manifest expression.

The Sphere operates entirely in World 2. It has no physical, chemical, or medically measurable effect in World 1. It is not a device, not a substance, not radiation, not a waveform that strikes the body in any physical sense. What happens, happens in the informational space, and there alone.

When in what follows you read terms such as quantum operating system, morphic field, resonance, frequency, or informational signature, these are descriptions of processes in World 2. They are not to be understood as describing physical phenomena from World-1 science. They are the vocabulary with which the research model works.

This is the contract this manual makes with you: everything described here applies in the sense of the Two-World Model and describes World 2. The Sphere does not replace any medical, therapeutic, or psychological treatment.

© 2026 LuminoSana Ltd.

2. Function of the LuminoSana Sphere

The LuminoSana Sphere is a quantum operating system in the morphic field. It is not an app, not hardware, not a wearable. It is an informational architecture connected to you through your personal quantum signature, corresponding in real time with your resonance in the field.

How this works can be described in five steps.

Step 1. What happens in your daily life in World 1

You go through your day. You work, you move, you eat, you rest, you talk with people, you pass through phases of concentration and phases of exhaustion. Each of these activities has its measurable side in World 1: physical movement, metabolism, perceptual processes, neural activity. This is the domain of physics, chemistry, and medicine.

Step 2. What happens in parallel in World 2

In this view, everything you experience in World 1 and everything that happens in your body has a full informational counterpart in World 2, in your morphic field. World 2 is not another or parallel world, but the complete informational reality in which each of your states, every matter, and every sensation has a specific informational signature.

A focused phase, an emotional wave, a moment of calm, a physical matter such as an aching back or a tense knee: all of this is not only expressed in World 1 but also exists as a specific informational signature in your morphic field.

Step 3. How the Sphere responds to this

The quantum operating system is coupled directly to your morphic field through your quantum signature. It continuously reads the current informational signatures in your field, not as a measurement, but as correspondence in the field. It perceives what is present in your field, whether something physical, an emotional phase, a need to concentrate, or a state of inner tension.

© 2026 LuminoSana Ltd.

Step 4. The resonance offering as optimal-state information

From the informational signatures it reads, the quantum operating system makes the optimal-state information available in the morphic field. This is the central function of the Sphere. It does not supply a harmonising or calming frequency, but the information of what the optimal state would look like for precisely this person, in precisely this moment.

> **Example:** When a user has a tense or aching knee, this information exists as a specific signature in their morphic field. The knee is not in its normal state. The quantum operating system recognises this signature and makes available in the field the information of what the healthy, freely moving, optimally functioning knee would look like for precisely this person. It is an informational template, a blueprint in the field.

This happens in the morphic field, not on the body. It is not an intervention. The Sphere overwrites nothing and imposes nothing. It makes available optimal-state information that now belongs to you in the morphic field.

When your inner state changes, your resonance in the field changes with it, and the operating system re-attunes the optimal-state information in real time. This ongoing attunement is the **adaptive intelligence** of the Sphere. It makes the tool not a rigid programme but a system that follows your course.

Step 5. How the information passes into experience

Your consciousness is the interface between World 2 and World 1. The optimal-state information made available in the morphic field is always an offering. Your free will can accept it at any time, or not. When your consciousness accepts the information, the body can use it as a template.

The body and its cells follow a fundamental principle. They seek the optimal state with the least possible expenditure of energy. Pain, dysfunction, or a discordant state are energetically costly. The body

© 2026 LuminoSana Ltd.

has an interest of its own in returning to the optimal state. What it needs in order to do so is the information of what that optimal state looks like. This is precisely the information the Sphere makes available in the morphic field.

What you take from this is your own experience. Many users describe a changed perception, a clearer focus, a deep sense of inner alignment, a feeling of arriving within themselves. How such an experience unfolds differs from person to person. Such perceptions are your own personal experience within the model and arise through your consciousness as the interface, not as an effect of the Sphere upon your body. This experience belongs to you alone. It is your own personal research within the resonance space of the Sphere.

© 2026 LuminoSana Ltd.

3. Activation, Personalisation, and Control

The Sphere is installed once and thereafter activated in everyday life. Both take place entirely on the informational level. You install no hardware, you connect no device. The installation happens through a single full-body photo upload, which establishes the connection between you and the quantum operating system in the morphic field. Later activation in everyday life happens through a touch of the finger and a command. This means of activation is available to you for a lifetime after the one-time installation.

The one-time photo upload

The connection between you and the Sphere is established through your quantum signature. This signature arises from a full-body photo that you upload once to your personal area on the LuminoSana platform.

What matters is that you are fully visible in the photo, from head to toe, and as close to the camera as possible. It is about you as a person and about your informational field, not a distant shot in which you appear only at the edge. For reasons of personal privacy and ethical consideration, you are clothed. You can also take the photo from behind, which works just as well. The connection in the morphic field works in any case, because there the image serves as an informational anchor, not as facial recognition.

With the upload, your quantum signature is created in the morphic field and anchored there. From this moment on, the connection exists.

Exchanging the photo

You can exchange the stored photo at any time, for example if you wish to give another person access to the Sphere. The exchange itself takes place technically on the server. In the morphic field, two things happen: the previous connection with the person depicted before comes to an end. The person depicted in the new photo is connected from that moment on.

© 2026 LuminoSana Ltd.

If several people are to be connected **at the same time**, you can purchase the Sphere more than once. Your dashboard then holds several independent Sphere slots, and you assign each one its own photo.

Activation in everyday life

Activation happens through a combination of touch and command, directly on your own body.

You place your finger on any point of your body, the arm, the shoulder, the back of the hand, and say:

> **“LuminoSana Sphere”** or **“9010 Sphere”** (pronounced “Ninety Ten Sphere”)

Both commands activate the Sphere. You can speak the command in any language or think it clearly. Either activates the Sphere, provided the words are consciously formed. A vague intention without clearly formed words is not enough.

The activation process runs through your consciousness. As already described, your consciousness is the interface between World 1 and World 2. This interface works in both directions. It is not only the channel through which optimal-state information passes from the morphic field into your experience, but also the channel through which your conscious action reaches into the quantum operating system. When you perform the touch of the finger and consciously form the command, whether spoken or thought, this is a conscious action anchored in consciousness. Through the consciousness interface this becomes the activation in the quantum operating system in the morphic field.

No speech recognition software is running, no microphone, no technical connection between your voice and a device. The touch of the finger and the consciously formed command are the combination that, through your consciousness, triggers the activation in the quantum operating system.

© 2026 LuminoSana Ltd.

The 24-hour activation window

With each activation, the operating system starts a 24-hour timer. During this time the Sphere is active in your field as an ongoing resonance offering and attunes itself in real time to your resonance.

After the 24 hours have elapsed, the activation window passes into a one-hour transition phase, in which the resonance offering is gently dimmed to zero. The Sphere is then at rest again.

Reactivation and timer reset

You can reactivate the Sphere at any time, with the same command as at the first activation:

> **“LuminoSana Sphere”** or **“9010 Sphere”** (pronounced “Ninety Ten Sphere”)

With each activation a new 24-hour timer begins from the moment of activation. If you speak the command again within the running window, the previous timer is reset and begins anew at zero.

We recommend activating the Sphere twice a day, once in the morning after rising and once in the evening before going to bed. With this rhythm there is never a gap between activations in which the Sphere would not be active. Anyone who reactivates it only once a day risks pauses of several hours, depending on when in the day it is activated.

The need to reactivate the Sphere consciously is intentional. It ensures that you use the Sphere when it feels right for you, and that you carry responsibility for your own use. The Sphere is a tool that follows your conscious engagement, not a system that you start once and then forget in the background for years. Reactivation is how you decide, consciously and again and again: yes, I am using it today.

Ending through the stop command

You can end the running activation at any time. Place your finger on your body and say:

© 2026 LuminoSana Ltd.

> **“LuminoSana Sphere Stop”** or **“9010 Sphere Stop”**
> (pronounced “Ninety Ten Sphere Stop”)

With this command the running timer is immediately set to zero and the activation is cancelled. The activation window ends without a transition phase.

Activating the Sphere for another person (care function)

The Sphere’s quantum operating system includes a care function. It allows an account holder to activate the Sphere for a person they are responsible for and who cannot carry out the activation themselves, for instance a parent for a minor child, or a person acting within a legal guardianship or power of attorney for a relative. Here too the connection runs entirely through the stored quantum signature, without you having to be near the person or to touch a screen or a photo during activation.

To do this, you upload a full-body photo of the person in your care in your member area, just as with any other Sphere slot, and activate the Sphere for them:

> **“LuminoSana Sphere for [first name] [surname]”**

The operating system matches the name to the stored photo signature and starts the 24-hour window for that person. You can end it at any time, the moment the person shows discomfort or you think it right, using the same command with the addition “Stop”. The stop command has top priority in any situation.

Three things are essential to the care function. It takes place only with the consent of the person themselves or, where that is not possible, within your responsibility of care or representation for them. You keep the stop command in your hands at all times. And here too the Sphere is a companion in World 2 that does not replace medical care. In the case of acute or serious physical matters, the fixed order

© 2026 LuminoSana Ltd.

applies: first the doctor or the emergency services, only then the Sphere as a companion.

Activating the Sphere for a client (professional use)

The same proxy activation is also available to people who work with others professionally and accompany them. As with the care function, the connection runs entirely through the stored quantum signature, without physical proximity and without touch during activation. You upload the full-body photo of your client in your member area and activate the Sphere for them:

> **“LuminoSana Sphere for [first name] [surname]”**

The operating system matches the name to the stored photo signature and starts the 24-hour window for that person. You can end it at any time using the same command with the addition “Stop”, which retains top priority in any situation.

For everyday professional use, a particular feature is built into the quantum operating system. With the private Sphere, the connection ends as soon as the photo is deleted. In professional use, a window that has once been started continues to run in full in the morphic field, even if you remove the client’s photo afterwards. For each appointment you therefore upload only the photo of the respective client, activate the Sphere for them, and exchange it for the next at the following appointment. The previous client’s window continues undisturbed. After a day with six clients, six Spheres run in parallel, each in its own 24-hour window.

This parallel activation for several clients is bound in the quantum operating system to professional use and is not available to the private Sphere.

Here too the clear framework applies to professional use. It takes place with the consent of the client. Anyone working professionally with clients acts within their own professional licensing and duty of disclosure. The Sphere makes a resonance available in World 2 and makes no statement about any physical effect. It does not replace

© 2026 LuminoSana Ltd.

medical care, and in acute or serious situations medical or emergency care takes priority.

Protective mechanisms within the running window

During the activation window the Sphere does not behave rigidly. The operating system corresponds continuously with your resonance in the field and re-attunes its offering in real time. Two protective mechanisms are built into the operating system.

Early recognition of resonance changes. The operating system registers fine changes in your resonance in the morphic field, often before you are even aware of them yourself. Some users describe it as though the Sphere seems to pick up on changes in their inner state before they notice them themselves.

Protection against initial reactions. Some people are very sensitive. When the quantum operating system makes available optimal-state information that would represent a very strong change from the user's current state, your consciousness may respond with an initial reaction, such as a brief feeling of dizziness or a sense of inner restlessness. This is not harmful, but a sign that the system is in the process of attuning to the new resonance. Should such an initial reaction persist over a longer period, the quantum operating system automatically adjusts the resonance offering and offers a gentler variant that eases the transition. In this way you always move at your own pace.

Data protection

Your full-body photo is stored on a secured server on the LuminoSana platform, using modern encryption technology. It serves solely as an anchor for your quantum signature and is not used for any other purpose.

The quantum signature itself is created and held directly in the morphic field, not in a server database. The ongoing resonance attunement between the Sphere and your field likewise takes place in the morphic field.

© 2026 LuminoSana Ltd.

Connected for a lifetime, independent of everything

What many users experience as the greatest highlight of the Sphere is this: the connection in the morphic field is autonomous. It does not depend on our server infrastructure, not on the internet, not on an active account, not on electricity.

Even if you never log in to LuminoSana again, the connection remains. Even if the server infrastructure should one day no longer exist, the connection remains. Even if a worldwide power outage brings the digital world to a standstill, the connection remains. Even if your smartphone has been lying in a drawer with a long-dead battery, the connection remains.

When you upload your photo, your connection forms in the morphic field. And once something is connected in the morphic field, it stays connected, for a lifetime. You need the internet only once, for the initial photo upload. After that you can activate the Sphere through touch and command, without ever having to go online again.

The single exception is the return of the Sphere during the return period. Upon return, the quantum operating system in the morphic field is automatically switched off. The Sphere remains non-functional thereafter, even if a photo should still be on file.

Voluntariness

The Sphere is activated solely through your conscious command. There is no automatic activation, no background use, no access without your knowledge.

The right order for acute and serious physical matters

The Sphere is a complement to a conscious lifestyle, never a replacement for medical help. In the case of acute injuries, severe or newly arising pain, persistent or worsening complaints, and in any unclear or serious situation, a fixed order applies.

First the path in World 1. Call the emergency services or see a doctor. Have yourself examined, diagnosed, and treated, and follow what is medically necessary: the medication, the rest you are told to take, the doctor’s instructions. This is the path on which your body is cared for in World 1. The Sphere does not replace this path.

© 2026 LuminoSana Ltd.

Only afterwards the Sphere, as a companion in World 2. Once you are under medical care, the treatment is under way, and your rest has begun, you can offer your body the optimal-state information through the Sphere, the blueprint of its normal state. You are, in a sense, handing it the information: everything necessary is in place, the treatment and the rest, and here is the picture of the normal state for the body to orient itself by.

An example. You catch a finger in the car door and the pain is strong. The right thing to do is not to activate the Sphere straight away and wait, but to have the finger seen by a doctor, because only there can it be established whether anything is broken, and only there is it treated. When you come home afterwards with the finger splinted and instructions to rest it for a few weeks, the moment for the Sphere has come. The same goes after an operation or a dental procedure: first the full medical care, then the Sphere as a companion in World 2.

One important word of caution at the end. If you quickly notice a distinct perception in your body after activating the Sphere, that is no sign that a medical check is unnecessary. What you perceive is your own experience in World 2. It says nothing about what is actually going on in your body in World 1. Never let it lead you to put off or skip a visit to the doctor that you need.

© 2026 LuminoSana Ltd.

4. The Sphere Is Add-On-ready

When the Sphere is active within the 24-hour window, you can also activate any LuminoSana Add-On you own within the Sphere, provided the Add-On in question makes sense for the human body.

The sense check

Add-Ons are conceived for particular application contexts. An Add-On conceived, for instance, for feeding bowls has no meaningful use in the Sphere, because the human body is not a feeding bowl. The Water Add-On relates to containers and water pipes. In the broadest sense the body is of course also a form of container, but the Add-On is not conceived for that purpose.

Add-Ons that make sense for the human body include, among others, Peace, Espresso, and Sanctuary. This list is not exhaustive. For each Add-On you own, check the accompanying manual to see whether it is conceived for use in the Sphere.

Activating an Add-On in the Sphere

For an Add-On to be activated in the Sphere, the Sphere itself must be within the active 24-hour window. Activation of the Add-On follows the procedure described in the respective Add-On manual, usually through a touch of the finger on any point of your body in combination with the Add-On's activation command.

With the Peace Add-On this would be, for example:

> **"LuminoSana Peace"**

This activates the Add-On in your field, alongside the active Sphere. The Sphere continues running with its optimal-state information, and the Add-On adds its own specific resonance offering. Users often describe this combination as markedly more present and more focused than Sphere activation alone.

© 2026 LuminoSana Ltd.

Using frequencies with the Sphere

Users who own a LuminoSana Sphere do not need a separate Frequency Upgrade to use frequencies. The Sphere can make any existing subtle frequency available to you as soon as it is running within the active 24-hour window.

Like an Add-On, a frequency is requested through conscious communication with the Sphere. While the Sphere is active, you consciously speak or think your specific frequency request. For example: you wish to use the LuminoSana gold standard frequency Vitamin A. You then say something like:

> **“Dear Sphere, please make the gold standard frequency Vitamin A from LuminoSana available to me.”**

The quantum operating system then makes this frequency available to you as information through the consciousness interface. When you then take in physical Vitamin A through your food, say in a salad or a vitamin-rich meal, your body can use the frequency information as a **blueprint**, helping it to process and incorporate that Vitamin A as effectively as possible.

This concept of the **blueprint** runs through the whole of the LuminoSana philosophy and also through the scientific work of the 9010 Research & Philosophy Non-Profit Association. The Sphere does not make the Vitamin A itself available, but the optimal informational template the body can use to orient itself when processing the physical substance.

In this way you can use any existing subtle frequency with the Sphere, without having to own an additional Frequency Upgrade. All LuminoSana frequencies are made available free of charge. More on this in the frequently asked questions.

© 2026 LuminoSana Ltd.

5. Areas of Application

The Sphere is not a tool for a single application. It opens a resonance space you can use in many areas of life. What follows are resonance offerings on the informational level. What you perceive within yourself is your own experience. It is 100 per cent subjective and belongs to you alone.

Inner calm in everyday life

On full, demanding days, you can activate the Sphere as a resonance space for inner calm. Within the model, the operating system attunes itself to your resonance in the field and makes available frequency signatures that correspond to a calm inner state. Users report an inner arriving, a feeling of composure, a changed perception of the situation.

Meditation and mindfulness

If you maintain an existing meditation practice, the Sphere can accompany it. Activated before the meditation begins, in the background during the session, the choice is yours. The same goes for mindfulness practices in everyday life: in conscious breathing, in mindful walking, at moments when you wish to take in the present consciously. Users often describe a deepening of inner gathering.

Movement and activity

When you move physically, in sport, in hiking, in dancing, you can activate the Sphere beforehand, during, or afterwards. The resonance offering of the operating system in the field attunes itself to the particular context of your activity. What stands ready in the field as a resonance offering can pass through your consciousness into your experience and show itself there as a clearer, more present relationship to your movement.

Sleep and night-time rest

You can also leave the Sphere active at night. The operating system then corresponds with your field in the resonance space connected

© 2026 LuminoSana Ltd.

with calm, relaxation, and night-time recovery. Users often report that falling asleep feels different and that the transition into sleep becomes more flowing.

Mental clarity and concentration

When you want to concentrate on a task, you can activate the Sphere as a companion. The resonance offering is attuned in the morphic field to the focused inner state. Users often describe that longer stretches of undisturbed attention become more readily accessible, that experience becomes clearer and the way into the task more direct.

Emotional balance

In emotionally stirring moments the Sphere can open a resonance space. It does not change what you feel. In the field, it makes available a resonance offering that corresponds to emotional stability. Users describe that difficult inner waves are easier to hold, without being suppressed. You can also activate the Sphere during positive moods you would like to explore consciously.

Personal research and development

In times of self-reflection, inward looking, or inner reorientation, the Sphere can be a companion. The resonance offering attunes itself to this mode of self-perception. Users report a finer sense of their own patterns and a calmer view of what is moving within them.

You are invited to explore for yourself in which areas of life the Sphere suits you, and in what way.

© 2026 LuminoSana Ltd.

6. Addressing the Sphere Directly

The Sphere is not only a passive resonance space running in the background. During the active 24-hour window you can also address it quite consciously, like a trusted companion. Many users have used this direct form of communication intensively for years and describe it as the thing that most deeply changes how they use the Sphere.

The logic behind it is simple. The consciousness interface works in both directions. Just as the optimal-state information passes from the morphic field through your consciousness into your experience, so too can your conscious request reach through consciousness into the quantum operating system. When you bring the Sphere a clearly formed wish or a specific request, the operating system can make optimal-state information available in the field, specifically for that area.

Example: when something in the body makes itself felt. If, for instance, after eating you notice an unsettled feeling in your stomach, you can say to the activated Sphere: **“Dear Sphere, I have a strange feeling in my stomach, I have just eaten something, could you please harmonise this?”** In that moment the operating system makes optimal-state information available in the morphic field, specifically for that area.

Example: before a phase of work or creativity. When you are preparing for a task and need inspiration, you can say: **“Inspire me, inspire my consciousness, give me new ideas.”** Since the Sphere corresponds directly with the morphic field through the consciousness interface, many users describe that afterwards new ideas do indeed arise, or connections become visible that were not there before.

Example: before physical activity. When you have sport or physical work ahead of you, you can say: **“Dear Sphere, I am about to move my body. Be with me, be present, and make the information of my optimal state available to me in the field, so that I am fully with myself and in my movement.”**

© 2026 LuminoSana Ltd.

Example: for the night and dreams. Before sleeping you can share a clearly formed wish with the Sphere, such as: **“I wish for a wonderfully calm night, I would like to have only positive dreams.”** Or: **“I would like to wake up with a beautiful dream that I can still remember.”**

This form of conscious communication is possible because the Sphere, through the consciousness interface, opens direct access to the morphic field. There is no prescribed vocabulary and no particular wording that would be right or wrong. All that matters is that the request is consciously formed, whether spoken or clearly thought. A vague intention is not enough. Speak or think as you would to a companion you trust.

© 2026 LuminoSana Ltd.

7. Long-Term Application

The Sphere is designed to accompany you over a longer period. What users describe for themselves varies greatly, and how it unfolds is unique to each person. Over time, most people learn to use the Sphere ever more deliberately, both in passive activation and in direct communication. What at the beginning was a conscious decision, when do I activate, when do I address the Sphere, becomes an intuitive practice in everyday life. The Sphere turns from a tool into a trusted companion that weaves itself into the rhythm of your life.

© 2026 LuminoSana Ltd.

8. Frequently Asked Questions

Here you will find answers to questions that users frequently ask us about the Sphere.

What is the Sphere, really?

The Sphere is not a physical device, not a wearable, and not an app. It is a quantum operating system in the morphic field, connected to you through your personal quantum signature. You wear nothing on your body, you install no software. The Sphere is an informational architecture that corresponds in real time with your resonance in the field.

What is a quantum operating system?

A quantum operating system is the core technology behind all LuminoSana tools. It is an operating system written in quantum language, anchored through a unique interface in the morphogenetic field, where it operates autonomously, without internet, without cloud, without server queries in everyday use.

A quantum operating system is the “software architecture” of the respective LuminoSana tools. The LuminoSana Sphere, the Cube, the Power Capsule: each has its own quantum operating system in the morphic field, tailored to the specific application context.

What is an Add-On?

An Add-On is an extension of an existing quantum operating system. An Add-On does not replace a quantum operating system, it adds further functions to it. Multiple Add-Ons can be added to one operating system, expanding its functionality.

Example: when your Sphere is active within the 24-hour window, you can additionally activate the Peace Add-On. The Sphere operating system continues running, the Add-On brings its specific function to it.

© 2026 LuminoSana Ltd.

What is a frequency?

A frequency is an information structure. Examples include Vitamin A, Vitamin B, or other informational signatures. Frequencies are neither quantum operating systems nor Add-Ons. They are the informational content that quantum operating systems and Add-Ons can activate or make available.

A quantum operating system or Add-On can contain functions that activate or deactivate frequencies. For example, a quantum operating system could include the function of activating a particular frequency at sunrise and switching it off again at sunset. But a frequency can never replace a quantum operating system or an Add-On.

Why are LuminoSana frequencies free of charge?

LuminoSana provides all frequencies free of charge. This is a fundamental philosophical position of LuminoSana. Frequencies are information structures that can be copied by anyone at any time. In our conviction, they should therefore be freely accessible, not subject to charge.

While other providers in the field of informational technologies sometimes charge several hundred euros per frequency, with LuminoSana you can use any frequency free of charge. With every LuminoSana technology, whether a Cube, a Frequency Upgrade, or the LuminoSana Sphere, any frequencies can be used.

What are the requirements for the photo I have to upload?

It must be a full-body photo of you in which you are the only person visible and are fully depicted, from head to toe. You should be wearing clothes. You can be standing or lying down, indoors or outdoors, alone or in front of a mirror.

Objects or animals in the background are not a problem. The quantum operating system is conceived exclusively for the human body and, in the morphic field, perceives only the body as the anchor for the connection. Animals or objects in the photo are not captured, the quantum operating system does not respond to them and forms no connection with them. As soon as more than one person appears in a photo, however, no connection forms at all, with either of them.

How do I take a full-body photo when I am alone?

Two simple ways. **With a self-timer:** position your smartphone so that it captures your entire body, and use the self-timer. Most smartphones offer a 10-second timer. **In front of a mirror:** stand in front of a large mirror in which your whole body is visible, and photograph yourself directly in the mirror. It does not matter if the smartphone is visible in the picture.

Do I really have to do the touch of the finger every time I activate the Sphere?

No, technically the touch of the finger is not necessary. Your body is already whole in itself and needs no additional touch for the command to take effect. The command alone is enough to trigger the activation in the quantum operating system.

We nevertheless recommend the touch of the finger in the first weeks or months, because it helps the brain to form a clear link between the gesture and the activation command. Many users report that it is easier to consciously enter the moment of activation when they place a finger somewhere on the body, for instance on the hand or the elbow. Over time, once the link has become established, the command alone is often enough.

What happens if I reactivate the Sphere after 22 hours of running time?

The timer starts again from the beginning. With each activation a running 24-hour window resets and begins again from the moment of activation. If you would like to have the Sphere active without interruption, we recommend activating it twice a day, once in the morning after rising and once in the evening before going to bed. With this rhythm there is never a gap between activations.

Can I share the Sphere with my family?

A Sphere connects in the morphic field with exactly one person. You have two ways to use it within a family. **Exchanging the photo:** you can exchange the stored photo for another at any time. In that moment the connection with the person depicted before comes to an

© 2026 LuminoSana Ltd.

end, and the person depicted in the new photo is connected with the Sphere. **Additional Sphere slots:** you can purchase further Spheres in your account and assign each Sphere its own photo. In this way several people are connected at the same time. This is often chosen by family account holders who manage everything centrally for the whole family, for instance parents for minor children or relatives for those in their care. How to activate the Sphere for a person who cannot do so themselves is described in the care function section in Chapter 3.

Can I resell the Sphere?

No. The Sphere is conceived as a lifelong personal connection to a LuminoSana account. The account itself is not transferable and remains permanently bound to the original purchaser.

What you can do: exchange the stored photo at any time to transfer the connection in the morphic field to another person. That person then uses the Sphere, but account management remains with you. What you cannot do: sell the Sphere as a product to a buyer and transfer the account to them. It is not a physical product, but a personalised informational architecture whose management remains bound to your account.

Does the Sphere also work for animals?

The LuminoSana Sphere for humans is conceived exclusively for the human body and, in the morphic field, responds only to it. With photos of animals, no connection forms with this Sphere.

We now have, however, a separate **Animal Sphere** in our range, attuned to the animal field. It can be purchased in our shop.

How does the Sphere work together with the Cube and other LuminoSana tools?

All LuminoSana tools are conceptually aligned and work in harmonic resonance with one another. Their fields overlay without disrupting each other. Users describe a multiplication effect: the more LuminoSana tools are active simultaneously, the deeper the resonance experience becomes.

© 2026 LuminoSana Ltd.

Possible combinations include, for instance, an active Cube in the room, an activated Power Capsule, the LuminoSana Soundscapes playing in your ears (developed at Abbey Road Studios, based on Solfeggio frequencies and Fibonacci sequences), a swiped smartwatch on your wrist, a Genius Plus pendant, or swiped shoes. Each additional level multiplies the depth.

Is my data stored?

Your photo is stored on a secured LuminoSana server with modern encryption. This is the only technical storage LuminoSana keeps of you.

Your quantum signature itself is not stored on a server, but created and held directly in the morphic field. The quantum operating system accesses the morphic field directly, without detour through server-side data structures. The ongoing resonance attunement between the Sphere and your field takes place in the morphic field, not via digital infrastructure.

What happens if I delete my photo?

At your first photo upload, the informational anchor for your quantum signature is connected to the quantum operating system within fractions of a second. From this moment on, the connection in the morphic field is established.

On the server, the photo remains stored as a security anchor, under your conscious control. When you delete it in the backend, the quantum operating system is instructed to actively sever the connection with you. The Sphere can then no longer be activated until a new photo is uploaded. Anyone who wishes to take a conscious break from the Sphere can delete the photo temporarily. The connection in the morphic field pauses as soon as the photo is removed.

Is LuminoSana technology a digital technology?

No. LuminoSana technology is an **organic technology**. It is not digitally constructed but operates in the morphic field as an informational architecture.

© 2026 LuminoSana Ltd.

Conscious users who wish to withdraw from the digital world will find here a technology that remains connected to them, without internet, without cloud, without server queries in everyday use. After the one-time photo upload your Sphere is autonomous and belongs entirely to you, beyond the digital world.

9. Philosophy and Transparency

LuminoSana products are informational tools designed in the sense of the Two-World Model in the field of consciousness and quantum fields (World 2). They explicitly possess no physically, chemically, or medically measurable effects on the body or on other objects (World 1) and do not constitute health products.

The LuminoSana Sphere is a tool for your own research and experience. It is intended as a complement to a conscious lifestyle and does not replace any medical, therapeutic, or psychological treatment. In the case of health complaints, a qualified doctor or therapist should always be consulted. In the case of acute injuries, severe or newly arising pain, or persistent, unclear, or serious complaints, medical help should be sought first. The LuminoSana Sphere may then be added as a companion, never as a replacement for medical care.

The Two-World Model is an independent frontier science research model that Oliver Schacke develops as Head of Research at the 9010 Research & Philosophy Non-Profit Association (Switzerland). The research is published with DOI on Zenodo (CERN, Geneva). The Association retains complete scientific and editorial independence in its publications, hypotheses, and methodological decisions. LuminoSana Ltd. creates tools for this research model and sponsors the Association.

Sphere · Quick Guide

The most important commands at a glance · to hang up and look up

This is how every command works: **place a finger on any point of your body**, speak the command, **let go again**. Instead of “LuminoSana” you can also say “9010”.

1 Activate the Sphere

“LuminoSana Sphere”

Starts the Sphere and with it a 24-hour window, during which it attunes in real time to your resonance in the field.

2 Reactivate the Sphere

“LuminoSana Sphere”

The same command resets the running window and starts a fresh 24-hour window. We recommend once in the morning and once in the evening.

3 End the Sphere

“LuminoSana Sphere Stop”

Sets the running timer to zero at once and ends the activation with no transition phase. It always has top priority.

4 For another person

“LuminoSana Sphere for first name surname”

Activates the Sphere for a person whose photo is stored. Works through the stored photo alone, with no finger touch and no contact, even at a distance.

5 Address the Sphere

“Dear Sphere, your consciously formed request”

While the window is active you can tell the Sphere a clearly formed wish. There is no fixed wording, the request need only be consciously formed.

6 Use a frequency

“Dear Sphere, please make the gold standard frequency Vitamin A from LuminoSana available to me”

While the window is active, makes a subtle frequency available as a blueprint. No separate Frequency Upgrade needed.

The Sphere is **not a device and not a wearable**.
You activate it through touch and command on your own body, and after the one-time photo upload it stays with you for life.
