

# SINK GEORGE SOROS' FLEET!

## AND TAKE BACK THE U.S. CONGRESS !

A POLITICAL ACTIVISM GAME BY THE MOCO CONS MEETUP GROUP

\$40 TO PLAY, 36 PLAYERS REQUIRED

We have identified 31 house races where the seat is currently held by a democrat but where Trump won the district. We must flip the districts Red! We have identified 5 additional house seats in contest in 2020 for a total of 36 races we will attempt to influence with donations

1. If you want to play this game you must pledge to donate at least \$40 to one race assigned by the game administrator. There are no additional fees. The player contacts the Game Admin by e-mail and the Game Admin assigns candidates to players in sequence, such that all 36 races are donated to.
2. When the player provides a copy of the receipt of donation to the Game Admin, the players entry is considered validated.
3. For each validated game entry the player allocates the military ship game pieces at the left within the board any way they want. The player indicates their game board configuration to the Game Admin. The Game Admin will provide the simple details for this.
4. The players will not know what box represents what races. The game is locked 2 days before the election. Chris provides the master list mapping the races to the 36 cells in the game piece to each player by e-mail. Each player can follow the races and see whether their donations have hit or sunk any of "George Soros' Fleet" that are indicated on their own game board(s).
5. Hits are one point. Two hits on a ship get 3 points. Sunk ships get two bonus points. The first place prize pot is \$150, Second place is \$100, Third place pot is \$75. Ties are split equally across whichever tier they occur in.
