Helping Independent Practices Remain Independent

Provider Advocacy & Claims Resolution Services

*Recover What's Yours.
Protect What You've Earned.*

Your Ally in Combating Unfair Claims Practices.

MCA works directly with independent practices to challenge underpaid, denied, or improperly processed claims. We push back against payer tactics—overturning denials, reversing under-payments, and shutting down unfair claims practices so your practice gets every dollar it's owed. We also offer strategic revenue defense services designed specifically to identify and counteract any payer tactic aimed at unfairly reducing your practice's revenue.

Why Choose MCA

Proven Success

Over the years, MCA has helped independent practices recover and protect substantial revenue by leveraging regulatory and legal expertise to combat unfair payer tactics, and we can do the same for your practice.

Specialized Support

We're not a billing service; we're your provider advocate and claims resolution specialist, bringing a level of expertise that goes far beyond what most billing operations can offer.

Contingency Fees Only for Claims Recovery

Our denied/underpaid claims recovery service fees are contingent on successful recovery. No recovery, no fee. Your success is our success.

Solutions That Protect Your Revenue

Denied/Underpaid Claims Recovery

Insurance payers routinely deny or underpay valid claims, hoping you'll accept their denials and reduced reimbursements as inevitable losses.

We aggressively challenge these improper denials and underpayments by leveraging powerful regulations like ERISA, overturning unfair payer tactics, and securing proper and full reimbursements.

Medicare/Government Program Appeals

Medicare doesn't just hand out checks - every dollar comes wrapped in regulations, deadlines, and cryptic denial codes. When Medicare or related programs (Medicaid, TRICARE, VA, or state agencies) reject or underpay your claims, we go to work.

We navigate the maze of CMS regulations and agency guidelines, file precise regulatory-based appeals, and ensure critical deadlines never slip by unnoticed. Hand us your improperly denied and underpaid claims, and we'll turn them into recovered revenue for your practice.

Recoupment Defense

Payers frequently demand unwarranted refunds from providers, particularly targeting out-of-network practices, hoping you'll repay money you've rightfully earned.

We swiftly intervene, using regulatory defenses and targeted appeal strategies to halt these unjustified refund demands. Our deep understanding of insurance regulations helps protect your practice's revenue from payer abuse.

Payer Audit Support

Insurance audits often come disguised as routine checks, but they're frequently used to claw back payments through unjustified denials and refund demands.

We respond quickly and strategically. We begin with a detailed analysis of the audit to determine the scope and intent. We identify any documentation gaps or vulnerabilities and craft a customized, defensible response that directly addresses the payer's findings, citing all relevant payer policies, coding guidelines, and federal/state regulations.

Beyond the initial response, we manage the entire follow-up process, guiding you step-by-step on what to submit and how to respond. This ensures you stay protected, avoid costly errors, and prevent payers from misusing the audit process to withhold or recoup funds unfairly.

Helping Independent Practices Remain Independent

Worker's Compensation Claims Support

When red tape gets in the way of rightful compensation, we clear the path. WC claims often come with a maze of procedural hurdles, strict deadlines, and rigid payer scrutiny, making fair reimbursement a challenge. Payers and TPAs frequently delay, reduce, or deny payments through technicalities and documentation demands.

We step in to ensure your practice is not unfairly penalized. We review disputed claims, respond to documentation requests, and appeal improper denials and underpayments using regulatory knowledge and proven dispute strategies. Whether you're facing downcoding, denied authorizations, or unclear fee schedules, we help you navigate the process and recover what's rightfully yours, without burdening your staff.

PPO Revenue Leakage Prevention and Recovery

Silent PPOs and unauthorized discounts quietly siphon revenue from providers, often without their knowledge or consent.

We perform a meticulous review of your network contracts, identifying hidden discounts and unfair payment reductions. By pinpointing unauthorized network access, we halt revenue leakage and help reclaim lost funds.

Contract Check-up

Contracts can contain hidden clauses, outdated fee schedules, and obscure language that subtly reduces your rightful reimbursements.

We thoroughly evaluate your existing managed care agreements, uncovering hidden revenue leaks and identifying contractual vulnerabilities. Our transparent, jargon-free recommendations ensure you maximize every dollar owed to your practice.

Patient Advocacy

As more out-of-network providers step away from direct insurance billing, patients are often left to handle claims themselves using superbills. We fill that gap, offering affordable claim and appeal support directly to your patients, at no cost to your practice.

This helps your patients get reimbursed without adding to your admin load—so you can stay focused on care, knowing they're still supported.

Other Services & Strategic Support

Payers count on confusion and complexity to prevent providers from effectively defending themselves against their abusive and unjust tactics.

We provide strategic consultation, document preparation, and payer communications support that cuts through payer confusion. Our specialized support helps your practice proactively handle complex payer scenarios, reinforcing your revenue integrity.
