## Suspension and temporary discontinuation of the Smart Trade feature

# Temporary Suspension and Decommissioning of the Smart Trade Feature

Young Platform S.p.A. (“Young Platform”) hereby informs its users that, within the framework of the ordinary management of the services provided and in compliance with the disclosure and transparency obligations outlined in Regulation (EU) 2023/1114 (“MiCAR”), the Smart Trade feature will be temporarily suspended in accordance with the schedule detailed below. Following the decommissioning period, the feature will undergo a comprehensive redesign and will subsequently be reactivated.

## Schedule of Operations

- **25 June 2026 | Decommissioning of the Smart Trade Feature**  
As of 25 June 2026, the feature will be decommissioned, and it will no longer be possible to initiate new Smart Trades. Any Smart Trades remaining active on the aforementioned date will be automatically settled and closed by Young Platform.
- **Q4 2026 | Reactivation of the Feature**  
Young Platform anticipates reactivating the service by the end of 2026. The definitive date of reactivation will be determined and communicated with appropriate prior notice through the official channels of Young Platform.

## Actions Required by Users

Users who, at the time of this communication, hold one or more active Smart Trades are invited to manually close them **on or before 24 June 2026** by accessing the dedicated section of the Young Platform application.

Following the expiry of the 24 June 2026 deadline, Young Platform will automatically close any remaining active Smart Trades starting on 25 June 2026.

In both scenarios – whether closed manually by the user or automatically by the platform – the crypto-assets utilised in the Smart Trade will be credited back to the user's Main Wallet within the Young Platform application. No automatic conversion or transfer outside the user's Main Wallet will occur.

Any fluctuations in the value of the crypto-assets occurring during the operational period of the Smart Trades or at the time of closure are inherent to the volatile nature of crypto-assets, and Young Platform disclaims all liability for any such changes in value.

## Impact on the Young Platform Clubs

The Smart Trade feature is one of the benefits associated with the Young Platform Clubs. During the suspension and decommissioning period, this benefit will be unavailable.

All other benefits connected to the Young Platform Clubs remain unchanged and fully operational. The access requirements for the various Club tiers, including the YNG token-locking mechanisms, are not affected by this communication.

Furthermore, this communication does not amend the Terms and Conditions of the Young Platform Club service, nor does it alter the scope of services encompassed by the definition of "crypto-assets" in the current YNG token White Paper.

## Impact on the YNG Token

The YNG token remains fully operational within the Young Platform ecosystem. The suspension and decommissioning of the Smart Trade feature does not entail any modification to:

- the availability or functionality of the YNG token within the application;
- the YNG locking mechanisms associated with the Young Platform Clubs;
- any other mechanics associated with the YNG token.

This communication does not constitute an amendment to the YNG token White Paper pursuant to Article 25 of Regulation (EU) 2023/1114.

## Reactivation of the Service

Young Platform is currently redesigning the Smart Trade service. The reactivation of the feature is anticipated by the end of 2026; the exact date will be communicated with appropriate prior notice through the official channels of Young Platform.

Any significant changes to the characteristics of the Smart Trade service compared to the version currently offered will be subject to a dedicated information disclosure, in compliance with applicable transparency obligations.

## Support and Assistance

For any clarification requests, you may contact the Young Platform [Customer Support](#) through the official channels listed on the Support website. Formal complaints may be submitted in accordance with the procedures detailed in the [Complaints Handling Policy](#) available on the Young Platform website.

*This communication constitutes a service disclosure pursuant to Regulation (EU) 2023/1114 (MiCAR). It does not constitute a marketing communication, financial or investment advice, or an invitation to invest. Crypto-assets are subject to high volatility and specific risks, including the risk of a total loss of the invested capital. For comprehensive information on the YNG token, please refer to the White Paper published on the official channels of Young Platform and the Terms and Conditions of the service. Young Platform operates in compliance with applicable regulations, including Regulation (EU) 2023/1114 (MiCAR).*
