0 of 0 people found the following review helpful. this book is fantastic, as I can show trainees pictures of some ...By Katrina OrrAs a breastfeeding counsellor, and soon to be trainer of up and coming counsellors, this book is fantastic, as I can show trainees pictures of some of the "lactation aids" we provide education on and some of the breast and nipple problems we counsel on.4 of 4 people found the following review helpful. interesting picturesBy K. lavergneI purchased this book and saw some pictures that I have not seen anywhere else and this was helpful, as I will sit for my IBCLC exam in July. However, I did return it, and plan to purchase the atlas by Kay HOOVer and BARBara Wilson clay because after viewing it, I find that it better explains the pictures and really gets into the pathophysiology of what is going on. I found that the explanations in this book were very short and to the point which is not what I was looking for. Others may find it helpful, but it was not what I was looking for.

Breastfeeding: An illustrated guide to diagnosis and treatment will help lactation consultants, midwives, maternal and child health nurses, medical practitioners and allied health professionals care for breastfeeding mothers and their children. Even after years of practice, health care practitioners will encounter extraordinary situations - and it is precisely then that specific expertise and understanding of breastfeeding issues is critical. Illustrated with over 200 images, this unique resource provides essential information about a vast range of breastfeeding situations: Basic principles of breastfeeding knowledge according to the most recent scientific findings, including breast anatomy and physiology, correct attachment, the milk ejection reflex and breastfeeding positions; Physiological causes of breastfeeding problems such as atypical breast shapes, nipple problems or pathological changes in the breast; Breastfeeding problems associated with the child including prematurity, disability, infection or neurological impairment; and Each full colour image is supported by text providing clear diagnosis and appropriate treatment techniques Medically approved equipment for lactation and
