Director of Software Development
Information Technology

Z1 Motorsports is seeking an experienced candidate to join our team as the Director of Software Development. This position reports directly to the COO based in Carrollton, Georgia.

Position serves as a project leader of our in-house team focused on development of quality software in support of our business objectives. Candidates will have prior experience with project management and people leadership in a mixed-method software development environment. This candidate must be meticulous and organized and possess excellent verbal and written communication skills with the ability to thrive in a fast-paced team environment. Candidates should possess strong personality management skills. Candidate should develop an un-biased framework to establish priority and be able to use that framework to categorize each project based on the established and approved framework. Candidate should demonstrate the ability to work with multiple stakeholders to help prioritize key projects and drive to completion. This position requires the capability to work on multiple projects simultaneously.

Responsibilities:
• Work with multiple stake holders to establish priorities and roadmap for delivery of projects
• Demonstrate outstanding project leadership skills to ensure delivery of projects on time and on budget
• Monitor the performance of development resources and adjust as needed to ensure successful software roll out every week
• Successfully manage within the confines of time, cost and quality across multiple initiatives and multiple time zones
• Keen eye for project strategy and establishing and maintaining a software roadmap (Jira)
• Organize business analysis and quality assurance functions as they relate to software development
• Work alongside business teams to assure projects are well understood and ready for development
• Budget input where it applies to strategic positioning of resources for success
• Weekly reporting to management on key performance indicators
• Create and audit standard operating procedures for new product rollouts
• Be proactive in communicating potential delays. Be able to seek help from sponsors and extended team when projects are in jeopardy.
• Maintain oversight of our infrastructure in Google Cloud
• Maintain PCI and Security compliance across applications and endpoints
• Work with desktop help to maintain and support employee base

Qualifications:
• Bachelor's degree in Information Technology, Computer Science, Information Systems, or a related field, or equivalent experience
• 5 years of experience working as a Project Manager in web development or eCommerce
• Experience in multiple of languages (PHP, JS, Python, SQL)
• Experience with Google Cloud
• Experience leading and managing large software projects
• Experience with multiple Project Management disciplines and ability to switch between them
• Must be a strong communicator with individuals and in group meetings
• Meticulous attention to detail and extremely self-organized
• Driven self-starter that is goal oriented

What success looks like:
• On time delivery of project priorities as agreed upon by the organization
• Make suggestions on project strategy and methods to improve team success
• Be a strong leader to deliver and hold team accountable
• Successfully manage across multiple project types with resources in multiple time zones
• Weekly roll out of software that is performant and of high quality
