

ADVANCED GRAPHICS PROGRAMMING IN C AND C++

Roger T. Stevens and Christopher D. Watkins

Featuring 16 pages of
full-color graphics you can
create on your computer.

BPB PUBLICATIONS

Contents

WHY THIS BOOK IS FOR YOU	1
INTRODUCTION	3
The Mathematics Module	4
The Graphics Interface Module	5
Using the Mathematics and Graphics Modules	5
Solid Modeling Theory and Database Structure	6
Adding Objects to the Scene	6
Sorting and Displaying Objects in a Scene	6
The Solid Modeling Program	7
The Description File Maker	7
Creating Data for a Solid Model	8
Z-Buffering	8
Ray Casting and Ray Tracing	8
Hardware and Software Required	9
Summing it Up	10
 PART 1: UNIVERSAL ROUTINES	
CHAPTER 1: THE MATHEMATICS MODULE	17
Numerical Functions	17
Simple Math Functions	30
The <i>Radians</i> and <i>Degrees</i> Functions	31
The <i>CosD</i> and <i>SinD</i> Functions	31
The <i>Power</i> Function	31
The <i>Log</i> Function	31
The <i>Exp10</i> Function	32
The <i>Sign</i> and <i>IntSign</i> Functions	32
The <i>IntSqrt</i> Function	32

The <i>IntPower</i> Function	32
Vector and Matrix Routines	33
The <i>Vec</i> and <i>VecInt</i> Functions	33
The <i>UnVec</i> and <i>UnVecInt</i> Functions	33
The <i>VecDot</i> Function	34
The <i>VecCross</i> Function	34
The <i>VecLen</i> Function	34
The <i>VecNormalize</i> Function	34
The <i>VecMatxMult</i> Function	35
The <i>VecSub</i> and <i>VecSubInt</i> Functions	35
The <i>VecAdd</i> and <i>VecAdd3</i> Functions	35
The <i>VecCopy</i> Function	35
The <i>VecLinComb</i> Function	35
The <i>VecScalMult</i> and <i>VecScalMultInt</i> Function	36
The <i>VecAddScalMult</i> Function	36
The <i>VecNull</i> and <i>VecNullInt</i> Functions	36
The <i>VecElemMult</i> Function	36
Affine Transformation Routines	37
The <i>ZeroMatrix</i> Function	37
The <i>Translate3D</i> Function	37
The <i>Scale3D</i> Function	37
The <i>Rotate3D</i> Function	38
The <i>Multiply3DMatrices</i> Function	39
The <i>PrepareMatrix</i> Function	39
The <i>PrepareInvMatrix</i> Function	39
The <i>Transform</i> Function	39
CHAPTER 2: THE GRAPHICS INTERFACE MODULE.....	41
The <i>SetMode</i> Function	41
The <i>PreCalc</i> Function	41
The <i>Plot</i> Function	41

The <i>ClearPalette</i> Function	56
The <i>SetPalette</i> Function	56
The <i>InitPalette1</i> Function	56
The <i>InitPalette2</i> Function	57
The <i>Cycle Palette</i> Function	57
The <i>Swap</i> Function	57
The <i>Circle</i> Function	58
The <i>Draw</i> Function	58
The <i>InitGraphics</i> Function	59
The <i>WaitForKey</i> Function	60
The <i>ExitGraphics</i> Function	60
The <i>Title</i> Function	60
Three-Dimensional Plotting Routines	60
The <i>InitPlotting</i> Function	60
The <i>InitPerspective</i> Function	61
The <i>MapCoordinates</i> Function	61
The <i>CartesianPlot3D</i> Function	63
The <i>CylindricalPlot3D</i> Function	63
The <i>SphericalPlot3D</i> Function	64
The <i>DrawLine3D</i> Function	64
The <i>PutPixel</i> Function	65
The <i>GetPixel</i> Function	65
Displaying the Coordinate Axes and the Color Palette	65
CHAPTER 3: HOW TO USE THE MODULES	67
Walking About on the Mandelbrot Set	67
Simulating Two Orbiting Particles	77
The <i>Orbit-2P.c</i> Program	80
The <i>Orbit-3P.c</i> Program	84
Three Particle Orbits	90
Generating a Sierpinski Triangle	91

The Bifurcation Diagram	94
Creating a Strange Attractor	96
Generating the Lorenz Attractor	99

PART II: WIRE FRAME AND SOLID MODELING

CHAPTER 4: SOLID MODELING THEORY AND DATABASE STRUCTURE.....	107
Scale Factors	108
Vertex and Facet Arrays	108
Loading and Saving <i>Vertex</i> and <i>Facet</i> Data	115
Drawing a Wire Frame Facet	116
Painting a Solid Facet on the Screen	117
A Sample Manually Generated Data File	117

CHAPTER 5: ADDING OBJECTS TO THE SCENE	119
Initializing the Object Buffer	120
Inserting Object Information into the Object Buffer	120
Adding Edge Reflectors to a Scene	130
Adding Objects to a Scene from a Procedure	131
Adding Objects to a Scene from a Disk File	132

CHAPTER 6: SORTING AND DISPLAYING OBJECTS ON THE SCREEN	133
Sorting Objects for Placement on the Screen	146
Placing an Object on the Screen	148
Displaying Objects and Reflections	149

CHAPTER 7: THE MODEL.C DESCRIPTION FILE MAKER.....	151
---	------------

CHAPTER 8: THE 3-D MODELING PROGRAM.....	155
Viewer and Light Source Vector	156
Loading the Description File and Scene Data	172
Affine Transformations	173
Finding the Surface Normal Vector	174
The Illumination Model	174
Testing a Facet for Visibility	175
The Reflection Screen Buffer	175
Obtaining Facet Screen Coordinates	176
Painting a Solid Facet on the Screen	176
The <i>Model.c</i> Program	177
CHAPTER 9: CREATING OBJECT DATABASES	179
Adding Vertices	179
Initializing Before Making Vertices	180
Creating Objects with the <i>MakeObj.c</i> Program	184
Generating a Cone or Pyramid Data File	188
Generating the Data File for a Cylinder	192
Generating the Data File for a Hemisphere	196
Generating the Data File for a Sphere	200
Generating Data Files for Equations	204
Generating the Data File for a Toroid	209
Generating Data Files for Solids of Revolution	213
CHAPTER 10: CREATING A SCENE FILE	221
Using the <i>ScnMaker.c</i> Program	221
Keyboard Response Routines	231
The <i>ScnMaker.c</i> Program	232

PART III: Z BUFFERING AND HORIZON RENDERING

CHAPTER 11: Z BUFFERING THEORY AND DATABASE

STRUCTURE.....237
Scale Factors241
Clearing, Loading, and Saving Height Data241
Getting an Object File242
Displaying the Object Color Name242

CHAPTER 12: THE DESMAKE.C DESCRIPTION

FILE MAKER.....243
Keyboard Response Routines243
The Main Function247

CHAPTER 13: THE Z-BUFFER RENDERING PROGRAM.....253

Screen Functions253
The Illumination Model270
Loading the Description Data271
The *Render.c* Program272
Displaying the Height Field272
Placing AddOns on the Screen274
Julia Set Images280
Creating a Blended Sky282

CHAPTER 14: CREATING AND WORKING WITH Z-BUFFER DATABASES.....283

Generating the Database for a Hemisphere283
Generating the Database for a Hemitoroid286
Generating the Database for Equations290
Generating a Magnetic Field Database295
Finding the Highest and Lowest Points in the Height Array296

Viewing a Slice of the Database	299
Removing Discontinuous Zeroes	304

CHAPTER 15: FRACTAL PROGRAMS TO GENERATE DATABASES	307
Generating Fractal Mountains	307
Mountains from Plasmas	314
Three-Dimensional Mandelbrot Sets	315
Three-Dimensional Julia Sets	323
Fractals Using Quaternions	320
Quaternion Mathematics	329
Generating Quaternion Fractal Databases	330
Smearing Height Data	331

PART IV: RAY TRACING

CHAPTER 16: RAY TRACING FUNDAMENTALS	345
Compiler Memory Model	347

CHAPTER 17: HIGH RESOLUTION GRAPHICS	351
---	------------

CHAPTER 18: DEFINING A SCENE: THE .RT FILE	383
Formatting Constraints	383

CHAPTER 19: THE RAY TRACING PROGRAM	427
Ray Tracing Overview	427
The Main Program	478
Loading an .RT File	479
Initializing the Noise Function	483
Scanning the Scene	483
Tracing the Ray	484

Determining the Color489

Creating a Textured Surface491

Completing the Ray Trace492

CHAPTER 20: DISPLAYING A RAY-TRACED FILE493

Creating a VGA Color Display493

APPENDIX A: SOLID MODELING SCENE DEFINITION FILES503

APPENDIX B: MATERIALS USED IN RAY TRACING521

BIBLIOGRAPHY.....529

INDEX
