

MODERN
APPROACH TO

ORGANIC CHEMISTRY

B.Sc. PART-I, SEMESTER-I
(ALL UNIVERSITIES OF HARYANA)

Dr. J.M. SEHGAL

Contents

1/1—1/28

1. Structure and Bonding

- 1.1. Introduction to Organic Chemistry
- 1.2. Nature of Bonding in Organic Compounds
- 1.3. Bond Energy
- 1.4. Localized and Delocalized Chemical Bond
- 1.5. Van der Waals Interactions
- 1.6. Resonance
- 1.7. Resonance Effect
- 1.8. Hyperconjugation or "no-bond" Resonance
- 1.9. Inductive Effect
- 1.10. Electromeric Effect

Illustrative Conceptual Questions With Answers

2. Stereochemistry of Organic Compounds

2/1—2/72

- 2.1. Introduction
- 2.2. Isomerism
- 2.3. Structural Isomerism
- 2.4. Stereoisomerism
- 2.5. Optical Isomerism
- 2.6. Optical Isomerism : Enantiomerism
- 2.7. Representation of Stereoisomers
- 2.8. Chiral and Achiral Molecules with two Stereogenic Centres : Diastereomerism
- 2.9. Meso Compounds
- 2.10. Number of Possible Stereoisomers in Compounds Containing Different Number of Chiral Centres
- 2.11. Racemisation
- 2.12. Internal and External Compensation
- 2.13. Resolution of Racemic Mixture
- 2.14. Asymmetric or Enantioselective Synthesis
- 2.15. Inversion of Configuration : Walden Inversion
- 2.16. Configuration and its Specification
- 2.17. Rectus and Sinister or R and S sequence for Specification of Configuration
- 2.18. Geometrical Isomerism : Hindered Rotation around Carbon-Carbon Double Bond
- 2.19. Conformations
- 2.20. Difference between Conformation and Configuration
- 2.21. Conformational Analysis of Ethane
- 2.22. Conformational Analysis of Propane

- 2.23. Conformational Analysis of *n*-Butane
- 2.24. Factors which Influence Conformational Stability
- 2.25. Conformations of Cyclohexane
- 2.26. Conversion of Formulae

Illustrative Conceptual Questions With Answers

3/1 — 3/40

3. Mechanism of Organic Reactions

- 3.1. Introduction
- 3.2. Important Notations
- 3.3. Types of Bond Cleavage
- 3.4. Reaction Intermediates
- 3.5. Carbocations
- 3.6. Carbanions
- 3.7. Free Radicals
- 3.8. Carbenes
- 3.9. Nature of Reagents
- 3.10. Classification of Organic Reactions
- 3.11. Energy changes during reactions
- 3.12. Assigning Formal charges to Intermediates and other Ionic species

Illustrative Conceptual Questions With Answers

4/1 — 4/34

4. Alkanes and Cycloalkanes

- 4.1. Introduction
- 4.2. Structure of Alkanes
- 4.3. Classification of Carbon Atoms in Alkanes
- 4.4. Nomenclature of Alkanes
- 4.5. Structural Isomerism in Alkanes
- 4.6. Natural Sources of Alkanes
- 4.7. General Methods of Preparation
- 4.8. Physical Properties of Alkanes
- 4.9. Chemical Properties
- 4.10. Mechanism of Halogenation of Alkanes
- 4.11. Some Important Aspects of Halogenation of Alkanes

Illustrative Conceptual Questions With Answers

4/35 — 4/52

4. (Contd.) Cycloalkanes

- 4.12. Introduction to Cycloalkanes
- 4.13. Nomenclature of Cycloalkanes
- 4.14. Synthesis of Cycloalkanes and Their Derivatives
- 4.15. Physical Properties
- 4.16. Chemical Properties
- 4.17. Relative Stabilities of Cycloalkanes : Baeyer's Strain Theory
- 4.18. Sachse-Mohr Theory of Strainless Rings

Illustrative Conceptual Questions With Answers

University Question Papers

1—5
