Contents

Introduction xxi

PART I OVERVIEW 1

Chapter 1 An SAP Primer for Administrators 3

In This Chapter 4
SAP Architecture 5
The Basis Layer 6
Client/Server Architectures 7
SAP's Tiered Architecture 7
Homogeneous SAP Systems 8
Heterogeneous SAP Systems 8
Graphical User Interface (SAPGUI) 9
SAP's Flexibility and Scalability 9
SAP R/3 Standard 9
ABAP Development Workbench 15
Data Dictionary 16
Problem Resolution 17

PART II PLANNING 19

Chapter 2 The Administrator's Role in Installation Planning 21

In This Chapter 22
Hardware Requirements 22
Selecting Your Hardware Platform 22
Sizing Your Hardware 27
Server Requirements 27
Planning for Future Growth 28
Software Requirements 29
Operating System Considerations 29

Scanned by TapScanner

Selecting Your Database Server 29
Sizing Your Database 30
Laying Out Your Database 30
Selecting Your Application Server 32
Selecting Your Presentation Server 32
Networking Requirements 33
LAN Considerations 33
WAN Considerations 35
Remote Support Connections 36
Resource Requirements 37
Identifying Personnel Roles 38
Outsourcing 43
Installation Planning Checklist 44
Complete Technical Questionnaire 44
Size Hardware 44
Determine Technical Infrastructure Needs 45
Procure Hardware and Network Connections 45
System Landscape 45
System Purpose 46
System Names 46
Client Strategy 46
Transport System Strategy 47
SAP Software Release Strategy 48
Summary 48

Chapter 3 R/3 System Strategies for Basis Administrators 49

In This Chapter 50
System Landscapes 51
Single-System Landscape 51
Two-System Landscape 52
Three-System Landscape 52
Client Strategy Best Suited for the System Landscape 53
The Development Environment 53
How to Manage "Rolling Releases" 57

Scanned by TapScanner

PART III INSTALLATION 59

Chapter 4 An Administrator's Guide to Installing R/3 61

In This Chapter 62
UNIX Operating System and Hardware Preparation 62
Installation Steps 62
ORAINST Pre-Execution Requirements 63
ORAINST Procedure 67
R/3 Installation Tools 69
Installing the Database Software 71
Installation Example 80
Network Installation 80
The Languages Your System Will Speak 86
Preparing the SAP Online System 87
SAP OSS Messages 108
SAP OSS Administration 112
SAP Service Connection 112
General Functions 113
Online Correction Support 114
Steps for Installing Hot Packages 116
Distributing Patches 117
Summary 119

PART IV CONFIGURATION 121

Chapter 5 Creating and Administrating Clients 123

In This Chapter 124
The R/3 Client Concept 124
Client Usage 125
Client Creation Tools 126
Logical System 126
Category 128
Changes and Transports for Client-Dependent Objects 128
Client-Independent Object Changes 129
Restrictions 129

Scanned by TapScanner

Local or Remote Client Copy SCCO 130
Local Client Copy SCCL 130
Remote Client Copy SCC9 130
Copying a Client per Transport Request SCC1 131
Client Copy and Transport
(Import and Export) SCC2 131
Client Export SCC8 132
Client Import-Post-processing SCC7 132
Client Copy Log Analysis SCC3 132
Deleting a Client SCC5 133
Client Import per Transport Request SCC6 133
Client Copy Profiles 133
Client Copy Prerequisites 136
Client Copy Utilities 138
A Client Copy in Action 140
Check Disk Space 142

Chapter 6 Security Administration 155

In This Chapter 156
Methodology 157
Authorizations 159
Authorization Classes and Objects 159
Special User Accounts 168
Passwords 169
Table Authorizations 171
ABAP Authorization 175
Authority-Checks 177
Profile Generator 177
Activity Group Creation and Assignment 178
Other Tools and Security Issues 180
Transaction SU53—Authorization Check 180
Transaction ST01—Trace 180
Transaction ST05—SQL Trace 183
Security Roles and Responsibilities 184
The SAP Security Administrator 186
Audit Information Systems (AIS) 187
System Audit and Business Audit 187

Scanned by TapScanner

Critical Authorizations Combinations 19
Summary 19

Chapter 7 Spool Administration 19

In This Chapter 19
Printing. 19
Printer Installation 19
Faxing. 20
Faxing Using Delrina/Winfax at the Workstation 20
Faxing Using SAPcomm/TOPCALL at the Server . . . 21
Using SAPconnect (Replacing SAPcomm) 21

Chapter 8 Correction and Transport System. 221

In This Chapter 22
Repairs 22
Correction. 223
System Change Option 223
Transport Types 223
C Type 225
T Type 225
K Type 225
Common Scenarios in a CTS Environment. 226
Object Types Related to the Correction
and Transport System 226
Transport Management System (TMS) 227
TMS Concepts 227
Configuring TMS 228
Setting Up Correction and Transport System
at UNIX Level 229
Examining Unix Users, Groups, and Permissions. 231
Verify Control Tables and Parameters Files for CTS . . 231
Examine Control File TPPARAM 231
Additional Entries to be Verified. 232
CTS Initialization 233
SE06. 234
TPPARAM 234
TSYST 234

Scanned by TapScanner

TDEVC 234
TASYS 234
RDDIMPDP 236
Maintenance of the CTS Environment 236

Chapter 9 SAP Performance Tuning 239

In This Chapter 240
Planning Considerations 240
SAP Services. 241
System Layout, Distribution, and Network Architecture 242
Hardware Architecture 249
Storage Devices and File System 249
Software and Database Layout 251
Operating System Tuning 257
Database Performance Considerations 264
SAP Performance Considerations 282
Memory Management. 283
Buffer Management 304
Summary 313

PART V ADMINISTRATION. 315

Chapter 10 System Monitoring and Administration 317

In This Chapter 318
Monitoring SAP R/3 318
Lock Manager (Enqueue) (SM12) 320
The SAP R/3 System Log (SM21) 321
Performance (ST03) 322
Buffers (ST02) 322
ABAP Errors (ST22) 322
Roll and Paging (ST02) 323
Trace Switch (ST05) 324
Batch Jobs (SM37 or SM39) 324
Updates (SM13) 325

Scanned by TapScanner

Process (SM50) 32
Load Balancing (SMLG) 32
Active and All Logged on Users (AL08) 32
Gateway (SMGW) 32
Hot Package and Kernel Patch Level 32
Operating System 32
Database 33
Alert Monitor 33
Global (AL01-SAP System & AL02-Database) 33

Chapter 11 Performance Monitoring and Administration 339

In This Chapter 340
CCMS Monitoring Transactions 340
Monitoring Transactions 341
Determining Performance Goals 342
User Response Time 343
Identifying Performance Bottlenecks 344
Tuning Rules of Thumb 348
ABAP Runtime Analysis 349
With Subroutines 349
With Internal Tables 349
With Technical Database Information 350
Display Filter 350
Hit List 352
Tables 352
Group Hit List 353
Hierarchy 354

Chapter 12 Database Administration 355

In This Chapter 356
Roles and Responsibilities of a Basis Administrator as DBA 356
Installing and Upgrading the Database 357
Assisting and Managing the Development Process . . . 357
Database Security 359

Scanned by TapScanner

Backup and Recovery Strategies 361
Scheduled Database Maintenance and Support 370
Summary 388

Chapter 13 Data Archiving for Administrators 289

In This Chapter 390
Archiving Concepts 391
Developing an Archiving Strategy 392
Archiving Authorizations 392
Identifying the Archive Objects 393
Performing the Archive 398
Step 1: Parameters Setup 398
Step 2: Configuring the Archiving Object 407
Step 3: Performing the Actual Archiving 407
Application Archiving Objects 408
Financial Archive Objects 409
Accounting Documents (FI_DOCUMNT);
Archive Customizing Example 411
Controlling Archive Objects 413
CO Cost Center Line Items (C0_CCTR_EP);
Archiving Example 414
Material Management Archive Objects 414
MM—Purchasing Documents (MM_EKKO):
Archiving Example 416
Sales and Distribution Archive Objects 417
SD—Sales Documents (SD_VBAK);
Archiving Example 417
Data Retention Tool (DART) 420
Summary 423
Archive 424
Deletion 425
Post Processing 425
Other Options 426
ArchiveLink 426

Scanned by TapScanner

Chapter 14 An Administrator's Troubleshooting Guide 429

In This Chapter 430
Analysis Tools 431
The System Log 431
The System Process Overview (SM50) 434
The ABAP Dump Analysis 435
The Update Records Monitor 438
The Lock Entries Monitor 440
System Trace Files 441
Online Service System 444
The Database Alert Log 444
Diagnosing the Problem 445
Is the Problem Reproducible? 445
Problem Rectification 446

Chapter 15 The Internet and SAP 447

In This Chapter 448
Architecture 448
Installation Summary 449
Administration 450
The Internet Application Components (IAC) 450
ITS and Components 451
ITS Project Directory and Service File 454
Creation of WebTransactions 455
Creation of WebRFC and WebReporting 457
WebReporting 460
WebReporting Browser 461
User Administration 462
Security 462
Controlled Access 462
Encryption Technology 463
SAP@Web Studio 464
Summary 465

Scanned by TapScanner

PART VI UPGRADING. 467

Chapter 16 The Administrator's Role in Upgrading R/3 469

In This Chapter 470
The Upgrade Process. 470
When to Upgrade 471
Planning Your Upgrade 471
The Technical Upgrade 487
Summary 498

Chapter 17 Pre-Production for Administrators 499

In This Chapter 500
Resource Planning. 500
Test and Measurement 501
Volume Test 501
Stress Test. 502
System Administration Tests 504
Job Scheduling Management. 504
Database Management 506
Database Backup and Recovery Management 507
Verify Data Written to the Backup Medium 507
Backup and Recovery 508
Transport Management System (TMS) 508
SAP System Alerts and Logs 508
Printing and Fax Management 509
Daily Monitoring Activities. 509
Daily Transactions. 509
SAP R/3 System Administration. 511
Disaster Recovery 512
Disaster Recovery Procedure 512
Recovery and Test 513
Document Findings 513
Pre-production Data Migration and Data Loads 513

Scanned by TapScanner

Pre-production Checklist. 515
Stabilization of the Production System 516
Summary 517

PART VI APPENDIXES 519

Appendix A Understanding the EDI Architecture 521

Appendix B Understanding Ready-to-Run R/3 547
