

Computer Studies Series

BASIC

for
beginners

By Brian M.J. Kavanagh

Contents

	Preface	3			
Unit 1	Introduction	7			
1.1	Digital computers	7			
1.2	What is a digital computer?	8			
1.3	How to use a computer	8			
1.4	Using a computer terminal	8			
1.5	Off-line use of BASIC	10			
1.6	How to use this book	10			
Unit 2	Giving a program to the computer	11			
2.1	Simple arithmetic	11			
2.2	Locations and words	12			
2.3	A BASIC program	13			
2.4	More about using a computer terminal	14			
2.5	BASIC commands	15			
2.6	Correction of errors at the terminal	17			
2.7	Using batch BASIC	18			
2.8	Commands in batch BASIC	19			
2.9	Correction of errors in batch programs	20			
Unit 3	Simple input and output	21			
3.1	Adding any two numbers	21			
3.2	The DATA statement	21			
3.3	The READ statement	22			
3.4	The PRINT statement	22			
3.5	A BASIC program using DATA	23			
Unit 4	Arithmetic with the computer	25			
4.1	The four arithmetic operations	25			
4.2	Powers of numbers	25			
4.3	Use of brackets	27			
4.4	The order in which operations are performed	28			
4.5	Mistakes in BASIC assignment statements	29			
4.6	An extension to the naming of variables	30			
4.7	Initializing the value of a variable	30			
4.8	More about printing titles	31			
Unit 5	Decision making in BASIC				
5.1	Conditional statements	33			
5.2	Relations between variables	33			
5.3	The IF statement	34			
5.4	The GOTO statement	34			
5.5	Loops	35			
5.6	Counters and the control of loops	36			
Unit 6	Use of BASIC functions				
6.1	The need for functions	41			
6.2	The square root function	41			
6.3	The absolute value of a number	41			
6.4	The integer part of a number	42			
6.5	The sine function	44			
6.6	The cosine function	45			
6.7	The tangent function	45			
6.8	The inverse tangent function	45			
Unit 7	Characters and strings				
7.1	The storage of characters	49			
7.2	The manipulation of character strings	49			
7.3	A data processing problem	51			
7.4	Data statements and string variables	51			
Unit 8	Further input and output				
8.1	The READ statement	53			
8.2	The INPUT statement	53			
8.3	More about the DATA statement	54			
8.4	The PRINT statement	55			
8.5	The TAB function	56			
8.6	Drawing a graph	59			
Unit 9	The use of FOR loops				
9.1	The FOR statement	63			
9.2	The average of a set of numbers	63			
9.3	Conditional statements in a FOR loop	65			
9.4	A data processing problem	67			
Unit 10	Arrays in BASIC				
10.1	The need for arrays	71			
10.2	The use of FOR statements with arrays	71			
10.3	A currency conversion problem	73			
10.4	Arrays and string variables	74			
Unit 11	More about FOR loops				
11.1	The use of two FOR loops	79			
11.2	Nested FOR loops	79			
Unit 12	More about arrays in BASIC				
12.1	Two-dimensional arrays	82			

12.3	Operations on a two-dimensional array	83
12.4	A data processing problem	86
12.5	Another data processing problem	87
		88
Unit 13	Introduction to sorting	
13.1	The necessity for sorting	91
13.2	Ordering two numbers	91
13.3	Ordering three numbers	91
13.4	The 'Ripple' sort	92
13.5	The 'Bubble' sort	92
13.6	Alphabetic sorting	93
13.7	A data processing application	94
		96
Unit 14	More about BASIC functions	
14.1	Standard functions	98
14.2	The SIGNUM function	98
14.3	The natural logarithm and exponential functions	98
14.4	The random number generator	99
14.5	Function definition by the programmer	100
14.6	Logarithms to base 10	101
14.7	A simulation	102
		102
Unit 15	Subroutines in BASIC	
15.1	The need for subroutines	104
15.2	The requirements of a subroutine	104
15.3	The GOSUB and RETURN statements	104
15.4	Sorting methods as subroutines	105
15.5	Permutations and combinations	107
		107
Unit 16	Matrix operations in BASIC	
16.1	The need for matrix operations	109
16.2	Matrix initialization	109
16.3	Matrix input and output	110
16.4	Matrix arithmetic	111
16.5	Matrix assignment with subroutines	112
16.6	Further matrix operations	113
		113
Appendix 1	Character arrays in different implementations of BASIC	115
Appendix 2	PRINT USING facilities	116
Appendix 3	Some details of some BASIC systems	116
		116
Solutions to the assignments		117
Index		127
