

BIOLOGY FOR CHEMIST

A Pragati Edition

CONTENTS

- CHAPTER – 1 : Origin of Life** **1**
Origin of life, Theories for origin of life, Biochemical origin of life, Proofs in favour of biochemical origin, Life on other planets, Evolution (meaning).
- CHAPTER – 2 : Cell Structure and Functions** **13**
Prokaryotic and eukaryotic cells, Ultra structure of a prokaryotic cell, Ultra structure of an eukaryotic cell.
- CHAPTER – 3 : Basic Concepts of Metabolism** **53**
Molecular organisation of living beings, Chemical bonds, Metabolism, Introduction of biomolecules, ATP : Energy currency of the cell.
- CHAPTER – 4 : Carbohydrates : Structure and Functions** **69**
Monosaccharides : Structure and functions, Derivatives of monosaccharides like glycosides, deoxy sugars, myoinositol, amino sugars. N-acetylmuramic acid, sialic acid), Disaccharides : Structure and functions, Storage polysaccharides - starch and glycogen. Structure polysaccharides - cellulose and chitin. Mucopolysaccharides of biological importance, Role of sugars in biological recognition, Blood group substances ; Ascorbic acid.
- CHAPTER – 5 : Carbohydrates : Metabolism** **105**
Glycolysis, Krebs's cycle, glycogenesis and glycogenolysis, pentose phosphate pathway (PPP), gluconeogenesis.
- CHAPTER – 6 : Lipids : Structure and Functions** **127**
Fatty acids, structure and function of triacylglycerols, phospholipids, glycerophospholipids, sphingolipids, cholesterol, bile acids, prostaglandins, Lipoproteins composition and function, role in atherosclerosis, Properties of lipid aggregates, Biological membranes, Fluid mosaic model of membrane structure.
- CHAPTER – 7 : Lipid : Metabolism** **153**
Beta oxidation of fatty acids, Ketogenesis.
- CHAPTER – 8 : Amino-acids : Structure and Functions** **161**
Amino acids, Classification of amino acids, Properties of amino acids
- CHAPTER – 9 : Proteins : Structure and Functions** **179**
Classification of proteins, Primary structure, Secondary structure of proteins, Tertiary structure of protein, Quaternary structure ; Chemical and enzymatic hydrolysis of proteins to peptides ; Amino acid sequencing. chemical/enzymatic/mass spectral, detection.

CHAPTER – 10 : Amino acids : Metabolism	197
Biosynthesis of essential amino acids, catabolism of amino acids	
CHAPTER – 11 : Nucleic Acids: Structure	217
Purine and pyrimidine bases of nucleic acids, base pairing via H-bonding. Structure of ribonucleic acids (RNA) and deoxyribonucleic acids (DNA). Double helix model of DNA (Watson- Crick model) and forces responsible for holding it. The chemical basis for heredity,	
CHAPTER – 12 : Nucleic Acids: Functions	231
An overview of replication of DNA, Genetic code, Protein synthesis, Transcription, Translation.	
CHAPTER – 13 : Nucleotides : Metabolism	257
Biosynthesis of purine nucleotides, Biosynthesis of pyrimidine nucleotides, catabolism of purine nucleotides, Catabolism of pyrimidine nucleotides.	

If you require any
help, guidance or advice
on various competitive exams like
NET, GATE, JAM, JNU
and biotech entrance exams of various universities

We can help you !

Simply log on to our website :

www.sperdha.co.in
or send us your email at
helpmesir@gmail.com

**You can also send us your
queries at following address :**
