# CGI Programming with Tcl

David Maggiano

The accompanying CD-ROM contains:

- A complete library of CGI routines
- A reusable database package written entirely in Tcl

- The full Tcl/Tk installation for Windows desktops
- Complete source code for all examples in the book

---

# Contents

---

	<b>Preface</b>	<b>xv</b>
<b>Chapter 1</b>	<b>The Internet</b>	<b>1</b>
	A Brief History	2
	Wide Area Networks	3
	Ethernet	5
	Ethernet Data Frames	6
	Internetworking and the Internet	7
	Internet Protocol Layers	9
	The Internet Protocol (IP)	9
	Packet Switching	11
	The Transmission Control Protocol (TCP)	12
	Fragmentation	13
	The Three-Way Handshake	13
	User Datagram Protocol (UDP)	14
	UNIX and the Internet	15
	Internet Addresses	16
	Address Space	17
	CIDR Addresses	18
	Ports	19
	The Universal Resource Locator (URL)	20

- Defining the World Wide Web ..... 22
  - The Client-Server Model* ..... 22
  - What Is a Web Server?* ..... 23
- Documenting the Development ..... 24
  - The RFC Series* ..... 25
  - The Internet Standards Track* ..... 26
  - Anyone Can Join* ..... 29
  - Address Management* ..... 30
  - Who Uses the Web?* ..... 31
- Chapter Summary ..... 32

**Chapter 2**

***The Common Gateway Interface* 33**

- What's in a Name? ..... 34
- Analyzing Web Transactions ..... 35
  - Static Web Transactions* ..... 35
  - Dynamic Web Transactions* ..... 36
- The CGI Interface ..... 39
  - The GET Method* ..... 40
  - The POST Method* ..... 44
  - Environment Variables* ..... 45
- The HTTP Specification ..... 48
  - A Stateless Protocol* ..... 50
  - The HTTP Request* ..... 51
  - The HTTP Response* ..... 53
  - Status Codes* ..... 55
- Chapter Summary ..... 57

**Chapter 3**

***Getting Started* 59**

- Obtaining and Installing Tcl ..... 60
- Understanding Your Web Server's Configuration ..... 62
- Installing the CD ..... 63
- Using the cgi.tcl Library ..... 65
- Modularity and the Tcl Package Facility ..... 66
  - Naming Conventions* ..... 67
  - Namespaces* ..... 69
- Chapter Summary ..... 69

<b>Chapter 4</b>	<b><i>Hello World</i></b>	<b>71</b>
	A Word about Tools .....	72
	Example 1: The HTML Version .....	72
	The CGI Approach .....	73
	<i>The Hello World Form</i> .....	76
	<i>Obtaining the Form Data</i> .....	79
	Debugging CGI Programs .....	82
	<i>Command Line Execution</i> .....	82
	<i>Set Up the Environment Variables</i> .....	83
	<i>Displaying User Input</i> .....	84
	<i>Using Embedded puts Commands</i> .....	85
	<i>Trapping Errors with catch</i> .....	85
	<i>Interactive Debugging</i> .....	86
	<i>The Debug Command</i> .....	88
	<i>Tcl Debuggers</i> .....	89
	Chapter Summary .....	90
<b>Chapter 5</b>	<b><i>A Web-Based Directory Browser</i></b>	<b>91</b>
	Security Considerations .....	92
	<i>Obtaining the Client's IP Address</i> .....	92
	<i>Restricting Access Using REMOTE_ADDR</i> .....	94
	<i>Guarding the Back Door</i> .....	97
	Using QUERY_STRING for State Information .....	97
	<i>Building the Directory Screen</i> .....	100
	Enhancing the Browser .....	103
	<i>Hiding the Absolute Path</i> .....	107
	<i>Adding the Icons</i> .....	108
	<i>Providing the "Up One Level" Icon</i> .....	108
	Chapter Summary .....	109
<b>Chapter 6</b>	<b><i>The Mortgage Calculator</i></b>	<b>111</b>
	The Formulas .....	112
	<i>Monthly Payment</i> .....	112
	<i>Amortization Schedule</i> .....	113
	The mort.tcl Package .....	113
	<i>Package Structure</i> .....	118
	<i>The mort::payment Procedure</i> .....	121

	<i>The mort::schedule Procedure</i> .....	121
	Designing Web Pages .....	124
	<i>The Mortgage Calculator Screen</i> .....	126
	<i>The Payment Calculator Screen</i> .....	126
	<i>The Amortization Schedule</i> .....	131
	<i>A Cleaner Display</i> .....	134
	Chapter Summary .....	136
<b>Chapter 7</b>	<b><i>Counting Your Hits</i></b>	<b>139</b>
	The counter.tcl Package .....	140
	<i>The counter_get_count Procedure</i> .....	140
	<i>The counter_display Procedure</i> .....	142
	More Tricks .....	146
	<i>The Hidden Field</i> .....	146
	Chapter Summary .....	149
<b>Chapter 8</b>	<b><i>Server Side Includes</i></b>	<b>151</b>
	Understanding Server Side Includes .....	152
	Configuring Your Web Server .....	152
	Server Side Includes Directives .....	154
	SSI Examples .....	156
	<i>Inserting System Variables into Your Documents</i> .....	156
	<i>Inserting Text into Your Documents</i> .....	157
	<i>File Statistics</i> .....	161
	<i>Executing External Programs</i> .....	162
	The Mortgage Calculator Revisited .....	164
	Customizing the SSI Output .....	165
	Chapter Summary .....	168
<b>Chapter 9</b>	<b><i>Image Maps</i></b>	<b>169</b>
	Server Side Image Maps .....	170
	Client Side Image Maps .....	172
	<i>A File for Every Shape</i> .....	172
	<i>Building the Map</i> .....	174
	The Gemstone Conference Room .....	175
	<i>Processing the Request</i> .....	178

	Chapter Summary .....	182
<b>Chapter 10</b>	<b><i>Putting Data Behind Your Forms</i></b>	<b>185</b>
	The Flat File Database .....	186
	<i>A Look at the Flat File</i> .....	187
	<i>The Selection Screen</i> .....	188
	<i>The Results Screen</i> .....	189
	<i>The db.tcl Package</i> .....	193
	Using db.tcl in Standalone Applications .....	195
	<i>Including the db.tcl Package</i> .....	197
	<i>Creating and Populating the Database</i> .....	198
	<i>Reading Records from the Database</i> .....	199
	<i>Deleting Records from the Database</i> .....	201
	<i>Updating Records in the Database</i> .....	201
	db.tcl Command Summary .....	203
	Using db.tcl in Client-Server Applications .....	206
	<i>The Database Server Program: dbserver.tcl</i> .....	206
	<i>Authentication in the Client-Server Model</i> .....	213
	<i>Real CGI</i> .....	215
	<i>Off-Line Maintenance of Your Data</i> .....	218
	Chapter Summary .....	219
<b>Chapter 11</b>	<b><i>Cookies Anyone?</i></b>	<b>221</b>
	Cookies Anyone? .....	222
	<i>The Cookie Controversy</i> .....	224
	<i>How to Bake Cookies</i> .....	225
	<i>The Cookie Viewer</i> .....	227
	<i>Creating a Cookie</i> .....	230
	<i>Creating Cookies with an Expiration Date</i> .....	234
	<i>Where Are Persistent Cookies Kept?</i> .....	238
	<i>Manually Expiring Cookies</i> .....	238
	<i>How Many Cookies Per Box?</i> .....	240
	Chapter Summary .....	240
<b>Chapter 12</b>	<b><i>The Bug Tracker</i></b>	<b>243</b>
	Authenticating Bug Tracker Users .....	245
	<i>User Accounts in the db.tcl Package</i> .....	246

- The bugt.cgi Program ..... 249
  - The Login Screen* ..... 251
- The Browser Window ..... 252
  - Logging into the Database* ..... 256
  - Creating the Authentication Cookie* ..... 257
  - The HTML Template* ..... 258
  - Building the Browse List* ..... 259
  - Building the Filter* ..... 261
- The View Entry Screen ..... 262
  - Using Hidden Fields* ..... 264
- The Edit Entry Screen ..... 265
- The New Entry Screen ..... 269
- Chapter Summary ..... 272

**Chapter 13      *Building Gateways to Your Data*    273**

- Database Overview ..... 274
  - The Flat File Database* ..... 275
  - The Relational Model* ..... 276
  - The Entity Relationship Diagram* ..... 278
- The OraTcl Package ..... 279
  - Connecting to the Oracle Database* ..... 280
  - Oracle and Cursors* ..... 281
  - Using SQL under OraTcl* ..... 282
  - Building the Test Database* ..... 283
  - Retrieving Query Results with the orafetch Command* . 286
- Examining the Database from the Tcl Shell ..... 287
- OraTcl Inside Your CGI Scripts ..... 290
  - Getting the Company Profile* ..... 294
  - Obtaining the Drive List* ..... 297
  - Getting the Drive Statistics* ..... 299
- Chapter Summary ..... 304

**Chapter 14      *Expect in CGI Scripts*    307**

- A Quick Tour of Expect ..... 309
  - The send Command* ..... 309
  - Matching Input with Expect* ..... 311
  - The spawn Command* ..... 313
- The Web Login Application ..... 315

	Chapter Summary .....	319
<b>Chapter 15</b>	<b><i>The Tcl Browser Plug-In</i></b>	<b>321</b>
	What Is a Browser Plug-In? .....	322
	<i>The Pros and Cons of Using the Browser Plug-In</i> ....	323
	Obtaining and Installing the Plug-In .....	324
	Your First Tclet .....	326
	<i>Referencing Script Files with the SRC Attribute</i> .....	327
	<i>The "HELLO WORLD" Form Application</i> .....	329
	<i>Security Policies</i> .....	332
	<i>Default Error Handling</i> .....	334
	<i>Building Your Own Error Handling</i> .....	335
	Streams and the JavaScript Policy .....	336
	The Mortgage Calculator Revisited .....	338
	<i>The Client-Server Approach</i> .....	339
	<i>Screen Validation with the trace Command</i> .....	341
	<i>The Monthly Payment Screen</i> .....	342
	<i>Reusing the Tclet's Main Window</i> .....	345
	The Client-Side Application .....	346
	Chapter Summary .....	350
<b>Chapter 16</b>	<b><i>A Tcl Chat Room</i></b>	<b>353</b>
	Understanding Tcl Sockets .....	354
	<i>Creating the Server</i> .....	356
	<i>Accepting Client Connections</i> .....	358
	<i>Configuring the Client Connection</i> .....	359
	<i>Establishing the Callback Procedure</i> .....	359
	<i>Servicing the Client Connection</i> .....	360
	<i>The Client</i> .....	361
	Putting Your Clients on the Web .....	364
	<i>Examining the Tclet</i> .....	366
	Chapter Summary .....	372
<b>Appendix A</b>	<b><i>HTML Reference Guide</i></b>	<b>375</b>
	Basic HTML Page Layout .....	375
	Most Commonly Used HTML Code .....	378

Headings .....	382
Lists .....	383
<i>Dot Points (Unordered Lists)</i> .....	383
<i>Enumerated Lists (Ordered Lists)</i> .....	384
Tables .....	387
Forms .....	393

## Appendix B

### *Tcl Language Summary* 405

Working with Variables .....	405
How Tcl Evaluates Commands .....	406
<i>Comment Lines and Line Separators</i> .....	407
<i>Variable Substitution</i> .....	408
<i>Command Substitution</i> .....	408
<i>Backslash Substitution</i> .....	409
<i>Grouping with Quotes</i> .....	410
<i>Grouping with Braces</i> .....	410
<i>Return Values in Tcl</i> .....	411
String Manipulation .....	411
Tcl Lists .....	414
<i>Creating Lists: list, lappend, concat</i> .....	414
<i>Querying Lists: llength, lindex, lsearch</i> .....	415
<i>Manipulating Lists: linsert, lreplace, lsort</i> .....	416
Tcl Arrays .....	419
<i>Multidimensional Arrays</i> .....	419
<i>The array Command</i> .....	420
<i>Getting Array Info: array exists, array names, array size</i> .....	420
<i>Searching Arrays:</i> .....	421
<i>Converting Arrays to Lists: array get</i> .....	421
<i>Converting Lists to Arrays: array set</i> .....	422
Pattern Matching .....	422
Control Flow Commands .....	427
<i>Conditional Statements</i> .....	427
<i>Looping: for, foreach, while</i> .....	429
File Access Commands .....	431
<i>Opening and Closing Files: open, close</i> .....	431
<i>Command Pipelines</i> .....	433
<i>Connecting to Serial Devices</i> .....	433
<i>Interfacing to the File System</i> .....	434
<i>File I/O: puts, gets</i> .....	436
Procedures .....	437

	<i>The return Command</i> .....	437
	<i>Forcing Errors with the return Command</i> .....	438
	<i>Catching Errors with the catch Command</i> .....	440
	<i>Default Argument Values in Procedures</i> .....	440
	<i>Passing Variable Number of Arguments to Procedures</i> ..	441
	<i>Passing by Reference with the upvar Command</i> .....	441
	Network Communication .....	442
	Querying Tcl Internals .....	447
	Organizing Your Code .....	449
	<i>The source Command</i> .....	450
	<i>The package Command</i> .....	450
	Namespaces .....	453
<b>Appendix C</b>	<b><i>cgi.tcl Reference</i></b>	<b>459</b>
	Procedure Summary .....	460
	Understanding the cgi.tcl Output .....	462
	Library Call Reference .....	464
<b>Appendix D</b>	<b><i>The Web Browser Plug-In</i></b>	<b>487</b>
	Overview .....	487
	<i>Obtaining and Installing the Plug-In</i> .....	487
	<i>Plug-In Configuration Files</i> .....	488
	<i>Making It Safe</i> .....	489
	<i>The Safe Interpreter</i> .....	491
	<i>The Plug-In Security Model</i> .....	493
	Plug-In Features .....	494
	<i>Browser Namespaces</i> .....	494
	<i>The Network Feature</i> .....	495
	<i>The Persist Feature</i> .....	496
	<i>The Stream Feature</i> .....	497
	<i>The Unsafe Feature</i> .....	499
	<i>The URL Feature</i> .....	499
	Security Policies .....	501
	<i>Understanding the Configuration File Format</i> .....	502
	<i>Examining the home Policy</i> .....	507
	Understanding the Risks .....	510
	<i>Integrity Risks</i> .....	510
	<i>Privacy Risks</i> .....	511

*Loss of Reputation* ..... 511

*Annoyance and Resource Attacks* ..... 511

**The Plug-In Logging Facility** ..... 512

**The Plug-In Console** ..... 515

***Bibliography* 517**

***Index* 519**
