PREFACE.....	xvii
ABOUT LECTURE NOTES CD.....	xxi
LIST OF ABBREVIATIONS.....	xxiv
<i>Mid-2011</i> CHAPTER 1: INTRODUCTION	1
Characteristics of Computers	2
Evolution of Computers	3
Computer Generations	5
First Generation (1942-1955)	5
Second Generation (1955-1964)	6
Third Generation (1964-1975)	7
Fourth Generation (1975-1989)	9
Fifth Generation (1989-Present)	10
Points to Remember	12
Questions	14
<i>Mid Sem-2011</i> CHAPTER 2: BASIC COMPUTER ORGANIZATION.....	15
Input Unit	16
Output Unit.....	16
Storage Unit.....	17
Arithmetic Logic Unit.....	18
Control Unit	18
Central Processing Unit.....	18
The System Concept	18
Points to Remember	19
Questions	19
CHAPTER 3: NUMBER SYSTEMS	20
Non-Positional Number Systems.....	20
Positional Number Systems	20

Binary Number System	21
Octal Number System	22
Hexadecimal Number System	22
Converting from One Number System to Another	22
Converting from Another Base to Decimal	23
Converting from Decimal to Another Base (Division-Remainder Technique)	23
Converting from a Base Other Than 10 to Another Base Other Than 10	25
Shortcut Method for Binary to Octal Conversion	27
Shortcut Method for Octal to Binary Conversion	29
Shortcut Method for Binary to Hexadecimal Conversion	30
Shortcut Method for Hexadecimal to Binary Conversion	30
Fractional Numbers	31
Points to Remember	33
Questions	34
CHAPTER 4: COMPUTER CODES	36
BCD Code	36
EBCDIC	36
Zoned and Packed Decimal Numbers	38
ASCII	39
Unicode	40
Need for Unicode?	44
Unicode Features	44
Unicode Encoding Forms	44
Collating Sequence	45
Points to Remember	47
Questions	47
CHAPTER 5: COMPUTER ARITHMETIC	49
Why Binary?	49
Binary Arithmetic	50
Addition	50
Subtraction	51
Multiplication	55
Division	56
Points to Remember	58
Questions	59
CHAPTER 6: BOOLEAN ALGEBRA AND LOGIC CIRCUITS	60
Boolean Algebra	60
Fundamental Concepts of Boolean Algebra	60
Postulates of Boolean Algebra	62
The Principle of Duality	63
Theorems of Boolean Algebra	63

Boolean Functions	67
Minimization of Boolean Functions	67
Complement of a Function	68
Canonical Forms of Boolean Functions	70
Conversion Between Canonical Forms	71
Logic Gates	76
AND Gate	77
OR Gate	77
NOT Gate	77
NAND Gate	78
NOR Gate	79
Logic Circuits	79
Converting Expressions to Logic Circuits	80
The Universal NAND Gate	83
The Universal NOR Gate	84
Exclusive-OR and Equivalence Functions	89
Design of Combinational Circuits	91
Design of Half-Adder	93
Design of Full-Adder	93
A Parallel Binary Adder	94
Points to Remember	96
Questions	97
CHAPTER 7: PROCESSOR AND MEMORY	101
Central Processing Unit (CPU)	101
Control Unit (CU)	101
Arithmetic Logic Unit (ALU)	103
Instruction Set	103
Registers	103
Processor Speed	105
Types of Processors	105
Main Memory	108
Storage Evaluation Criteria	108
Main Memory Organization	109
Main Memory Capacity	111
RAM, ROM, PROM and EPROM	112
Cache Memory	113
Points to Remember	114
Questions	115
CHAPTER 8: SECONDARY STORAGE DEVICES	117
Sequential and Direct-Access Devices	118
Magnetic Tape	119
Basic Principles of Operation	119
Types of Magnetic Tapes	121
Advantages and Limitations of Magnetic Tapes	123

Uses of Magnetic Tapes 124

Magnetic Disk 124

 Basic Principles of Operation 124

 Types of Magnetic Disks 125

 Advantages and Limitations of Magnetic Disks 130

 Uses of Magnetic Disks 133

Optical Disk 134

 Basic Principles of Operation 134

 Types of Optical Disks 135

 Advantages and Limitations of Optical Disks 137

 Uses of Optical Disks 139

Memory Storage Devices 140

 Flash Drive (Pen Drive) 140

 Memory Card (SD/MMC) 140

Mass Storage Devices 141

 Disk Array 142

 Automated Tape Library 142

 CD-ROM Jukebox 142

Storage Hierarchy 143

Points to Remember 144

Questions 145

Handwritten: 7/17/2011

CHAPTER 9: INPUT-OUTPUT DEVICES 148

Input Devices 149

 Keyboard Devices 149

 Point-and-Draw Devices 149

 Data Scanning Devices 153

 Digitizer 157

 Electronic-card Reader 158

 Speech Recognition Devices 158

 Vision-Input System 159

Output Devices 159

 Monitors 160

 Printers 160

 Plotters 165

 Screen Image Projector 166

 Voice Response Systems 167

Points to Remember 168

Questions 169

Handwritten: 2/6/11

CHAPTER 10: COMPUTER SOFTWARE 172

What is software? 172

Relationship between Hardware and Software 173

Types of Software 173

 System Software 173

 Application Software 174

Logical System Architecture 175

Acquiring Software 176

Buying Pre-written Software 176

Ordering Customized Software 176

Developing Customized Software 177

Downloading Public-domain Software 178

Software Development Steps 178

Firmware 179

Middleware 179

Points to Remember 181

Questions 181

CHAPTER 11: PLANNING THE COMPUTER PROGRAM 183

Purpose of Program Planning 183

Algorithm 184

What is an Algorithm? 184

Sample Algorithms 184

Representation of Algorithms 185

Flowcharts 186

What is a Flowchart? 186

Why Use Flowcharts? 186

Flowchart Symbols 186

Sample Flowcharts 188

Levels of Flowcharts 196

Flowcharting Rules 196

Advantages and Limitations of Flowcharts 197

Pseudocode 198

What is Pseudocode? 198

Pseudocodes for Basic Logic (Control) Structures 199

Sample Pseudocode 203

Advantages and Limitations of Pseudocode 204

Points to Remember 204

Questions 205

CHAPTER 12: COMPUTER LANGUAGES 208

Analogy with Natural Languages 208

Machine Language 209

Advantages and Limitations of Machine Language 210

Assembly Language 211

Assembler 212

Advantages of Assembly Language over Machine Language 214

Limitations of Assembly Language 215

Assembly Languages with Macro Instructions 215

High-level Language 216

Compiler 217

Linker 219

Interpreter	220
Intermediate Language Compiler and Interpreter	221
Advantages and Limitations of High-level Languages	222
Object-Oriented Programming Languages	223
Some High-level Languages	223
FORTRAN	223
COBOL	224
BASIC	227
Pascal	228
C and C++	229
Some More High-level Languages	231
Java	231
C#	232
RPG	232
LISP	232
SNOBOL	233
Characteristics of a Good Programming Language	233
Selecting a Language for Coding an Application	234
Subprogram	235
Points to Remember	236
Questions	237
CHAPTER 13: SYSTEM IMPLEMENTATION AND OPERATION	239
Testing and Debugging	239
Definition of Testing and Debugging	239
Types of Program Errors	240
Testing a Program	240
Debugging a Program for Syntax Errors	241
Debugging a Program for Logic Errors	241
Difference between Testing and Debugging	242
Documentation	243
What is Documentation?	243
Need for Documentation	243
Forms of Documentation	243
Changeover to the New System	245
Changeover Operations	245
Changeover Methods	245
System Evaluation	248
System Maintenance	248
Points to Remember	249
Questions	249
CHAPTER 14: OPERATING SYSTEMS	251
What is an Operating System?	251
Main Functions of an Operating System	252
Measuring System Performance	253

Process Management 253

Process Management in Early Systems 253

Multiprogramming 255

Multitasking 258

Multithreading 258

Multiprocessing 259

Time-sharing 261

Memory Management 262

Uniprogramming Memory Model 262

Multiprogramming Memory Models 263

Virtual Memory 265

File Management 266

File Access Methods 267

File Operations 267

File Naming 268

Security 269

Command Interpretation 269

OS Capability Enhancement Software 270

Translating Programs 270

Library Programs 270

Utility Programs 271

Some Popular Operating Systems 272

UNIX 272

MS-DOS 272

Microsoft Windows 272

Microsoft Windows NT 273

Linux 273

Points to Remember 274

Questions 275

CHAPTER 15: APPLICATION SOFTWARE PACKAGES 278

Word-Processing Package 278

What it is? 278

Commonly Supported Features 279

Spreadsheet Package 285

What it is? 285

Commonly Supported Features 286

Graphics Package 289

What it is? 289

Commonly Supported Features 289

Personal Assistance Package 291

What it is? 291

Commonly Supported Features 291

Points to Remember 292

Questions 293

CHAPTER 16: BUSINESS DATA PROCESSING.....	295
What is Data Processing?.....	295
Data Storage Hierarchy.....	296
Standard Methods of Organizing Data.....	297
<i>File-oriented Approach</i>	297
<i>Database-oriented Approach</i>	298
File Management System.....	299
File Types.....	299
File Organizations.....	299
File Utilities.....	303
Database Management System.....	305
Database Models.....	305
Main Components of a DBMS.....	310
Creating and Using a Database.....	312
Points to Remember.....	317
Questions.....	318
 CHAPTER 17: DATA COMMUNICATIONS AND COMPUTER NETWORKS.....	 320
Basic Elements of a Communication System.....	321
Data Transmission Modes.....	321
Data Transmission Speed.....	322
Data Transmission Media.....	323
<i>Twisted-Pair Wire</i>	323
<i>Coaxial Cable</i>	323
<i>Microwave System</i>	324
<i>Communications Satellite</i>	324
<i>Optical Fibers</i>	326
Digital and Analog Data Transmission.....	327
<i>Modulation Techniques</i>	328
Modems.....	328
<i>Analog versus Digital Transmission</i>	329
Data Transmission Services.....	330
Multiplexing Techniques.....	331
Asynchronous and Synchronous Transmission.....	333
<i>Asynchronous Transmission</i>	333
<i>Synchronous Transmission</i>	333
Switching Techniques.....	334
<i>Circuit Switching</i>	334
<i>Message Switching</i>	336
<i>Packet Switching</i>	337
Routing Techniques.....	338
Network Topologies.....	338
Star Network.....	339
Ring Network.....	339
Completely Connected Network.....	340
Multi-access Bus Network.....	340
Hybrid Network.....	341
Network Types (LAN, WAN, and MAN).....	341

Communication Protocols	343
<i>Roles of a Communication Protocol</i>	343
<i>Concept of Layered Protocols in Network Design</i>	344
<i>Network Interface Cards</i>	344
<i>The OSI Model</i>	344
<i>Example of Message Transfer in the OSI Model</i>	347
Internetworking Tools	348
Wireless Networks	349
<i>Types of Wireless Computing Systems</i>	349
<i>Issues in Wireless Computing Systems</i>	350
<i>Wireless Applications</i>	351
<i>Wireless Technologies</i>	351
Distributed Computing Systems	352
Points to Remember	354
Questions	355
CHAPTER 18: THE INTERNET.....	358
Definition (What it is?)	358
Brief History.....	358
Its Basic Services.....	358
<i>Electronic Mail</i>	359
<i>File Transfer Protocol</i>	359
<i>Telnet</i>	360
<i>Usenet News</i>	360
<i>The World Wide Web</i>	361
WWW Browsers.....	362
Uses of the Internet	363
Points to Remember	364
Questions	364
CHAPTER 19: MULTIMEDIA	366
What is Multimedia?	366
What is a Multimedia Computer System?.....	367
Multimedia Components.....	367
<i>Text</i>	367
<i>Graphics</i>	368
<i>Animation</i>	371
<i>Audio</i>	372
<i>Video</i>	374
Multimedia Applications	375
Media Center Computer	376
<i>Media Center PC Features and Functionalities</i>	377
Points to Remember	378
Questions	379

CHAPTER 20: CLASSIFICATION OF COMPUTERS 381

- Notebook Computers (laptops) 381
- Personal Computers (PCs) 382
- Workstations 384
- Mainframe Systems 384
- Supercomputers 386
- Client and Server Computers 388
- Handheld Computers 389
- Tablet PC* 389
- PDA/Pocket PC* 390
- Smartphone* 390
- Points to Remember 391
- Questions 393

CHAPTER 21: INTRODUCTION TO C PROGRAMMING LANGUAGE 395

- Introduction 395
- Character Set, Constants, Variables, Keywords, and Comments 396
- Character Set* 396
- Constants* 396
- Variables* 398
- Keywords* 400
- Comments* 400
- Operators 400
- Statements 403
- Performing Simple I/O Operations in C 403
- Preprocessor Directives 405
- Pointers, Arrays, and Strings 407
- Pointers* 407
- Arrays* 408
- Strings* 410
- User Defined Data Types 411
- Structure* 411
- Union* 412
- Control Structures 413
- Loop Structures 415
- Functions 416
- Sample Programs 418
- Points to Remember 421
- Questions 423

GLOSSARY 425
