Preface to the Adapted Sixth Edition

Preface to the Fourth Edition

xxi

xxvii

1. Introduction to Communication Systems

Learning Objectives 1

1.1 Introduction to Communication 1

Learning Review for LO 1 2

1.2 Elements of a Communication System 3

1.2.1 Information Source 3

1.2.2 Transmitter 4

1.2.3 Channel 5

1.2.4 Receiver 6

1.2.5 Destination 7

Learning Review for LO 2 7

1.3 Need for Modulation 7

Learning Review for LO 3 9

1.4 Electromagnetic Spectrum and Typical Applications 9

1.5 Terminologies in Communication Systems 10

Learning Review for LO 4 10

1.6 Some Communication Systems 11

1.6.1 Telephone Communication System 11

1.6.2 Mobile Communication 11

1.6.3 Radio Broadcasting 11

1.6.4 Television Broadcasting 11

1.6.5 Computer Communications 12

1.7 Classification of Communication Systems 12

1.7.1 Analog vs Digital Communication 12

1.7.2 Point-to-point vs Broadcast Communication 12

1.7.3 Baseband vs Passband Communication 13

1.7.4 Message vs Data 13

Summary 13

Multiple-Choice Questions 14

Review Problems 15

2. Noise

Learning Objectives 16

2.1 Introduction 16

2.2 External Noise 17

16

2.2.1	Atmospheric Noise	17
2.2.2	Extraterrestrial Noise	17
2.2.3	Industrial Noise	18
2.3	Internal Noise	18
2.3.1	Thermal Agitation Noise	18
2.3.2	Shot Noise	20
2.3.3	Transit-Time Noise	21
	<i>Learning Review for LO 1</i>	21
2.4	Noise Calculations	22
2.4.1	Addition of Noise due to Several Sources	22
2.4.2	Addition of Noise due to Several Amplifiers in Cascade	23
2.4.3	Noise in Reactive Circuits	24
	<i>Learning Review for LO 2</i>	26
2.5	Noise Figure	26
2.5.1	Signal-to-Noise Ratio	26
2.5.2	Definition of Noise Figure	26
2.5.3	Calculation of Noise Figure	27
2.5.4	Noise Figure from Equivalent Noise Resistance	29
	<i>Learning Review for LO 3</i>	30
2.6	Noise Temperature	31
	<i>Learning Review for LO 4</i>	32
	<i>Summary</i>	32
	<i>Multiple-Choice Questions</i>	33
	<i>Review Problems</i>	34
3.	Amplitude Modulation Techniques	
	<i>Learning Objectives</i>	36
3.1	Elements of Analog Communication	37
	<i>Learning Review for LO 1</i>	37
3.2	Theory of Amplitude Modulation Techniques	37
3.2.1	Amplitude Modulation (AM) Technique	37
3.2.2	Double Sideband Suppressed Carrier (DSBSC) Technique	46
3.2.3	Single Sideband (SSB) Technique	49
3.2.4	Vestigial Sideband (VSB) Modulation Technique	53
	<i>Learning Review for LO 2</i>	56
3.3	Generation of Amplitude Modulated Signals	57
3.3.1	Generation of AM Signal	57
3.3.2	Generation of DSBSC Signal	59
3.3.3	Generation of SSB Signal	61
3.3.4	Generation of VSB Signal	64
	<i>Learning Review for LO 3</i>	65
	<i>Summary</i>	65
	<i>Multiple-Choice Questions</i>	66
	<i>Review Problems</i>	69

4. Angle Modulation Techniques	70
<i>Learning Objectives</i>	70
4.1 Theory of Angle Modulation Techniques	71
4.1.1 Frequency Modulation	71
4.1.2 Phase Modulation	76
4.1.3 Comparison of Frequency and Phase Modulation	79
<i>Learning Review for LO 1</i>	80
4.2 Practical Issues in Frequency Modulation	81
4.2.1 Frequency Spectrum of the FM Wave	81
4.2.2 Narrowband and Wideband FM	86
4.2.3 Noise and Frequency Modulation	86
4.2.4 Pre-emphasis and De-emphasis	89
4.2.5 Stereophonic FM Multiplex System	90
4.2.6 Comparison of FM and AM	92
<i>Learning Review for LO 2</i>	92
4.3 Generation of Frequency Modulation	93
4.3.1 FM Methods	93
4.3.2 Direct Methods	94
4.3.3 Stabilized Reactance Modulator—AFC	100
4.3.4 Indirect Method	102
<i>Learning Review for LO 3</i>	104
<i>Summary</i>	104
<i>Multiple-Choice Questions</i>	105
<i>Review Problems</i>	109
5. Pulse Modulation Techniques	110
<i>Learning Objectives</i>	110
5.1 Introduction	110
5.2 Pulse Analog Modulation Techniques	111
5.2.1 Pulse Amplitude Modulation (PAM)	111
5.2.2 Pulse Width Modulation	115
5.2.3 Pulse Position Modulation	116
5.2.4 Demodulation of Pulse Analog Modulated Signals	117
<i>Learning Review for LO 2</i>	118
5.3 Pulse Digital Modulation Techniques	118
5.3.1 Pulse Code Modulation	118
5.3.2 Delta Modulation	121
5.3.3 Differential Pulse Code Modulation	121
5.3.4 Demodulation of Pulse Digital Modulated Signals	122
<i>Learning Review for LO 3</i>	123
<i>Summary</i>	123
<i>Multiple-Choice Questions</i>	124
<i>Review Problems</i>	126
6. Digital Modulation Techniques	127
<i>Learning Objectives</i>	127
6.1 Introduction	127
<i>Learning Review for LO 1</i>	129

6.2	Basic Digital Modulation Schemes	129	
6.2.1	Amplitude Shift Keying (ASK)	129	
6.2.2	Frequency Shift Keying (FSK)	133	
6.2.3	Phase Shift Keying (PSK)	139	
	<i>Learning Review for LO 2</i>	143	
6.3	M-ary Digital Modulation Techniques	143	
6.3.1	M-ary PSK	144	
6.3.2	M-ary FSK	146	
6.3.3	M-ary QAM	149	
	<i>Learning Review for LO 3</i>	151	
6.4	Matched Filter	152	
	<i>Learning Review for LO 4</i>	152	
	<i>Summary</i>	153	
	<i>Multiple-Choice Questions</i>	154	
	<i>Review Problems</i>	156	
7.	Radio Transmitters and Receivers		
	<i>Learning Objectives</i>	157	157
7.1	Introduction to Radio Communication	158	
7.2	Radio Transmitters	159	
7.2.1	AM Transmitters	159	
7.2.2	SSB Transmitters	160	
7.2.3	FM Transmitters	163	
	<i>Learning Review for LO 1</i>	163	
7.3	Receiver Types	164	
7.3.1	Tuned Radio-Frequency (TRF) Receiver	164	
	<i>Learning Review for LO 2</i>	165	
7.4	Superheterodyne Receiver	165	
7.5	AM Receivers	167	
7.5.1	RF Section and Characteristics	167	
	<i>Learning Review for LO 3</i>	168	
7.6	Sensitivity	169	
7.6.1	Selectivity	170	
7.6.2	Image Frequency and its Rejection	170	
7.6.3	Frequency Changing and Tracking	173	
7.6.4	Intermediate Frequencies and IF Amplifiers	177	
	<i>Learning Review for LO 4</i>	179	
7.7	Detection and Automatic Gain Control (AGC)	180	
	<i>Learning Review for LO 5</i>	184	
7.8	FM Receivers	184	
7.8.1	Common Circuits—Comparison with AM Receivers	185	
7.8.2	Amplitude Limiting	186	
7.8.3	Basic FM Demodulators	188	
7.8.4	Ratio Detector	193	
7.8.5	FM Demodulator Comparison	194	
7.8.6	Stereo FM Multiplex Reception	194	

7.9 Single- and Independent-Sideband Receivers 195
 7.9.1 Demodulation of SSB 196
 7.9.2 Receiver Types 197
Learning Review for LO 6 199
Summary 200
Multiple-Choice Questions 201
Review Problems 204

8. Television Broadcasting

Learning Objectives 205
 8.1 Requirements and Standards 206
 8.1.1 Introduction to Television 206
 8.1.2 Television Systems and Standards 208
 8.2 Black-and-White Transmission 211
 8.2.1 Fundamentals 211
 8.2.2 Beam Scanning 213
 8.2.3 Blanking and Synchronizing Pulses 215
Learning Review for LO 1 219
 8.3 Black-and-White Reception 219
 8.3.1 Fundamentals 219
 8.3.2 Common, Video and Sound Circuits 219
Learning Review for LO 2 225
 8.4 Synchronizing Circuits 225
 8.4.1 Sync Separation (from Composite Waveform) 226
 8.4.2 Horizontal Sync Separation 227
 8.4.3 Vertical Sync Separation 227
Learning Review for LO 3 229
 8.5 Vertical Deflection Circuits 229
 8.5.1 Sawtooth Deflection Waveform 230
 8.5.2 Blocking Oscillator 230
 8.5.3 Vertical Oscillator 232
 8.5.4 Horizontal Deflection Circuits 233
Learning Review for LO 4 236
 8.6 Color Transmission and Reception 236
 8.6.1 Introduction 237
 8.6.2 Color Transmission 239
Learning Review for LO 5 242
 8.7 Color Reception 243
 8.7.1 Color Picture Tube and its Requirements 243
 8.7.2 Common Color TV Receiver Circuits 247
 8.7.3 Color Circuits 247
Learning Review for LO 6 250
Summary 250
Multiple-Choice Questions 251

9. Transmission Lines	
<i>Learning Objectives</i>	253
9.1 Basic Principles	253
9.1.1 Fundamentals of Transmission Lines	254
<i>Learning Review for LO 1</i>	255
9.2 Characteristic Impedance	255
9.2.1 Methods of Calculation	255
<i>Learning Review for LO 2</i>	258
9.3 Losses in Transmission Lines	259
9.3.1 Types of Losses	259
9.3.2 Velocity Factor	259
9.3.3 Standing Waves	260
<i>Learning Review for LO 3</i>	262
9.4 Quarter- and Half-Wavelength Lines	263
<i>Learning Review for LO 4</i>	266
9.5 Reactance Properties of Transmission Lines	266
9.5.1 Open- and Short-circuited Lines as Tuned Circuits	266
9.5.2 Properties of Lines of Various Lengths	266
<i>Learning Review for LO 5</i>	269
9.6 The Smith Chart and its Applications	269
9.6.1 Fundamentals of the Smith Chart	269
9.6.2 Problem Solution	272
<i>Learning Review for LO 6</i>	280
9.7 Transmission-Line Components	280
9.7.1 The Double Stub	280
9.7.2 Directional Couplers	281
9.7.3 Baluns	282
9.7.4 The Slotted Line	283
<i>Learning Review for LO 7</i>	283
<i>Summary</i>	284
<i>Multiple-Choice Questions</i>	285
<i>Review Problems</i>	287
10. Radiation and Propagation of Waves	
<i>Learning Objectives</i>	288
10.1 Electromagnetic Radiation	289
10.2 Fundamentals of Electromagnetic Waves	289
10.2.1 Waves in Free Space	290
10.2.2 Radiation and Reception	292
10.2.3 Polarization	292
10.2.4 Reception	293
10.2.5 Attenuation and Absorption	293
<i>Learning Review for LO 2</i>	294
10.3 Effects of the Environment	295
10.3.1 Reflection of Waves	295
10.3.2 Refraction	296

10.3.3	Interference of Electromagnetic Waves	298
10.3.4	Diffraction of Radio Waves	299
	<i>Learning Review for LO 3</i>	301
10.4	Propagation of Waves	302
10.4.1	Ground (Surface) Waves	302
	<i>Learning Review for LO 4</i>	304
10.5	Sky Waves	304
10.5.1	The Ionosphere and its Effects	305
10.5.2	Reflection Mechanism	306
	<i>Learning Review for LO 5</i>	306
10.6	Ionosphere and Sky-Wave	307
10.6.1	Terms and Definitions	307
	<i>Learning Review for LO 6</i>	311
10.7	Space Waves	311
10.7.1	Radio Horizon	311
10.7.2	General Considerations	312
10.7.3	Microwave Space-wave Propagation	312
	<i>Learning Review for LO 7</i>	313
10.8	Tropospheric Scatter Propagation	313
10.8.1	Practical Considerations	314
	<i>Learning Review for LO 8</i>	314
	<i>Summary</i>	314
	<i>Multiple-Choice Questions</i>	315
	<i>Review Problems</i>	317
11.	Antennas	318
	<i>Learning Objectives</i>	318
11.1	Basic Considerations	319
11.1.1	Electromagnetic Radiation	320
	<i>Learning Review for LO 1</i>	320
11.2	The Elementary Doublet (Hertzian Dipole)	321
	<i>Learning Review for LO 2</i>	321
11.3	Wire Radiator in Space	322
11.3.1	Current and Voltage Distribution	322
11.4	Resonant Antennas, Radiation Patterns, and Length Calculations	323
	<i>Learning Review for LO 4</i>	324
11.5	Nonresonant Antennas (Directional Antennas)	325
	<i>Learning Review for LO 5</i>	325
11.6	Terms and Definitions	326
11.6.1	Antenna Gain and Effective Radiated Power	326
11.6.2	Radiation Measurement and Field Intensity	327
11.6.3	Antenna Resistance	327
11.6.4	Bandwidth, Beamwidth, and Polarization	329
	<i>Learning Review for LO 6</i>	330
11.7	Effects of Ground on Antennas	331
11.7.1	Ungrounded Antennas	331

11.7.2	Grounded Antennas	331
11.7.3	Grounding Systems	332
	<i>Learning Review for LO 7</i>	333
11.8	Effects of Antenna Height	333
11.8.1	Top Loading	333
11.8.2	Optimum Length	334
11.8.3	Effective Length	335
	<i>Learning Review for LO 8</i>	335
11.9	Antenna Coupling at Medium Frequencies	335
11.9.1	General Considerations	335
11.9.2	Selection of Feed Point	336
11.9.3	Antenna Couplers	336
11.9.4	Impedance Matching with Stubs and Other Devices	337
	<i>Learning Review for LO 9</i>	338
11.10	Directional High-Frequency Antennas	338
11.10.1	Dipole Arrays	338
11.10.2	Folded Dipole and Applications	341
11.10.3	Nonresonant Antennas—The Rhombic	342
	<i>Learning Review for LO 10</i>	343
11.11	UHF and Microwave Antennas	343
11.11.1	Antennas with Parabolic Reflectors	344
11.11.2	Horn Antennas	349
11.11.3	Lens Antennas	352
	<i>Learning Review for LO 11</i>	353
11.12	Wideband and Special-Purpose Antennas	353
11.12.1	Folded Dipole (Bandwidth Compensation)	354
11.12.2	Helical Antenna	355
11.12.3	Discone Antenna	355
11.12.4	Log-Periodic Antennas	356
11.12.5	Loop Antennas	357
11.12.6	Phased Arrays	358
	<i>Learning Review for LO 12</i>	358
	<i>Summary</i>	359
	<i>Multiple-Choice Questions</i>	362
	<i>Review Problems</i>	364
12.	Waveguides, Resonators and Components	
	<i>Learning Objectives</i>	365
12.1	Rectangular Waveguides	366
12.2	Introduction of Waveguide	366
12.2.1	Reflection of Waves from a Conducting Plane	368
12.2.2	The Parallel-Plane Waveguide	372
	<i>Learning Review for LO 2</i>	373
12.3	Cutoff Wavelength	373
	<i>Learning Review for LO 3</i>	378
12.4	Rectangular Waveguides	379
	<i>Learning Review for LO 4</i>	385

12.5	Circular and Other Waveguides	386	
	12.5.1 Circular Waveguides	386	
	12.5.2 Other Waveguides	389	
	<i>Learning Review for LO 5</i>	390	
12.6	Waveguide Coupling, Matching and Attenuation	390	
	12.6.1 Methods of Exciting Waveguides	390	
	12.6.2 Waveguide Couplings	393	
	12.6.3 Basic Accessories	394	
	12.6.4 Multiple Junctions	396	
	12.6.5 Impedance Matching and Tuning	399	
	<i>Learning Review for LO 6</i>	402	
12.7	Attenuation in Waveguides	402	
	<i>Learning Review for LO 7</i>	404	
12.8	Cavity Resonators	404	
	12.8.1 Fundamentals	404	
	12.8.2 Practical Considerations	406	
	<i>Learning Review for LO 8</i>	408	
12.9	Auxiliary Components	408	
	12.9.1 Directional Couplers	408	
	12.9.2 Isolators and Circulators	409	
	12.9.3 Mixers, Detectors and Detector Mounts	414	
	12.9.4 Switches	416	
	<i>Learning Review for LO 9</i>	419	
	<i>Summary</i>	420	
	<i>Multiple-Choice Questions</i>	422	
	<i>Review Problems</i>	425	
13.	Microwave Tubes and Circuits		426
	<i>Learning Objectives</i>	426	
13.1	Limitations of Conventional Electronic Devices	427	
	<i>Learning Review for LO 1</i>	427	
13.2	Multicavity Klystron	427	
	13.2.1 Operation	428	
	13.2.2 Practical Considerations	429	
	<i>Learning Review for LO 2</i>	429	
13.3	Multicavity Klystron Amplifier	430	
	<i>Learning Review for LO 3</i>	432	
13.4	Reflex Klystron	432	
	13.4.1 Fundamentals	433	
	13.4.2 Practical Considerations	434	
	<i>Learning Review for LO 4</i>	435	
13.5	Magnetron	435	
	13.5.1 Operation	436	
	13.5.2 Practical Considerations	438	
	13.5.3 Types, Performance and Applications	440	
	<i>Learning Review for LO 5</i>	442	

13.6	Traveling-Wave Tube (TWT)	442
13.6.1	TWT Fundamentals	442
13.6.2	Practical Considerations	444
13.6.3	Types, Performance and Applications	445
	<i>Learning Review for LO 6</i>	448
13.7	Other Microwave Tubes	449
13.7.1	Crossed-Field Amplifier	449
13.7.2	Backward-Wave Oscillator	450
	<i>Learning Review for LO 7</i>	451
	<i>Summary</i>	451
	<i>Multiple-Choice Questions</i>	453
	<i>Review Problems</i>	454
14.	Semiconductor Microwave Devices and Circuits	
	<i>Learning Objectives</i>	455
14.1	Passive Microwave Circuits	456
14.1.1	Stripline and Microstrip Circuits	456
14.1.2	SAW Devices	457
	<i>Learning Review for LO 1</i>	458
14.2	Transistors and Integrated Circuits	459
14.2.1	High-Frequency Limitations	459
14.2.2	Microwave Transistors and Integrated Circuits	460
14.2.3	Microwave Integrated Circuits	461
14.2.4	Performance and Applications of Microwave Transistors and MICs	462
	<i>Learning Review for LO 2</i>	463
14.3	Varactor and Step-Recovery Diodes and Multipliers	464
14.3.1	Varactor Diodes	464
14.3.2	Step-Recovery Diodes	466
14.3.3	Frequency Multipliers	467
	<i>Learning Review for LO 3</i>	468
14.4	Parametric Amplifiers	468
14.4.1	Basic Principles	468
14.4.2	Amplifier Circuits	471
	<i>Learning Review for LO 4</i>	474
14.5	Tunnel Diodes and Negative-Resistance Amplifiers	475
14.5.1	Principles of Tunnel Diodes	475
14.5.2	Negative-Resistance Amplifiers	479
14.5.3	Tunnel-Diode Applications	481
	<i>Learning Review for LO 5</i>	482
14.6	Gunn Effect and Diodes	482
14.6.1	Gunn Effect	482
14.6.2	Gunn Diodes and Applications	485
	<i>Learning Review for LO 6</i>	487
14.7	Avalanche Effects and Diodes	487
14.7.1	IMPATT Diodes	488

14.7.2	TRAPATT Diodes	491
14.7.3	Performance and Applications of Avalanche Diodes	492
	<i>Learning Review for LO 7</i>	493
14.8	Other Microwave Diodes	494
14.8.1	PIN Diodes	494
14.8.2	Schottky-Barrier Diode	495
14.8.3	Backward Diodes	496
	<i>Learning Review for LO 8</i>	497
14.9	Stimulated-Emission (Quantum-Mechanical) and Associated Devices	497
14.9.1	Fundamentals of Masers	497
14.9.2	Practical Masers and their Applications	500
14.9.3	Fundamental of Lasers	501
14.9.4	CW Lasers and their Communications Applications	503
14.9.5	Other Optoelectronic Devices	505
	<i>Learning Review for LO 9</i>	507
	<i>Summary</i>	508
	<i>Multiple-Choice Questions</i>	510
	<i>Review Problems</i>	514
15.	Radar Systems	515
	<i>Learning Objectives</i>	515
15.1	Basic Principles	515
15.1.1	Fundamentals	516
15.1.2	Radar Performance Factors	519
	<i>Learning Review for LO 1</i>	524
15.2	Pulsed Systems	524
15.2.1	Basic Pulsed Radar System	524
15.2.2	Antennas and Scanning	528
15.2.3	Display Methods	530
15.2.4	Pulsed Radar Systems	532
	<i>Learning Review for LO 2</i>	534
15.3	Moving-Target Indication (MTI)	535
	<i>Learning Review for LO 3</i>	539
15.4	Radar Beacons	539
15.5	Other Radar Systems	541
15.5.1	CW Doppler Radar	542
15.5.2	Frequency-Modulated CW Radar	544
15.5.3	Phased Array Radars	545
15.5.4	Planar Array Radars	548
	<i>Learning Review for LO 4</i>	549
	<i>Summary</i>	549
	<i>Multiple-Choice Questions</i>	550
	<i>Review Problems</i>	552

16. Broadband Communication Systems*Learning Objectives* 553

16.1 Multiplexing 554

16.1.1 Frequency-Division Multiplexing 554

16.1.2 Time-Division Multiplexing 557

Learning Review for LO 1 560

16.2 Short- and Medium-Haul Systems 560

16.2.1 Coaxial Cables 561

16.2.2 Fiber-Optic Links 563

16.2.3 Microwave Links 563

16.2.4 Tropospheric Scatter Links 566

Learning Review for LO 2 566

16.3 Long-Haul Systems 567

16.3.1 Submarine Cables 568

16.3.2 Satellite Communication 572

Learning Review for LO 3 580

16.4 Elements of Long-Distance Telephony 581

16.4.1 Routing Codes and Signaling Systems 581

16.4.2 Telephone Exchanges (Switches) and Routing 582

16.4.3 Miscellaneous Practical Aspects 582

16.4.4 Introduction to Traffic Engineering 583

Learning Review for LO 4 584*Summary* 584*Multiple-Choice Questions* 585*Review Problems* 587**17. Introduction to Fiber Optic Technology***Learning Objectives* 588

17.1 History of Fiber Optics 588

17.2 Why Optical Fibers? 589

17.3 Introduction to Light 590

17.3.1 Reflection and Refraction 590

17.3.2 Dispersion, Diffraction, Absorption, and Scattering 592

17.4 The Optical Fiber and Fiber Cables 597

17.4.1 Fiber Characteristics and Classification 600

17.4.2 Fiber Losses 603

17.5 Fiber Optic Components and Systems 604

17.5.1 The Source 604

17.5.2 Noise 604

17.5.3 Response Time 605

17.5.4 The Optical Link 606

17.5.5 Light Wave 608

17.5.6 The System 609

17.6 Installation, Testing, and Repair 612

17.6.1 Splices 612

17.6.2 Fiber Optic Testing 615

17.7	Power Budgeting	617	
17.7.1	Passive Components	617	
17.7.2	Receivers	618	
	<i>Summary</i>	620	
	<i>Multiple-Choice Questions</i>	620	
	<i>Review Problems</i>	622	
18.	Information Theory, Coding and Data Communication		623
	<i>Learning Objectives</i>	623	
18.1	Information Theory	624	
18.1.1	Information in a Communication System	624	
	<i>Learning Review for LO 1</i>	629	
18.2	Coding	629	
	<i>Learning Review for LO 2</i>	634	
18.3	Noise in an Information-Carrying Channel	634	
	<i>Learning Review for LO 3</i>	637	
18.4	Error Detection and Correction	637	
	<i>Learning Review for LO 4</i>	643	
18.5	Fundamentals of Data Communication System	643	
18.5.1	The Emergence of Data Communication System	643	
18.5.2	Characteristics of Data Transmission Circuits	645	
	<i>Learning Review for LO 5</i>	649	
18.6	Data Sets and Interconnection Requirements	650	
18.6.1	Modem Classification	650	
18.6.2	Modem Interfacing	651	
18.6.3	Interconnection of Data Circuits to Telephone Loops	654	
	<i>Learning Review for LO 6</i>	655	
18.7	Network and control considerations	655	
18.7.1	Network Organization	655	
18.7.2	Switching Systems	657	
18.7.3	Network Protocols	658	
	<i>Learning Review for LO 7</i>	659	
	<i>Summary</i>	660
