<i>Preface to the Fourth Edition</i>	<i>xiii</i>	<i>Open-Book Exam Questions</i>	<i>1.43</i>
<i>Preface to the First Edition</i>	<i>xix</i>	<i>Multiple-Choice Questions</i>	<i>1.43</i>
<b>1. Electron Ballistics and Applications</b>	<b>1.1–1.44</b>	<b>2. Energy Levels and Energy Bands</b>	<b>2.1–2.22</b>
<i>Learning Objectives</i>	<i>1.1</i>	<i>Learning Objectives</i>	<i>2.1</i>
1.1 Charged Particles	1.1	2.1 The Nature of the Atom	2.1
1.2 The Force on Charged Particles in an Electric Field	1.2	2.2 Atomic Energy Levels	2.4
1.3 Constant Electric Field	1.3	2.3 The Photon Nature of Light	2.5
1.4 Potential	1.5	2.4 Ionization	2.6
1.5 The eV Unit of Energy	1.6	2.5 Collisions of Electrons with Atoms	2.6
1.6 Relationship between Field Intensity and Potential	1.7	2.6 Collisions of Photons with Atoms	2.7
1.7 Two-dimensional Motion	1.7	2.7 Metastable States	2.8
1.8 Electrostatic Deflection in a Cathode-Ray Tube	1.11	<i>Problems Linked to LO 1</i>	<i>2.9</i>
1.9 The Cathode-Ray Oscilloscope	1.14	<i>Checkpoints</i>	<i>2.10</i>
1.10 Relativistic Variation of Mass with Velocity	1.15	2.8 Wave Properties of Matter	2.11
<i>Problems Linked to LO 1</i>	<i>1.17</i>	2.9 Electronic Structure of the Elements	2.14
<i>Checkpoints</i>	<i>1.19</i>	<i>Problems Linked to LO 2</i>	<i>2.16</i>
1.11 Force in a Magnetic Field	1.19	<i>Checkpoints</i>	<i>2.17</i>
1.12 Current Density	1.20	2.10 The Energy-band Theory of Crystals	2.17
1.13 Motion in a Magnetic Field	1.21	2.11 Insulators, Semiconductors, and Metals	2.19
1.14 Magnetic Deflection in a Cathode-Ray Tube	1.23	<i>Checkpoints</i>	<i>2.20</i>
1.15 Magnetic Focusing	1.25	<i>References</i>	<i>2.20</i>
<i>Problems Linked to LO 2</i>	<i>1.27</i>	<i>Open-Book Exam Questions</i>	<i>2.21</i>
<i>Checkpoints</i>	<i>1.29</i>	<i>Multiple-Choice Questions</i>	<i>2.21</i>
1.16 Parallel Electric and Magnetic Fields	1.30	<b>3. Conduction in Metals</b>	<b>3.1–3.28</b>
<i>Problems Linked to LO 3</i>	<i>1.31</i>	<i>Learning Objectives</i>	<i>3.1</i>
1.17 Perpendicular Electric and Magnetic Fields	1.32	3.1 Mobility and Conductivity	3.1
<i>Problems Linked to LO 4</i>	<i>1.36</i>	3.2 The Energy Method of Analyzing the Motion of a Particle	3.4
<i>Checkpoints</i>	<i>1.39</i>	3.3 The Potential-energy Field in a Metal	3.6
1.18 The Cyclotron	1.39	<i>Problems Linked to LO 1</i>	<i>3.8</i>
<i>Problems Linked to LO 5</i>	<i>1.41</i>	<i>Checkpoints</i>	<i>3.9</i>
<i>Checkpoints</i>	<i>1.42</i>	3.4 Bound and Free Electrons	3.9
<i>References</i>	<i>1.42</i>	<i>Problems Linked to LO 2</i>	<i>3.10</i>
		<i>Checkpoints</i>	<i>3.11</i>
		3.5 Energy Distribution of Electrons	3.11
		3.6 The Density of States	3.14
		3.7 Work Function	3.17
		<i>Problems Linked to LO 3</i>	<i>3.18</i>

	<i>Checkpoints</i>	3.18	5.5	Quantitative Theory of the $p$ - $n$ Diode Currents	
3.8	Thermionic Emission	3.19	5.6	The Volt-Ampere Characteristic	5.10
3.9	Contact Potential	3.20	5.7	The Temperature Dependence of $p$ - $n$ Characteristics	5.16
3.10	Energies of Emitted Electrons	3.21		<i>Problems Linked to LO 2</i>	
3.11	Accelerating Fields	3.22		<i>Checkpoints</i>	5.18
3.12	High-field Emission	3.23	5.8	Diode Resistance	5.20
3.13	Secondary Emission	3.24	5.9	Space-Charge, or Transition, Capacitance $C_T$	5.21
	<i>Problems Linked to LO 4</i>	3.24	5.10	Diffusion Capacitance	5.23
	<i>Checkpoints</i>	3.25	5.11	$p$ - $n$ Diode Switching Times	5.30
	<i>References</i>	3.26		<i>Problems Linked to LO 3</i>	5.34
	<i>Open-Book Exam Questions</i>	3.26		<i>Checkpoints</i>	5.37
	<i>Multiple-Choice Questions</i>	3.26	5.12	Breakdown Diodes	5.39
<b>4. Conduction in Semiconductors</b>	<b>4.1–4.32</b>		5.13	The Tunnel Diode	5.39
	<i>Learning Objectives</i>	4.1	5.14	Characteristics of a Tunnel Diode	5.46
4.1	Electrons and Holes in an Intrinsic Semiconductor	4.1		<i>Problems Linked to LO 4</i>	5.52
4.2	Conductivity of a Semiconductor	4.3		<i>Checkpoints</i>	5.53
	<i>Problem Linked to LO 1</i>	4.5	5.15	The $p$ - $i$ - $n$ Diode	5.55
	<i>Checkpoints</i>	4.5	5.16	Characteristics of a $p$ - $i$ - $n$ Diode	5.55
4.3	Carrier Concentrations in an Intrinsic Semiconductor	4.5	5.17	The Point Contact Diode	5.60
	<i>Problems Linked to LO 2</i>	4.14	5.18	The Schottky Barrier Diode	5.61
	<i>Checkpoints</i>	4.14	5.19	The Schottky Effect	5.63
4.4	Donor and Acceptor Impurities	4.14	5.20	Current-Voltage Relation of a Schottky Barrier Diode	5.70
4.5	Charge Densities in a Semiconductor with Impurities	4.16		<i>Problems Linked to LO 5</i>	5.72
4.6	Fermi Level in a Semiconductor having Impurities	4.19		<i>Checkpoints</i>	5.76
	<i>Problems Linked to LO 3</i>	4.21		<i>References</i>	5.76
	<i>Checkpoints</i>	4.22		<i>Open-Book Exam Questions</i>	5.77
4.7	Diffusion	4.22		<i>Multiple-Choice Questions</i>	5.77
4.8	Carrier Lifetime	4.23	<b>6. Applications of Diodes</b>	<b>6.1–6.78</b>	
	<i>Checkpoints</i>	4.24		<i>Learning Objectives</i>	6.1
4.9	The Continuity Equation	4.24	6.1	A Half-Wave Rectifier	6.2
4.10	The Hall Effect	4.27	6.2	Ripple Factor	6.7
	<i>Checkpoints</i>	4.30	6.3	A Full-Wave Rectifier	6.9
	<i>References</i>	4.30	6.4	A Bridge Rectifier	6.12
	<i>Open-Book Exam Questions</i>	4.31	6.5	The Rectifier Voltmeter	6.15
	<i>Multiple-Choice Questions</i>	4.31		<i>Checkpoints</i>	6.16
<b>5. Semiconductor-Diode Characteristics</b>	<b>5.1–5.79</b>		6.6	The Harmonic Components in Rectifier Circuits	6.16
	<i>Learning Objectives</i>	5.1	6.7	Inductor Filters	6.17
5.1	Qualitative Theory of the $p$ - $n$ Junction	5.1	6.8	Capacitor Filters	6.22
5.2	The $p$ - $n$ Junction as a Diode	5.3	6.9	Approximate Analysis of Capacitor Filters	6.25
5.3	Band Structure of an Open-Circuited $p$ - $n$ Junction	5.5	6.10	L-Section Filter	6.29
	<i>Problem Linked to LO 1</i>	5.9	6.11	Multiple L-Section Filter	6.32
	<i>Checkpoints</i>	5.9	6.12	II-Section Filter	6.34
5.4	The Current Components in a $p$ - $n$ Diode	5.9	6.13	II-Section Filter with a Resistor Replacing the Inductor	6.36
			6.14	Summary of Filters	6.37

	<i>Problems Linked to LO 2</i>	6.38			
	<i>Checkpoints</i>	6.40			
6.15	Voltage Regulation Using Zener Diode	6.40			
	<i>Problems Linked to LO 3</i>	6.50			
	<i>Checkpoints</i>	6.51			
6.16	Clipping Circuits	6.51			
6.17	Clamper Circuits	6.63			
6.18	The Envelope Detector Circuit	6.66			
6.19	The Peak-To-Peak Detector Circuit	6.67			
6.20	Voltage Multipliers	6.68			
6.21	Variable Tuning Circuit Using a Varactor Diode	6.71			
	<i>Problems Linked to LO 4</i>	6.73			
	<i>Checkpoints</i>	6.75			
	<i>References</i>	6.75			
	<i>Open-Book Exam Questions</i>	6.76			
	<i>Multiple-Choice Questions</i>	6.76			
<b>7. Transistor Characteristics</b>		<b>7.1-7.58</b>			
	<i>Learning Objectives</i>	7.1			
7.1	The Junction Transistor	7.1			
7.2	Transistor Current Components	7.3			
7.3	The Transistor as an Amplifier	7.5			
7.4	Transistor Construction	7.6			
7.5	Detailed Study of the Currents in a Transistor	7.7			
7.6	The Transistor Alpha	7.9			
	<i>Problems Linked to LO 1</i>	7.10			
	<i>Checkpoints</i>	7.11			
7.7	The Common-Base Configuration	7.11			
7.8	The Common-Emitter Configuration	7.14			
7.9	The CE Cut-off Region	7.16			
7.10	The CE Saturation Region	7.18			
7.11	Large-Signal, dc, and Small-Signal CE Values of Current Gain	7.20			
7.12	The Common-Collector Configuration	7.21			
	<i>Problems Linked to LO 2</i>	7.22			
	<i>Checkpoints</i>	7.22			
7.13	Graphical Analysis of the CE Configuration	7.23			
7.14	Analytical Expressions for Transistor Characteristics	7.25			
7.15	Analysis of Cut-off and Saturation Regions	7.29			
7.16	Typical Transistor-Junction Voltage Values	7.33			
7.17	Determination of the Cut-off, Saturation, and Active Regions of a Generalized Transistor Circuit	7.34			
	<i>Problems Linked to LO 3</i>	7.43			
	<i>Checkpoints</i>	7.46			
			7.18	Transistor as a Switch	7.47
			7.19	Transistor Switching Times	7.52
			7.20	Maximum Voltage Rating	7.54
				<i>Problem Linked to LO 4</i>	7.56
				<i>Checkpoints</i>	7.56
				<i>References</i>	7.56
				<i>Open-Book Exam Questions</i>	7.57
				<i>Multiple-Choice Questions</i>	7.57
<b>8. Transistor Biasing and Thermal Stabilization</b>		<b>8.1-8.45</b>			
	<i>Learning Objectives</i>	8.1			
8.1	The Operating Point	8.1			
	<i>Checkpoints</i>	8.4			
8.2	Bias Stability	8.5			
8.3	Collector-to-Base Bias or Collector-Feedback-Bias	8.7			
8.4	Emitter-Feedback-Bias	8.9			
8.5	Collector-Emitter Feedback-Bias	8.13			
8.6	Self-Bias, Emitter Bias, or Voltage-Divide Bias	8.15			
8.7	Stabilization Against Variations in $V_{BE}$ and $\beta$ for the Self-Bias Circuit	8.19			
8.8	General Remarks on Collector-Current Stability	8.22			
	<i>Problem Linked to LO 2</i>	8.25			
	<i>Checkpoints</i>	8.27			
8.9	Bias Compensation	8.27			
8.10	Biasing Circuits for Linear Integrated Circuits	8.28			
	<i>Problem Linked to LO 3</i>	8.30			
	<i>Checkpoints</i>	8.30			
8.11	Thermistor and Sensistor Compensation	8.31			
8.12	Thermal Runaway	8.31			
8.13	Thermal Stability	8.33			
8.14	Some General Design Guidelines for Self-Bias Circuits	8.35			
	<i>Problem Linked to LO 4</i>	8.42			
	<i>Checkpoints</i>	8.43			
	<i>References</i>	8.43			
	<i>Open-Book Exam Questions</i>	8.43			
	<i>Multiple-Choice Questions</i>	8.44			
<b>9. Small-Signal Low-Frequency ac Models of Transistors</b>		<b>9.1-9.54</b>			
	<i>Learning Objectives</i>	9.1			
9.1	The ac Analysis of a Small-Signal Low-Frequency Common-Emitter Transistor Amplifier	9.1			
	<i>Checkpoints</i>	9.10			
9.2	The ac Model of Transistors Based on $r'_e$ -Parameter	9.11			

9.3	Analysis of a Generalized Amplifier Circuit using $\pi$ -Model	9.12
	<i>Problems Linked to LO 2</i>	9.25
	<i>Checkpoints</i>	9.25
9.4	Drawbacks, Limitations, and Modifications of $r'_e$ -Parameter Based ac Models	9.25
9.5	Two-Port Devices and the Hybrid Model	9.26
9.6	Transistor Hybrid Model	9.27
9.7	Determination of the $h$ -Parameters from the Characteristics	9.29
9.8	Measurement of $h$ -Parameters	9.32
9.9	Conversion Formulas for the Parameters of the Three-Transistor Configurations	9.35
9.10	Analysis of a Transistor Amplifier Circuit using $h$ -Parameters	9.37
	<i>Problems Linked to LO 3</i>	9.41
	<i>Checkpoints</i>	9.44
9.11	Comparison of Transistor Amplifier Configurations	9.44
9.12	Linear Analysis of a Transistor Circuit	9.48
9.13	The Physical Model of a CB Transistor	9.48
	<i>Problems Linked to LO 4</i>	9.51
	<i>Checkpoints</i>	9.52
	<i>References</i>	9.52
	<i>Open-Book Exam Questions</i>	9.53
	<i>Multiple-Choice Questions</i>	9.53
<b>10. Low-Frequency Transistor Amplifier Circuits</b>		<b>10.1-10.46</b>
	<i>Learning Objectives</i>	10.1
10.1	Cascading Transistor Amplifiers	10.1
10.2	$n$ -Stage Cascaded Amplifier	10.5
10.3	The Decibel	10.8
	<i>Problems Linked to LO 1</i>	10.9
	<i>Checkpoints</i>	10.11
10.4	Simplified Common-Emitter Hybrid Model	10.12
10.5	Simplified Calculations for the Common-Collector Configuration	10.17
10.6	Simplified Calculations for the Common-Base Configuration	10.20
	<i>Problems Linked to LO 2</i>	10.20
	<i>Checkpoints</i>	10.21
10.7	The Common-Emitter Amplifier with an Emitter Resistance	10.21
10.8	The Emitter Follower	10.25
10.9	Miller's Theorem	10.28
10.10	High-Input-Resistance Transistor Circuits	10.29
	<i>Problems Linked to LO 3</i>	10.35
	<i>Checkpoints</i>	10.37

10.11	The Cascode Transistor Configuration	10.37
10.12	Difference Amplifiers	10.38
	<i>Problems Linked to LO 4</i>	10.43
	<i>Checkpoints</i>	10.43
	<i>References</i>	10.43
	<i>Open-Book Exam Questions</i>	10.44
	<i>Multiple-Choice Questions</i>	10.44
<b>11. The High-Frequency Transistor</b>		<b>11.1-11.28</b>
	<i>Learning Objectives</i>	
11.1	The High-Frequency T-Model	11.1
	<i>Problems Linked to LO 1</i>	11.1
	<i>Checkpoints</i>	11.3
11.2	The Common-Base Short-Circuit-Current Frequency Response	11.3
11.3	The Alpha Cut-off Frequency	11.4
11.4	The Common-Emitter Short-Circuit-Current Frequency Response	11.5
	<i>Problems Linked to LO 2</i>	11.8
	<i>Checkpoints</i>	11.8
11.5	The Hybrid- $\pi$ (II) Common-Emitter Transistor Model	11.10
11.6	Hybrid- $\pi$ Conductances in Terms of Low-Frequency $h$ -Parameters	11.10
	<i>Problems Linked to LO 3</i>	11.11
	<i>Checkpoints</i>	11.16
11.7	The CE Short-Circuit Current Gain Obtained with the Hybrid- $\pi$ Model	11.17
11.8	Current Gain with Resistive Load	11.20
11.9	Transistor Amplifier Response, Taking Source Resistance into Account	11.22
	<i>Problems Linked to LO 4</i>	11.25
	<i>Checkpoints</i>	11.25
	<i>References</i>	11.25
	<i>Open-Book Exam Questions</i>	11.26
	<i>Multiple-Choice Questions</i>	11.26
<b>12. Field-Effect Transistors</b>		<b>12.1-12.44</b>
	<i>Learning Objectives</i>	
12.1	The Junction Field-Effect Transistor	12.1
12.2	The Pinch-Off Voltage $V_P$	12.2
12.3	The JFET Volt-Ampere Characteristics	12.4
12.4	The FET Small-Signal Model	12.6
	<i>Problems Linked to LO 1</i>	12.8
	<i>Checkpoints</i>	12.12
12.5	The Insulated-Gate FET (MOSFET)	12.12
	<i>Checkpoints</i>	12.13
12.6	The Common-Source Amplifier	12.13
12.7	The Common-Drain Amplifier, or Source Follower	12.16

12.8	A Generalized FET Amplifier	12.21			
	Problems Linked to LO 3	12.27			
	Checkpoints	12.30			
12.9	Biasing the FET	12.30			
	Problems Linked to LO 4	12.35			
	Checkpoints	12.37			
12.10	Unipolar-Bipolar Circuit Applications	12.37			
12.11	The FET as a Voltage-Variable Resistor (VVR)	12.39			
12.12	The Unijunction Transistor	12.40			
	Checkpoints	12.41			
	References	12.41			
	Open-Book Exam Questions	12.42			
	Multiple-Choice Questions	12.42			
<b>13. Integrated Circuits</b>		<b>13.1–13.32</b>			
	<i>Learning Objectives</i>	13.1			
13.1	Basic Monolithic Integrated Circuits	13.1			
	Checkpoints	13.5			
13.2	Epitaxial Growth	13.5			
13.3	Masking and Etching	13.6			
13.4	Diffusion of Impurities	13.7			
	Problems Linked to LO 2	13.11			
	Checkpoints	13.12			
13.5	Transistors for Monolithic Circuits	13.12			
13.6	Monolithic Diodes	13.15			
13.7	Integrated Resistors	13.17			
13.8	Integrated Capacitors and Inductors	13.19			
	Problems Linked to LO 3	13.20			
	Checkpoints	13.21			
13.9	Monolithic Circuit Layout	13.21			
13.10	Integrated Field-Effect Transistors	13.25			
13.11	Additional Isolation Methods	13.26			
	Problems Linked to LO 4	13.28			
	Checkpoints	13.29			
	References	13.29			
	Open-Book Exam Questions	13.30			
	Multiple-Choice Questions	13.30			
<b>14. Untuned Amplifiers</b>		<b>14.1–14.36</b>			
	<i>Learning Objectives</i>	14.1			
14.1	Classification of Amplifiers	14.2			
14.2	Distortion in Amplifiers	14.2			
	Problems Linked to LO 1	14.3			
	Checkpoints	14.3			
14.3	Frequency Response of an Amplifier	14.4			
14.4	The RC-Coupled Amplifier	14.6			
14.5	Low-Frequency Response of an RC-Coupled Stage	14.6			
14.6	High-Frequency Response of a FET Stage	14.10			
	Problems Linked to LO 2	14.11			
	Checkpoints	14.12			
14.7	Cascaded CE Transistor Stages	14.12			
14.8	Step Response of an Amplifier	14.17			
14.9	Bandpass of Cascaded Stages	14.20			
14.10	Effect of an Emitter (or a Source) Bypass Capacitor on Low-Frequency Response	14.22			
	Problems Linked to LO 3	14.27			
	Checkpoints	14.28			
14.11	Noise	14.29			
	Problems Linked to LO 4	14.32			
	Checkpoints	14.33			
	References	14.33			
	Open-Book Exam Questions	14.34			
	Multiple-Choice Questions	14.34			
<b>15. Feedback Amplifiers and Oscillators</b>		<b>15.1–15.82</b>			
	<i>Learning Objectives</i>	15.1			
15.1	Classification of Amplifiers	15.1			
15.2	The Feedback Concept	15.4			
	Problems Linked to LO 1	15.8			
	Checkpoints	15.9			
15.3	General Characteristics of Negative-Feedback Amplifiers	15.10			
	Problems Linked to LO 2	15.12			
	Checkpoints	15.12			
15.4	Effect of Negative Feedback Upon Output and Input Resistances	15.13			
15.5	Voltage-Series Feedback	15.14			
15.6	A Voltage-Series Feedback Pair	15.22			
15.7	Current-Series Feedback	15.24			
15.8	Current-Shunt Feedback	15.27			
15.9	Voltage-Shunt Feedback	15.30			
	Problems Linked to LO 3	15.33			
	Checkpoints	15.37			
15.10	The Operational Amplifier	15.38			
15.11	Basic Characteristics of Practical Operational Amplifiers	15.45			
15.12	Basic Applications of Operational Amplifier	15.48			
15.13	Electronic Analog Computation	15.56			
	Problems Linked to LO 4	15.57			
	Checkpoints	15.60			
15.14	Feedback And Stability	15.60			
15.15	Gain and Phase Margins	15.62			
	Problems Linked to LO 5	15.63			
	Checkpoints	15.64			
15.16	Sinusoidal Oscillators	15.64			
15.17	The Phase-Shift Oscillator	15.66			
15.18	Resonant-Circuit Oscillators	15.69			
15.19	A General Form of Oscillator Circuit	15.70			

15.20	Crystal Oscillators	15.72	17.11	The <i>p-i-n</i> Photodetector	17.23
15.21	Frequency Stability	15.74	17.12	The Avalanche Photodiode (APD)	17.29
15.22	Negative Resistance in Oscillators	15.75		<i>Problems Linked to LO 5</i>	17.34
	<i>Problems Linked to LO 6</i>	15.76		<i>Checkpoints</i>	17.34
	<i>Checkpoints</i>	15.79		<i>References</i>	17.35
	<i>References</i>	15.79		<i>Open-Book Exam Questions</i>	17.36
	<i>Open-Book Exam Questions</i>	15.80		<i>Multiple-Choice Questions</i>	17.36
	<i>Multiple-Choice Questions</i>	15.80			
<b>16. Large-Signal Amplifiers</b>		<b>16.1-16.30</b>	<b>18. Regulated Power Supplies</b>		<b>18.1-18.22</b>
	<i>Learning Objectives</i>	16.1		<i>Learning Objectives</i>	18.1
16.1	Class A Large-Signal Amplifiers	16.2	18.1	Elements of a Regulated Power Supply	18.1
16.2	Second-Harmonic Distortion	16.3		System	18.2
16.3	Higher-Order Harmonic Generation	16.5	18.2	Stabilization	18.3
	<i>Problems Linked to LO 1</i>	16.8		<i>Checkpoints</i>	18.3
	<i>Checkpoints</i>	16.8	18.3	Emitter-follower Regulator	18.4
16.4	The Transformer-Coupled Audio Power	16.9	18.4	Series Voltage Regulation	18.4
	Amplifier	16.9	18.5	Practical Considerations	18.8
16.5	Shift of Dynamic Load Line	16.13		<i>Problems Linked to LO 2</i>	18.9
16.6	Efficiency	16.13		<i>Checkpoints</i>	18.10
	<i>Problems Linked to LO 2</i>	16.19	18.6	Monolithic Linear Regulators	18.11
	<i>Checkpoints</i>	16.20	18.7	Performance Parameters of 3-Terminal	18.14
16.7	Push-Pull Amplifiers	16.21	18.8	IC Regulators	18.14
16.8	Class B Amplifiers	16.22		LM723/LM723C General Purpose	18.15
16.9	Class AB Operation	16.26		Voltage Regulator	18.17
	<i>Problems Linked to LO 3</i>	16.26	18.9	Shunt Voltage Regulators	18.19
	<i>Checkpoints</i>	16.27		<i>Problems Linked to LO 3</i>	18.20
	<i>References</i>	16.28		<i>Checkpoints</i>	18.20
	<i>Open-Book Exam Questions</i>	16.28		<i>References</i>	18.21

<b>17. Photoelectric Devices</b>		<b>17.1-17.38</b>	<b>Appendix A: Probable Values of General</b>		
	<i>Learning Objectives</i>	17.1	<b>Physical Constants</b>		<b>A.1</b>
17.1	Photoemissivity	17.2	<b>Appendix B: Conversion Factors and</b>		
17.2	Photoelectric Theory	17.3	<b>Prefixes</b>		<b>A.2</b>
17.3	Definitions of Some Radiation Terms	17.6	<b>Appendix C: Periodic Table of the</b>		
	<i>Problems Linked to LO 1</i>	17.7	<b>Elements</b>		<b>A.3</b>
	<i>Checkpoints</i>	17.7	<b>Appendix D: Data Sheets of General</b>		
17.4	Phototubes	17.8	<b>Purpose Transistors</b>		
17.5	Applications of Photodevices	17.10	<b>2N3903/3904</b>		<b>A.4</b>
17.6	Multiplier Phototubes	17.11	<b>Appendix E: Data Sheets of Some</b>		
	<i>Problems Linked to LO 2</i>	17.13	<b>Commonly Used Voltage ICs</b>		
	<i>Checkpoints</i>	17.14			<b>A.11</b>
17.7	Photoconductivity	17.16	<b>Appendix F: Answers to Selected</b>		
17.8	The Semiconductor Photodiode	17.19	<b>Open-Book Exam</b>		
17.9	Multiple-Junction Photodiodes	17.20	<b>Questions</b>		<b>A.22</b>
	<i>Problems Linked to LO 3</i>	17.20			
	<i>Checkpoints</i>	17.21	<b>Index</b>		<b>I.1</b>
17.10	The Photovoltaic Effect	17.21			
	<i>Problems Linked to LO 4</i>	17.23
