

ENCYCLOPAEDIA OF
**OSCILLATIONS
AND
WAVES**

MANPAL SINGH

Contents 5

<i>Preface</i>	<i>vii</i>
1. Introduction	1
Simple Systems	
2. Simple Harmonic Oscillations	5
Mechanical Energy • Simple Harmonic Motion	
• Kinetic and Potential Energies • Fractions of	
Energies • Simple Pendulum • Compound	
Pendulum • Oscillations of a Liquid	
• Helmholtz Resonator	
3. Addition of Simple Harmonic Motions	81
Lissajous' Figures • Determination of Frequency	
of Tuning Fork	
4. Harmonic Oscillator	109
Swinging Pendulum • Spring-mass System	
• Normal Mode • Ladder Operator Method	
• Anharmonicity • Parametric Oscillator	
5. Different Electronic Oscillators	149
Harmonic Oscillator • Autogenerator • Beat	
Frequency Oscillator • Blocking Oscillator	
• Clapp Oscillator • Colpitts Oscillator • Crystal	

Oscillator • Dynatron Oscillator • Grid Dip Oscillator • Hartley Oscillator • Local Oscillator • Oscillator Sync • Wien Bridge Oscillator • Relaxation Oscillator • Phase-shift Oscillator • Pierce Oscillator

6. Electrical Oscillations	187
Circuit Transients • Ballistic Galvanometer • Electromagnetic Damping • Critical Damping • Grassot's Fluxmeter	
7. Forced Oscillations	219
Free and Forced Oscillations • Resonance • Forced Oscillations • Sharpness of Resonance • Maximum Power Absorption	
8. Forced Electrical Oscillations	247
Parallel Resonant Circuits • Series and Resonant Circuit • Mechanical and Electrical Impedance	
9. Damped Harmonic Oscillations	269
Logarithmic Decrement • Relaxation Time • Quality Factor	
10. Two-Body Oscillations	295
Two Body Harmonic Oscillator • Vibrations of a Diatomic Molecule	
<i>Bibliography</i>	305
<i>Index</i>	309
