

ENCYCLOPAEDIA OF
TEXTILE
SCIENCE
Technology
and Engineering

Lisa Lam

Contents

<i>Preface</i>	vii
1. India's Conventional Textiles	1
2. Textile Fabrics and its Recognition	22
3. Industry of Textile and Apparel	33
4. Textile Fiber and Process of Preparation	46
5. Manufacturing Industry and Technological Change	62
6. Technological Research and Textile Development	89
7. Terms Related to Textile	118
8. Industry of Synthetic Fibers	132
9. Construction of Spinning Yarn	142
10. Use of Robotics Textile and Decision-Making	147
11. Vegetable Fibers	172
12. Development of Fibers from Synthetic Polymers	194
13. Chemical Intermediates for Synthetic-Fiber Production	210
14. Pipe Line Approach of Textile	227
15. Control of Stock and Production	253
16. System of Processing of Data	262
17. Fabric Finishing	270
18. Mechanisation in the Textile Labor Process	283
<i>Index</i>	300
