ENCYCLOPEDIA
OF THE
EARTH

Contents

Introduction	6
The Earth Today	9
1 The Dynamic Earth	9
2 Earthquakes and Volcanoes	25
3 Internal Structure	33
4 Magnetism, Gravity and Heat	45
5 Internal Composition	57
The Solid Earth	69
6 Origin and Evolution	69
7 Dating the Rocks	73
8 The Earth Through Time	81
9 The Growth of Continents	101
10 An Expanding Earth?	109
The Fluid Earth	113
11 Development of the Atmosphere	113
12 Development of the Oceans	121
Shaping the Surface	129
13 Climate and Climatic Change	129
14 Rocks and the Rock Cycle	141
15 Faulting and Folding	153
Surface Environments	157
16 Sedimentary Environments	157
17 Development of Soils	173
18 Landscape Features	181
Geology and Man	197
19 Resources from Rocks	197
20 Changing the Landscape	213
21 Engineering Geology	229
22 Predicting Natural Disasters	241
23 Manmade Earthquakes	245
Further reading and credits	249
Glossary of geological terms	250
Index	252
