

SECOND EDITION

TEXTBOOK OF
ENVIRONMENTAL
CHEMISTRY

Balaram Pani

Contents

<i>Preface to the Second Edition</i>	<i>vii</i>
1. Our Environment and Its Chemistry	1
1.0 Introduction	1
1.1 Understanding our Environment	2
1.1.1 Environmental Pollution	3
1.1.2 Pollutants	4
1.1.3 Effects of Pollution	4
1.1.4 Causes of Pollution	5
1.2 Human Population Growth and the Environment	5
1.2.1 Human Demography	5
1.2.2 Population Dynamics	6
1.3 Sustainability and Carrying Capacity	7
1.3.1 Carrying Capacity	7
1.4 Environmental Perspectives	8
1.5 Environment and the Society	8
1.5.1 Environmental Problems in Cities	9
1.6 Environmental Ethics, Values and Knowledge	10
1.7 Environmental Hazards or Disasters	11
1.7.1 Natural Disasters	11
1.7.2 Man-made Disasters	19
2. Fundamental Chemistry for Environment	22
2.0 Atomic Structure	22
2.0.1 The Quantum Theory of Radiation	22
2.0.2 Quantum Numbers	23
2.0.3 Electronic Configurations	24
2.1 Periodic Table and Periodic Properties of an Electrons	25
2.1.1 Classification of Elements in the Periodic Table Based on their Electronic Configurations	26

2.1.2 Periodic Properties	26
2.2 Chemical Bonding	28
2.2.1 Types of Bonds	29
2.3 Acids, Bases and Salts	33
2.3.1 Ionization of Acids and Bases	34
2.3.2 Common Ion Effects	34
2.3.3 Solubility Product	35
2.3.4 Salts	35
2.4 Thermodynamics	36
2.4.1 Terminology of Thermodynamics	36
2.4.2 Thermodynamic Equilibrium	38
2.4.3 State Function	38
2.4.4 Perfect Differentials	39
2.4.5 First Law of Thermodynamics	40
2.4.6 Enthalpy	41
2.4.7 Thermochemistry	42
2.4.8 Second Law of Thermodynamics	43
2.4.9 Entropy	44
2.5 Phase Rule	46
2.5.1 One Component System	48
2.6 The Colloids	50
2.6.1 Classification of Colloidal System	51
2.7 Electrochemistry	52
2.7.1 Electrode Potential	53
2.7.2 Electrochemical Cell	55
2.7.3 EMF of a Cell and Free Energy Change	56
2.8 Chemical Kinetics	57
2.8.1 Rate of a Chemical Reaction	58
2.8.2 Factors Influencing Rates of Reactions	58
2.8.3 Order of a Reaction	60
2.8.4 Molecularity of a Reaction	61
2.8.5 Photochemical Reactions	61
2.9 Fundamental Reactions and their Mechanism	64
2.9.1 Bond Fission	65
2.9.2 Factors Affecting Acid Base Strength	66
2.9.3 Inductive Effect	66
2.9.4 Electromeric Effect	68
2.9.5 Resonance and Resonance Effect and Tautomerism	69
2.9.6 Reaction Intermediates	70

2.9.7 Classification of Reactions	73
2.9.8 Types of Attacking Reagent	74
2.9.9 Conjugation and Hyperconjugation	75
3. Earth as a System	77
3.0 Earth and Life	77
3.1 Matter and Energy	79
3.2 Environmental Parameters and Biota	81
3.3 Ecosystem	84
3.4 Ecosystem Structure and Community Dynamics	85
3.5 Evolutionary Ecology	97
3.6 Biological Productivity	100
3.7 Energy Flow	101
3.8 Ecological Succession	105
3.8.1 Primary Succession or Priserere	106
3.8.2 Climax Community	108
3.8.3 Community Changes	109
3.9 Ecological Restoration	111
3.10 Balance of Nature	111
4. Biogeochemical Cycles	113
4.0 Introduction	113
4.1 Material Cycles and Life	114
4.2 Dynamic Earth and Its Chemical Cycles	115
4.2.1 Tectonic Cycle	116
4.2.2 Hydrologic Cycle	116
4.2.3 Rock Cycle	117
4.3 General Concepts of Biological Cycles	118
4.4 The Carbon Cycle	118
4.5 The Nitrogen Cycle	120
4.6 The Phosphorus Cycle	121
4.7 The Sulphur Cycle	122
4.8 The Oxygen Cycle	123
5. Resources	124
5.0 Introduction	124
5.1 Water Resources	125
5.2 Forest Resources	129
5.3 Geospheric Resources	136
5.4 Energy Resources	140
5.5 Renewable Sources of Energy	142

5.6	Non-renewable Resources of Energy	148
5.7	Overexploitation and Energy Crisis	153
5.8	Land Resources	155
5.9	Living Resources	157
5.10	Wildlife Resources	163
5.11	Environmental Resource Economics	165
6.	Atmosphere	168
6.0	Introduction	168
6.1	Composition of Atmosphere	168
6.2	Structure of the Atmosphere	169
6.3	Energy Balance in the Atmosphere	172
6.4	Weather	173
6.5	Climate	177
6.6	Effects of Climate Change	179
7.	Atmospheric Chemistry	181
7.0	Introduction	181
7.1	Photochemical Reactions in the Atmosphere	182
7.2	Redox Reactions in the Atmosphere	186
7.3	Acid-base Reactions in the Atmosphere	187
7.4	Ions and Particles in the Atmosphere	188
7.5	Evolution of the Atmosphere	190
7.6	Chemical Reactions in the Atmosphere	191
7.7	Atmospheric Water	194
8.	Air Pollution	196
8.0	Introduction	196
8.1	Sources of Air Pollution	197
8.2	Types of Air Pollutants	198
8.3	Some Major Air Pollutants and their Effects	200
8.4	Properties of Pollutants	201
8.5	Control of Air Pollution	210
8.6	Fate and Transportation of Air Pollutants	210
8.7	Global and Regional Air Pollution Problems	218
8.8	Indoor Air Pollution	230
9.	Control of Air Pollution	233
9.0	Introduction	233
9.1	Control of Particulates	234
9.1.1	Gravitational Settling Chambers	235

9.1.2	Bag House Filters	239
9.1.3	Scrubbers (Wet Collectors)	241
9.2	Control of Gaseous Pollutants	244
9.2.1	Adsorption of Gaseous Pollutants	250
9.2.2	Condensation	252
9.3	Control of Some Criteria Pollutants	256
9.3.1	Control of Sulfur Dioxide (SO ₂)	257
9.3.2	Control of Nitrogen Oxides	260
9.3.3	Control of Carbon Monoxide (CO)	262
9.4	Air Pollution Sampling and Analysis	262
9.4.1	Ambient Air Sampling	262
9.4.2	Stack Sampling	264
9.4.3	Sampling of Gaseous Pollutants	265
9.4.4	Selection of the Scrubbing Solvents	267
9.5	Air Quality Standards	267
10.	Aquatic Chemistry	270
10.0	Introduction	270
10.1	Structure and Properties of Water	270
10.1.1	Structure	271
10.1.2	Physico-Chemical Properties of Water	272
10.3	Solubility	274
10.4	Acid-base Reactions in Aqueous System	275
10.5	Redox Reaction	278
10.6	Coordination Chemistry in Water System	280
10.7	Colloidal Material in Water	281
10.8	Chemical Speciation	282
11.	Water Pollution	286
11.0	Introduction	286
11.1	Types of Water	287
11.2	Types of Water Pollutants and their Sources	288
11.3	Organic Pollutants	289
11.4	Inorganic Pollutants	298
11.5	Sediments	299
11.6	Radioactive Materials	299
11.7	Thermal Pollution	302
12.	Control of Water Pollution and Water Treatment	304
12.0	Introduction	304
12.1	Water Sampling	305

12.1.1	Water Sample Preservation	306
12.1.2	Analysis Techniques and Methodology	308
12.1.3	Ion Exchange Chromatography	309
12.2	Analysis of Some Specific Substances	310
12.2.1	Dissolved Oxygen	312
12.2.2	Total Hardness (Ca and Mg)	315
12.2.3	Nitrogen (Ammonia)	316
12.2.4	Bacteriological Measurements	324
12.3	Engineered System for Water Pollution Control	324
12.3.1	Aeration	325
12.3.2	Settling or Sedimentation	328
12.3.3	Coagulation	333
12.3.4	Filtration	334
12.3.5	Disinfection	336
12.4	Engineered Systems for Wastewater Treatment	338
12.4.1	Primary Treatment	339
12.4.2	Secondary (Biological) Treatment	340
12.4.3	Activated Sludge System	343
12.4.4	Attached Culture System	344
12.4.5	Anaerobic Treatment Process	346
12.5	Advanced Wastewater Treatment	347
12.5.1	Reverse Osmosis	348
12.5.2	Electrodialysis	349
12.5.3	Nutrient Removal	350
12.6	Water Quality Characteristics and Standards	353
12.6.1	Water Quality Objectives	353
12.6.2	Water Quality Criteria	353
12.6.3	Water Quality Standards	355
12.6.4	Drinking Water Standards	357
12.6.5	Irrigation Water Standards	360
12.6.6	Stream Water Standards	361
12.6.7	Effluent Water Standards	361
12.7	Pathological Parameters	361
12.8	Watershed Management	361
13. Soil Chemistry		365
13.0	Introduction	365
13.1	Soil Texture	366
13.1.1	Soil Structure	367

13.2 Soil Composition	367
13.2.1 Mineral Soils	367
13.2.2 Organic Matter	368
13.2.3 Soil Water	369
13.2.4 Soil Air	373
13.3 Soil Organisms	374
13.3.1 Autotrophic Organisms	374
13.3.2 Heterotrophic Organisms	375
13.4 Soil Profiles	375
13.5 Soil Reactions	377
13.5.1 Cation Exchange	377
13.5.2 Anion Exchange	378
13.6 The Essential Elements	379
13.6.1 Macronutrients	379
13.6.2 Micronutrients	380
14. Soil Pollution and Its Control	383
14.0 Introduction	383
14.1 Sources of Soil Pollution	383
14.1.1 Soil Erosion	384
14.1.2 Land Degradation	385
14.2 Types of Soil Pollutants	385
14.2.1 Pesticides in Soil or Pesticidal Pollution	386
14.2.2 Behaviour of Pesticides in Soil	387
14.2.3 Effects of Pesticides on Soil Organisms	388
14.3 Inorganic Contaminants in Soils	388
14.3.1 Behaviour of Inorganic Contaminants in Soils	388
14.4 Solid Waste in Soils	389
14.4.1 Types of Solid Wastes	389
14.4.2 Sources of Solid Wastes	391
14.4.3 Properties and Effects of Solid Wastes	391
14.5 Radionuclides in Soils	392
14.6 Soil Salinity	393
14.7 Effect of Acid Rain on Soils	394
15. Noise Pollution and Its Control	396
15.0 Introduction	396
15.1 Human Acoustics	397
15.2 Sound Measurement Scale	397
15.3 Noise Pollution	400
15.3.1 Sources of Noise Pollution	400

15.4	Effects of Noise Pollution	403
15.4.1	Health Effects of Noise	403
15.4.2	Hearing Damage due to Impulsive or Impact Noise	404
15.4.3	Noise Standards and Limits	405
15.5	Noise Propagation	407
15.5.1	Absorption of Sound	408
15.5.2	Indoor Noise Propagation	410
15.5.3	Outdoor Noise Propagation	411
15.6	Measurement of Noise	412
15.6.1	Frequency Band Analysis	414
15.6.2	Characterizations of Acoustic Materials	416
15.6.3	Sound Power and Sound Intensity Measurement	417
15.7	Noise Pollution Control Methods	418
15.7.1	Noise Control at Source	419
15.7.2	Noise Control of Transmission Path	420
15.7.3	Noise Control at the Receiver End	422
16.	Environmental Biochemistry	424
16.1	Introduction	425
16.2	Bioaccumulation	427
16.3	Biodegradation	428
16.3.1	Reductive Degradation	428
16.3.2	Oxidative Degradation	429
16.3.3	Factors Influencing Biodegradability	430
16.4	Cometabolism	431
16.5	Bioremediation	433
16.6	Biobleaching	434
16.7	Biomethanation	434
16.7.1	Microbial Kinetics	437
17.	Polymers for Environment	437
17.0	Introduction	437
17.1	Polymer Synthesis	438
17.2	Environmental Degradation of Polymers	439
17.2.1	Composting and Polymers	440
17.2.2	Evaluation of Degradability	441
17.3	Photodegradable Polymers	441
17.4	Hydrolysis and Hydro-biodegradable Polymers	443
17.5	Biopolymers and Bioplastics	443
17.5.1	Preparation of Bioplastics	444

17.6	International Standards for Biodegradation	445
17.7	Recycling of Plastics	446
17.7.1	Thermal Degradation of Plastics during Recycling	448
18.	Toxicology and Toxicological Chemistry	450
18.0	Introduction	450
18.1	Toxicology	450
18.1.1	Chronic and Acute Effect	451
18.2	Chemical Interactions	451
18.2.1	Xenobiotic and Endogenous Substances	452
18.2.2	Immune System Effect	453
18.3	Dose-response Concept	453
18.3.1	Nonlethal Effect and Sensitivity	455
18.3.2	Tolerance and Ecological Gradients	456
18.4	Toxicological Chemistry	457
18.4.1	Biochemical Pathways of Toxicants in the Body	458
18.4.2	Factors Influencing the Biochemical Reactions in the Body	460
18.5	Toxicity Evaluation	460
18.5.1	Toxic Evaluation-water Testing	461
18.5.2	Animal Testing	462
18.5.3	Toxicity Ratings	464
18.6	Mechanisms for Minimizing Toxic Effects	464
18.6.1	Detoxification	465
18.6.2	Immunochemical Techniques	465
18.6.3	Excretion and Repair Mechanisms	465
19.	Green Chemistry	467
19.0	Introduction	467
19.1	Basic Principles of Green Chemistry	468
19.1.1	First Principle of Green Chemistry	468
19.1.2	Second Principle of Green Chemistry	469
19.1.3	Third Principle of Green Chemistry	469
19.1.4	Fourth Principle of Green Chemistry	470
19.1.5	Fifth Principle of Green Chemistry	470
19.1.6	Sixth Principle of Green Chemistry	471
19.1.7	The Seventh Principle of Green Chemistry	472
19.1.8	The Eighth Principle of Green Chemistry	473
19.1.9	The Ninth Principle of Green Chemistry	473
19.1.10	Tenth Principle of Green Chemistry	474

19.1.11	The Eleventh Principle of Green Chemistry	474
19.1.12	The Twelfth Principle of Green Chemistry	474
19.2	The Concept of Atom Economy	475
19.3	Tools of Green Chemistry	477
19.3.1	Green Starting Materials	477
19.3.2	Green Reagents	477
19.3.3	Green Reactions	478
19.3.4	Green Methodologies/Analysis	479
19.3.5	Green Chemical Products	480
19.4	Zero Waste Technology	480
20.	Conservation of Nature and Environmental Laws	484
20.0	Introduction	484
20.1	Conservation of Natural Resources	486
20.1.1	Conservation of Forest	486
20.1.2	Conservation of Soil	487
20.1.3	Conservation of Water	488
20.1.4	Conservation of Biodiversity	489
20.1.5	Conservation of Energy	489
20.1.6	Conservation of Minerals	490
20.2	Sustainable Use of Resources	495
20.3	Environmental Values and Ethics	496
20.4	Environmental Management and Auditing	498
20.4.1	Air Quality Management (AQM)	501
20.4.2	Water Management	505
20.4.3	Soil Quality Management	507
20.4.4	Noise Management	508
20.4.5	Ecosystem Management	509
20.4.6	Environmental Auditing	511
20.5	Environmental Impact Assessment (EIA)	513
20.5.1	Methodology for Assessing	514
20.5.2	Meltrag Overlay Approach	514
20.5.3	Matrix Methods	515
20.6	Waste Management	516
20.6.1	Solid Waste Management	516

20.6.2	Liquid Waste Management	521
20.6.3	Gaseous Waste Management	524
20.7	Environmental Laws Constitutional Provision for Environmental Protection in India	526
20.7.1	Legislative Powers and Environmental Protection	528
20.7.2	Fundamental Rights and Environmental Protection	530
20.7.3	Procedural Laws Related to Environmental Protection	530
20.8	The Legal Framework of Environmental Protection In India	533
20.8.1	The Water Act	534
20.8.2	Air (Prevention and Control of Pollution) Act, 1981	535
20.8.3	The Environment (Protection) Act, 1986	537
20.8.4	Some Acts Relevant to Environmental Protection	537
20.9	Judicial System	539
20.9.1	Tort Law	540
20.9.2	Public Nuisance	541
20.9.3	The Writ Jurisdiction	542
20.10	Environmental Laws at International Level	543
20.10.1	International Laws, Conventions and Conferences	544
20.10.2	India's International Obligations	546
21.	Sampling and Analysis of Environmental Pollutants	548
21.0	Principal Objectives of Samples	548
21.1	Collection of Water Samples	549
21.1.1	Sample Containers	549
21.1.2	Quantity and Number of Samples	549
21.1.3	Sampling Techniques	550
21.1.4	Sampling Procedures	550
21.2	Collection of Ambient Air samples	551
21.2.1	Sampling Technique	552
21.2.2	Sampling Systems	552
21.2.3	Sampling Systems for Gaseous Pollutants	552
21.2.4	Sample Recovery System	553
21.2.5	In Situ Sampling Technique	554
21.3	Sampling Systems for Particulate Pollutants	554
21.3.1	Particulate Pollutant Collection Methodology	554

21.3.2	Static Sampling Method	556
21.3.3	Choice of Sampling Site	558
21.4	Collection of Soil Samples	558
21.4.1	Sampling for Determination of Soil Quality	559
21.4.2	Sampling for Determination of Chemical Components	559
21.4.3	Sampling Strategy	560
21.4.4	Sampling Patterns	560
21.5	Sampling Techniques	563
21.5.1	Sample Types and Procedures	564
21.5.2	Sampling Methods	565
21.5.3	Sample Preservation and Sample Containers	565
21.5.4	Pretreatment of Soil Before Analysis	567
	Index	569
