

Handbook of BASIC HUMAN PHYSIOLOGY

FOR PARAMEDICAL STUDENTS

Handbook of
BASIC HUMAN PHYSIOLOGY

Dr. H.D. Singh

S. CHAND

CONTENTS

PART I : INTRODUCTION : GENERAL PHYSIOLOGY

General Aspects

3-16

PART II : BLOOD AND BODY FLUIDS

1. Blood : Functions, Composition and Plasma Proteins 19 - 21
2. The Red Blood Cells and Development, Haemoglobin, Anaemia 22 - 30
3. The White Blood Cells and Platelets 31 - 37
4. Lymphocytes and Immunity-Spleen 38 - 45
5. Coagulation or Clotting of Blood 46 - 52
6. Blood groups and blood transfusion 53 - 57
- 6A. Blood Volume 58 - 60
7. Body Fluids and Lymphs 61 - 66
8. Blood buffers and Acid-Base Balance 67 - 71

PART III : THE CARDIOVASCULAR SYSTEM

1. Anatomy Cardiac Muscle and Cardiac Impulse 75 - 80
2. The Cardiac Cycle 81 - 85
3. Electrical Activity of the Heart and the Electrocardiogram 86 - 93
4. The Cardiac Output 94 - 96
5. The Heart Rate, Blood Pressure and their Regulation 97 - 105
6. The Vascular System 106 - 112
7. Circulation in Special Regions 113 - 116
8. Muscular Exercise, Gravitational Forces and Abnormalities of Function 117 - 122

PART IV : RESPIRATION

1. Physiological Anatomy Respiratory Movements and Lung Volumes 125 - 137
2. Exchange and Transportation of Gases 138 - 145
3. Regulation of Respiration 146 - 151
4. Respiratory Abnormalities 152 - 163

PART V : DIGESTIVE SYSTEM

1. Introduction to Mouth and Teeth 167 - 175
2. Oesophagus, Stomach-Digestion and Motility 176 - 183
3. Small Intestine : Digestion and Movements, Pancreas, Liver 184 - 196
4. Digestion an Absorption 197 - 200
5. The Large Intestine 201 - 204

PART VI : METABOLISM AND NUTRITION

1. Metabolism and Nutrition 207 - 217

PART VII : EXCRETORY SYSTEM : KIDNEY AND SKIN

1. Kidney : Introduction and Physiological Anatomy 221 - 227
2. Mechanism of Urine Formation; 1. Glomerular Filtration 228 - 230
3. Urine Formation; 2. Tubular Functions 231 - 237
4. Acid-base Regulation and Other Tubular Functions 238 - 241
5. Plasma Clearance, Renal Function Tests and Abnormal Renal Function 242 - 249
6. Micturition 250 - 252
7. Skin and Sweat Glands 253 - 257
8. Regulation of Body Temperature 258 - 262

PART VIII : ENDOCRINE GLANDS

1. Introduction 265 - 272
2. Parathyroid Glands and Hormones Regulating Calcium Metabolism 273 - 276
3. The Adrenal Glands 277 - 288
4. The Pituitary Gland 289 - 295
5. Endocrine Functions of the Pancreas regulation of blood Glucose 296 - 303
6. Hormones Influencing Growth 304 - 306
7. Gastrointestinal Hormones 307 - 308
8. The Pineal Gland and Thymus 309 - 310
9. Prostaglandins 311 - 313

PART IX : REPRODUCTIVE SYSTEM

1. Introduction 317 - 325
2. Female Reproductive System 326 - 336
3. Pregnancy and Parturition 337 - 343
4. Foetal Circulation and Respiration 344 - 347
5. Contraceptive Methods 348 - 350

PART X : MUSCLES

1. Skeletal Muscle and Neuromuscular Transmission 353 - 369
2. Smooth Muscle 370 - 371

PART XI : THE NERVOUS SYSTEM

1. The Nerve Cell and Nerve Fibre 375 - 382
2. Synapse and Pain Synaptic Transmission 383 - 387
3. Reflex Action 388 - 393
4. Receptors and Pain Sensations 394 - 402
5. Central Nervous System—Spinal Cord 403 - 416
6. The Brain Stem and Cranial Nerves 417 - 422
7. The Cerebral Cortex 423 - 431
8. The Basal Ganglia 432 - 436
9. The Thalamus 437 - 440
10. The Hypothalamus 441 - 445
11. The Limbic System 446 - 448

(viii)

12. The Cerebellum 449 - 455
13. Electroencephalogram 456 - 458
14. The Reticular Formation 459 - 460
15. Conditioned Reflexes 461 - 463
16. Sleep 464 - 468
17. Learning Memory Language and Speech 469 - 474
18. Regulation of Tone Posture and Equilibrium 475 - 486
19. The Autonomic Nervous System 487 - 494
20. Transmitters in the Nervous System 495 - 499
21. The Cerebrospinal Fluid and Blood-Brain Barrier 500 - 504

PART XII : SPECIAL SENSES

1. Vision 507 - 577
[Including Hearing, Taste and Olfaction (smell)]

(ix)
