# Inorganic Chemistry

Vol. II

Dr. K.K. Bhasin

**PRADEEP PUBLICATIONS**  
JALANDHAR (INDIA)

# Contents

<b>1</b>	<b>Chemistry of Elements of First Transition Series</b>	<b>1-58</b>
1.1.	Position of <i>d</i> -block elements in the periodic table	3
1.2.	Electronic configuration of <i>d</i> -block elements	8
1.3.	Electronic configuration of ions	10
1.4.	General properties of transition elements	11
1.5.	Coordination number and geometry	25
1.6.	Binary compounds	30
	<b>Summary for Review</b>	52
	<b>Typical Questions with Answers</b>	53
	<b>Questions (Long Answer, Short Answer and Very Short Answers)</b>	55
<b>2</b>	<b>Chemistry of Elements of Second and Third Transition Series</b>	<b>59-88</b>
2.1.	Electronic configuration of elements of second and third transition series.	60
2.2.	General characteristics of second and third transition series.	60
2.3.	Comparative study of the elements of second and third transition series.	68
	<b>Summary for Review</b>	85
	<b>Typical Questions with Answers</b>	85
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	86
<b>3</b>	<b>Coordination Compounds</b>	<b>89-139</b>
3.1.	Werner's theory of coordination compounds	90
3.2.	Experimental verification of Werner's theory	92
3.3.	Isomerism in coordination compounds	95
3.4.	Structural isomerism	95
3.5.	Stereoisomers	98
3.6.	Chelates	109
3.7.	Effective atomic number	112
3.8.	Theories of bonding in coordination compounds	114
3.9.	Valence bond theory	116
3.10.	Limitations of valence bond theory	123
3.11.	Applications of coordination compounds in chemistry	124
	<b>Summary for Review</b>	129
	<b>Typical Questions with Answers</b>	130
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	135
<b>4</b>	<b>Chemistry of Lanthanide Elements</b>	<b>140-165</b>
4.1.	Electronic structure and position of lanthanides in the periodic table	140
4.2.	General characteristics of lanthanides	141
4.3.	Physical constants of lanthanides	141
4.4.	Oxidation states	143
4.5.	Magnetic properties	144
4.6.	Colour and spectral properties	147
4.7.	Ionic radii and lanthanide contraction	149
4.8.	Complex formation tendency of lanthanides	151
4.9.	Occurrence of lanthanides	153
4.10.	Methods of separation into individual elements	154
4.11.	Compounds of lanthanides	158
	<b>Summary for Review</b>	161
	<b>Typical Questions with Answers</b>	161
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	162
<b>5</b>	<b>Chemistry of Actinides</b>	<b>166-187</b>
5.1.	Position of actinides in the periodic table	166
5.2.	General characteristics of actinides	167
5.3.	Occurrence and isolation of actinides	171
5.4.	Chemistry of separation of neptunium (Np), plutonium (Pu) and Americium (Am) from uranium	173
5.5.	Transuranic elements	176
5.6.	The later or heavier actinide elements	180
5.7.	Comparison of actinides and lanthanides	182
	<b>Summary for Review</b>	184
	<b>Typical Questions with Answers</b>	184
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	185
<b>6</b>	<b>Oxidation-Reduction Reactions</b>	<b>188-243</b>
6.1.	Oxidation and reduction	188
6.2.	Redox reactions	190
6.3.	Standard reduction potentials	194

6.4.	Redox reagents and their use in volumetric analysis	198
6.5.	Redox indicators	207
6.6.	Analysis of redox cycle	211
6.7.	Redox stability in water	215
6.8.	Redox chemistry of manganese species in aqueous solution	217
6.9.	Disproportionation	219
6.10.	Latimer diagrams	221
6.11.	Frost diagrams	224
6.12.	Pourbaix diagrams	226
6.13.	The occurrence and extraction of elements	229
6.14.	Thermodynamics of reduction processes	233
6.15.	Factors influencing the choice of extraction process	235
	<b>Summary for Review</b>	237
	<b>Typical Questions with Answers</b>	239
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	240
<b>7</b>	<b>Acids and Bases</b>	<b>244–275</b>
7.1.	Arrhenius concepts of acids and bases	244
7.2.	Bronsted–Lowry concept	245
7.3.	Lewis concept of acids and bases	248
7.4.	Lux-Flood concept of acid and base	251
7.5.	Usanovich concept of an acid and a base	252
7.6.	Solvent system concept	253
7.7.	Types of solvents	254
7.8.	Relative strength of acids	255
7.9.	Trends in acid strength	255
7.10.	Strength of organic acids	258
7.11.	Effect of solvents on the acid strength (Levelling effect)	259
7.12.	Strength of oxo-acids	262
7.13.	Empirical relationship for calculating $pK_a$ of an acid	264
7.14.	Acid strength of hydrated cations	265
7.15.	Role of solvent on the strength of Lewis acids and bases	267
	<b>Summary for Review</b>	268
	<b>Typical Questions with Answers</b>	269
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	272
<b>8</b>	<b>Non-Aqueous Solvents</b>	<b>276–308</b>
8.1.	Role of solvent in a chemical reaction	276
8.2.	Physical properties of solvents	277
8.3.	Types of solvents	280
8.4.	Liquid ammonia as a non-aqueous solvent	281
8.5.	Sulphuric acid as a non-aqueous solvent	289
8.6.	Liquid sulphur dioxide as a non-aqueous solvent	297
	<b>Summary for Review</b>	302
	<b>Typical Questions with answers</b>	303
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	305
<b>9</b>	<b>Compounds</b>	<b>309–325</b>
9.1.	Compounds of Titanium	309
9.2.	Ziegler Natta Catalyst	313
9.3.	Chromyl Chloride $CrO_2Cl_2$	315
9.4.	Potassium Permanganate, $KMnO_4$	316
9.5.	Prussian Blue	319
9.6.	Sodium Nitroprusside $Na_2[Fe(CN)_5NO], 2H_2O$	320
9.7.	Sodium Cobaltinitrite, $Na_3[Co(NO_2)_6]$	321
9.8.	Hexamminecobalt (III) Chloride, $[Co(NH_3)_6]Cl_3$	322
	<b>Summary for Review</b>	322
	<b>Typical Questions with answers</b>	323
	<b>Questions (Long Answer, Short Answer and Very Short Answer)</b>	324
<b>10</b>	<b>Theory of Qualitative and Quantitative Inorganic Analysis</b>	<b>326–376</b>
10.1.	Analysis of Basic Radicals	326
10.2.	Chemical Equilibrium – The Basis for Qualitative Analysis	329
10.3.	Analysis of Various Groups of Basic Radicals	330
10.4.	Scheme for Acids Radicals	345
10.5.	Tests of Special Combination of Anionic Constituents	353
10.6.	Interfering Radicals and Their Removal	360
10.7.	Gravimetry	363
10.8.	Precipitation from Homogeneous Solution	364
10.9.	Physical Properties of Precipitates	365
10.10.	Factors that Determine the Particle Size of Precipitates	366
10.11.	Colloidal Particles	367
10.12.	Purity of Precipitates	369
10.13.	Fractional Precipitation	370
	<b>Summary for Review</b>	372
	<b>Typical Questions with Answers</b>	372
	<b>Questions (Long answer, Short answer and Very short answer)</b>	373
