Chapter 1. Internet Structure, Protocols, and Access with an Eye to Intranets

1.1	Overview	1
1.1.1	The Internet/Intranet Landscape	1
1.1.2	The Scope of This Text	4
1.1.3	The Internet: A Short Retrospective	8
1.1.4	The TCP/IP Standardization Approach for Internet and Intranets	23
1.1.5	Related Networks	25
1.1.6	Network Technologies for Intranets	27
1.2	Internet Protocol Model Overview	30
1.2.1	The Need for Multiple Protocols	31
1.2.2	ISO Seven-Layer Reference Model	32
1.2.3	The TCP/IP Internet Layering Model	33
1.2.4	Interconnection Approach	38
1.3	Internet Addresses: Foundations for Internet and Intranets	39
1.3.1	Addressing Scheme	40
1.3.2	Network Byte Order	44
1.3.3	Domain Name Server and IP Addresses	45
1.3.4	Mapping Internet Addresses to Physical Addresses	45
1.4	Internet Protocol: Basis for Internet and Intranets	47
1.4.1	Connectionless Datagram Delivery	47
1.4.2	The Internet Datagram	48
1.4.3	IP Routing Concepts	50
1.4.4	Table-Driven IP Routing and Next-Hop Routing	53
1.4.5	Routing-Related Protocols	54
1.5	Transport Layer	61
1.5.1	User Datagram Protocol (UDP)	61
1.5.2	Transmission Control Protocol (TCP)	62
1.6	Upper-Layer Protocols	64
1.6.1	SMTP	64
1.6.2	File Transfer Protocol	66
1.6.3	Trivial File Transfer Protocol (TFTP)	69
1.6.4	TELNET	69
1.6.5	Other Browsing/Access Applications	71

1.7	Internet Access	71
1.7.1	Accessing the Internet	71
1.7.2	PPP	77
1.7.3	SLIP	80
1.7.4	PPP versus SLIP	83
1.7.5	PPP and SLIP Applications: Home Access	84
1.8	Internet Applications	85
1.8.1	Navigation Tools	85
1.8.2	Other Internet Applications	88
1.9	Future of the Internet and Internet-Related Applications	91
1.9.1	New Backbone Connection Schemes	91
1.9.2	Improved Access Approaches	95
1.9.3	A Replacement for IP	95
1.9.4	Support of Electronic Commerce	96
1.10	Conclusion	97
	References	98

Chapter 2. Router Technology 101

2.1	Introduction	102
2.2	Network Fundamentals (OSI Layers)	103
2.2.1	Hubs	104
2.2.2	Bridges	104
2.2.3	Routers	105
2.2.4	Router/Bridge/Hub Application Example	108
2.3	Internet Routing	109
2.3.1	Routing Protocols	110
2.3.2	Routing Security	116
2.4	New Developments	118
2.4.1	Switch-Based Routing	118
2.4.2	Routing in Software	120
2.4.3	Multicasting	121
2.4.4	Mobile Routing	122
2.4.5	New IP Addressing	124
2.5	Router Market	125
2.5.1	Router Vendors	125
2.5.2	Internetwork at Home	126
2.6	Conclusion	127
	References	128

Chapter 3. Internet and Intranet Web Server Technology, Access, and Protocols 131

3.1	Introduction	131
3.1.1	Web's Roots	132
3.1.2	Global Access to Information	135
3.2	Overview of HyperText Markup Language (HTML)	136
3.2.1	HTML 3.0 and Higher	137
3.3	Overview of HyperText Transfer Protocol (HTTP)	140
3.3.1	Web Browsers: HTTP's User-Level Peer	143
3.4	Web Servers	144
3.4.1	Transport Issues	149

3.5	Web Access	151
3.5.1	Connection Modes	151
3.5.2	Accessing a Web Server: Practical Considerations	151
3.5.3	Publishing on a Web Server	154
3.6	Security	155
3.6.1	Secure HTTP	156
3.6.2	Secure Sockets Layer	157
3.6.3	Comparison	158
3.7	Related Web Capabilities	159
3.7.1	Network News Transport Protocol (NNTP) vis-à-vis WWW	159
3.7.2	Gopher vis-à-vis WWW	161
3.7.3	Wide Area Information System vis-à-vis WWW	161
3.7.4	File Transfer Protocol vis-à-vis WWW	162
3.8	World Wide Web Proxies	162
3.9	Future of the Web	163
3.9.1	Trends	163
3.9.2	Virtual Reality Modeling Language (VRML)	165
	References	165

Chapter 4. HTML Technology, Applications, and Examples 169

4.1	Introduction	169
4.1.1	Origins of HTML	169
4.1.2	Web Architecture and Usage	170
4.1.3	Language Evolution	171
4.1.4	Key Browsers	175
4.1.5	Miscellaneous Definitions	176
4.1.6	File-Naming Issues in HTML	178
4.2	The Nuts and Bolts of HTML	179
4.2.1	HTML Elements	181
4.2.2	Document Structure	187
4.2.3	HTML Tags and Usages	188
4.2.4	Hyperlinks	190
4.2.5	Linking to Areas within Documents	190
4.2.6	Uniform Resource Locators	191
4.2.7	Lists	192
4.2.8	Graphics	194
4.2.9	An Example of HTML Page Preparation	195
4.2.10	Displaying Preformatted Text in Its Original Form	197
4.2.11	Collections of Hypertext Documents	199
4.2.12	Advantages and Disadvantages of Using HTML	200
4.2.13	The Server Side of HTML	201
4.2.14	HTML Standards	202
4.2.15	Outstanding Issues in HTML	204
4.2.16	Which Web Development Language Should You Use?	204
4.2.17	Putting It All Together	206
4.3	Tools and Guides	208
4.3.1	HTML Authoring Tools	208
4.3.2	Word Processing Tools	208
4.3.3	Browser Editing Tools	208
4.3.4	HTML Document Conversion Tools	208
4.3.5	HTML Quality Tools	208
4.3.6	HTML Check Toolkit	209
4.3.7	Writing Style	209
4.4	Browsers	209

4.5	Practical Considerations for Internet and/or Intranet Pages	211
4.5.1	Entry Requirements	212
4.5.2	Designing Your Internet/Intranet Page	212
4.5.3	HTML Application Example	213
4.6	Beyond HTML	213
4.6.1	VRML	217
4.6.2	Java Language	219
4.6.3	WebObjects	221
4.7	Future Direction in HTML	221
	References	

Chapter 5. Browsing Systems for the Web, the Internet, and Intranets 225

5.1	Overview	225
5.2	Browser Features and Capabilities	227
5.2.1	Background	227
5.2.2	Basic Functionality	230
5.2.3	Features to Look For	232
5.2.4	Sample of Available Browsers	233
5.3	Netscape	234
5.3.1	The History of Netscape	234
5.3.2	Netscape Navigator Browser	235
5.3.3	Basic Key Features	236
5.3.4	The Navigator's Performance	236
5.3.5	Secure E-mail	237
5.3.6	Security	238
5.3.7	Threaded Discussion Groups	240
5.3.8	Frames	240
5.3.9	Inline Plug-Ins	242
5.3.10	Java Support	243
5.3.11	Programming with the Netscape Scripting Language	244
5.3.12	HTML Support	244
5.3.13	Standards	245
5.3.14	Product Information	246
5.3.15	Supported Platforms for the Navigator	246
5.3.16	Other Utilities	247
5.3.17	Assessment By Given Categories	249
5.4	Mosaic	251
5.4.1	History	251
5.4.2	Spyglass Enhanced Mosaic	251
5.4.3	Features	252
5.4.4	Platform Requirements	255
5.4.5	Comparison between Netscape Navigator and Enhanced Mosaic	256
5.5	Other Browsers	256
5.5.1	Spry's Mosaic	256
5.5.2	NetManage's WebSurfer	258
5.5.3	DOSLynx (DOS)	261
5.5.4	InternetWorks (Windows)	261
5.5.5	Microsoft Internet Explorer	262
5.6	Next-Generation Web Browsing	263
5.6.1	SGI's WebSpace	263
5.6.2	Sun's HotJava	263

5.7 Using Browsers for Commercial Gain 264

 5.7.1 Opportunities and Motivations in the Internet and Intranets 264

 5.7.2 Some Issues Needing Resolution 265

 5.7.3 Access from On-Line Services 266

References 267

Chapter 6. Building a Corporate Web Site: Practical Issues on Servers and Application Software 271

6.1 Background: Using the WWW for Business 271

 6.1.1 Examples of Businesses on the Internet 273

 6.1.2 Case Study 276

6.2 Getting Connected 278

 6.2.1 Dial-Up 279

 6.2.2 Leased Lines 279

 6.2.3 Categories of Service 279

 6.2.4 Domain Name Services 282

6.3 Elements of a Web Service 283

 6.3.1 Client Software: Practical Factors 283

 6.3.2 Client Software Functions 284

 6.3.3 Pointing to the Server 285

 6.3.4 Creating a Home Page for the Web Server: Practical Issues 287

 6.3.5 Supporting Forms 289

6.4 Security Issues: Practical Considerations 290

 6.4.1 Vulnerabilities of the Web 291

 6.4.2 Securing a Web Site 291

6.5 Management Issues Related to Web Server Setup 292

 6.5.1 What Is a Webmaster? 292

 6.5.2 Getting the Software 293

 6.5.3 Server Establishment 294

 6.5.4 Anticipating Usage Patterns 295

 6.5.5 Network Connections: Practical Issues 295

 6.5.6 Server Hardware Selection 298

 6.5.7 Server Software Installation 301

 6.5.8 Installing and Configuring the CERN HTTPD Web Server 301

 6.5.9 Setting Up the NCSA HTTPD 302

 6.5.10 Information Architecture and Content 305

 6.5.11 Server Configuration Files 306

 6.5.12 Caching 307

 6.5.13 Firewalls 308

 6.5.14 Proxy Gateways 309

 6.5.15 Server Strategies 309

 6.5.16 Maintenance and Housekeeping Utilities 309

6.6 Novell's WWW Service Alternative 310

6.7 Extensions and Applications on the Web 311

 6.7.1 External Viewers and Other File Types 311

 6.7.2 Running Client Applications 312

 6.7.3 Common Gateway Interface (CGI) Programs 312

 6.7.4 Forms 313

 6.7.5 Searching and Indexing 313

6.8 Legal and Ethical Issues 315

6.9 Final Observations 316

References 317

Chapter 7. On-Line Services: Technology, Applications, and Vendors	319
7.1 Overview	319
7.2 Definition of On-Line Services	319
7.3 History of On-Line Services	320
7.4 The On-Line Services Market: Trends	320
7.5 On-Line Services Industry Makeup	321
7.6 Technology Trends	325
7.7 Profiles of Major On-Line Service Providers	326
7.7.1 America Online	326
7.7.2 CompuServe Information Services	331
7.7.3 Prodigy	335
7.7.4 GENie	338
7.7.5 Microsoft Network	339
References	341
Chapter 8. Broadband Communications for the Internet and Intranets	343
8.1 Introduction	343
8.2 Services and Requirements Driving the Need for Broadband	344
8.2.1 New Services Desired on the Internet	344
8.2.2 Electronic Commerce on the Internet	347
8.2.3 Growth of the Internet	348
8.2.4 How to Do It	350
8.3 Network Architectures Supporting Broadband	351
8.3.1 Approaches to Broadband	351
8.3.2 Integrated Digital Services Network (ISDN)	354
8.3.3 ADSL	357
8.3.4 HDSL	359
8.3.5 BDSL	360
8.3.6 VDSL	361
8.3.7 Wireless	361
8.3.8 HFC/Cable Modems	361
8.3.9 FTTC	362
8.3.10 FTTH	363
8.3.11 FTTB	363
8.3.12 Comparison of the Various Architectures	363
8.4 Broadband Carrier Services for Intranets and for the Internet	363
8.4.1 Frame Relay and SMDS	363
8.4.2 ATM	364
8.4.3 Cable TV	368
8.4.4 Economics: Approaches and Direction	370
8.5 Example of Broadband-Based Application: WebTV	372
8.5.1 General Questions on Interacting	374
8.5.2 Questions about Hardware, Software, and Interact Technology Features and Availability	378
References	381
Chapter 9. Virtual Reality Applications on the Internet and Intranets	383
9.1 Virtual Reality Technology: A Synopsis	384
9.1.1 Baseline Hardware to Support VR	385
9.1.2 Software and Tools	387

9.1.3	Current Limitations of VR Technology	391
9.1.4	Networking	393
9.2	Evolving Virtual Reality Applications	394
9.2.1	Market Status	395
9.2.2	Examples of Applications	396
9.2.3	Application Aspects	400
9.2.4	Technology Concerns	402
9.3	Opportunities for Corporate Education/Training	402
9.4	Opportunities for Marketing and Business Applications	406
9.5	Internet's Next Killer-App	409
	References	409

Appendix Company Information for Key Browsers 411

Glossary	413
Index	417
