

CHAPTER		PAGE
	4.2 Interpretations and Validity	64
	4.3 Restricted Inferences with Existential Quantifiers	80
	4.4 Interchange of Quantifiers	87
	4.5 General Inferences	89
	4.6 Summary of Rules of Inference	98
5.	FURTHER RULES OF INFERENCE	101
	5.1 Logic of Identity	101
	5.2 Theorems of Logic	108
	5.3 Derived Rules of Inference	113
6.	POSTSCRIPT ON USE AND MENTION	121
	6.1 Names and Things Named	121
	6.2 Problems of Sentential Variables	123
	6.3 Juxtaposition of Names	125
7.	TRANSITION FROM FORMAL TO INFORMAL PROOFS	128
	7.1 General Considerations	128
	7.2 Basic Number Axioms	129
	7.3 Comparative Examples of Formal Derivations and Informal Proofs	131
	7.4 Examples of Fallacious Informal Proofs	138
	7.5 Further Examples of Informal Proofs	142
8.	THEORY OF DEFINITION	151
	8.1 Traditional Ideas	151
	8.2 Criteria for Proper Definitions	152
	8.3 Rules for Proper Definitions	155
	8.4 Definitions Which are Identities	161
	8.5 The Problem of Division by Zero	163
	8.6 Conditional Definitions	165
	8.7 Five Approaches to Division by Zero	166
	8.8 Padoa's Principle and Independence of Primitive Symbols	169
PART II—ELEMENTARY INTUITIVE SET THEORY		
9.	SETS	177
	9.1 Introduction	177
	9.2 Membership	177
	9.3 Inclusion	181
	9.4 The Empty Set	184

CHAPTER		PAGE
	9.5 Operations on Sets	184
	9.6 Domains of Individuals	187
	9.7 Translating Everyday Language	189
	9.8 Venn Diagrams	195
	9.9 Elementary Principles About Operations on Sets	202
10.	RELATIONS	208
	10.1 Ordered Couples	208
	10.2 Definition of Relations	210
	10.3 Properties of Binary Relations	213
	10.4 Equivalence Relations	218
	10.5 Ordering Relations	220
	10.6 Operations on Relations	225
11.	FUNCTIONS	229
	11.1 Definition	229
	11.2 Operations on Functions	234
	11.3 Church's Lambda Notation	242
12.	SET-THEORETICAL FOUNDATIONS OF THE AXIOMATIC METHOD	246
	12.1 Introduction	246
	12.2 Set-Theoretical Predicates and Axiomatizations of Theories	249
	12.3 Isomorphism of Models for a Theory	260
	12.4 Example: Probability	274
	12.5 Example: Mechanics	291
