

An aerial photograph of a city grid with a river, serving as the background for the book cover. The top half shows a wide river with a bridge, and the bottom half shows a dense urban grid with a river winding through it.

# MICROPROCESSORS AND INTERFACING

## 1 An Overview of Computers and Microprocessors

- Computers: An Overview 1.1
- Information Representation in Computer systems 1.2
- Organization of Computer Systems 1.5
- Architectures of Computers 1.6
- Interrupts and Interrupt Processing 1.8
- Input/Output 1.8
- Advances in Computer Architecture 1.8
- RISC and CISC 1.9
- Developments in Electronics 1.10
- Microprocessor Evolution 1.10
- Other Widely used Microprocessors 1.12
- Review Questions and Problems* 1.13

## 2 8085 and 8086 Microprocessor Architectures

- The 8085 Microprocessor Family Overview 2.1
- Registers in 8085 2.3
- 8085 Machine Instructions 2.4
- Main Features of 8086 2.7
- Important 8086 Pin Diagram/Description 2.7
- The 8086 Microprocessor Family—An Overview 2.9
- 8086 Internal Architecture 2.10
- The BIU 2.12
- Introduction to Programming The 8086 2.14
- A Basic 8086 Microcomputer System 2.17
- Review Questions and Problems* 2.22

## 3 8086 Family Assembly Language Programming—Introduction

- Program Development Steps 3.1
- Constructing the Machine Codes for 8086 Instructions 3.11
- Writing Programs for use With an Assembler 3.17
- Assembly Language Program Development Tools 3.23
- Review Questions and Problems* 3.27

1.1–1.13

2.1–2.22

3.1–3.28

<b>4</b>	<b>Implementing Standard Program Structures in 8086 Assembly Language</b>	
	Simple Sequence Programs	4.1
	Jumps, Flags, and Conditional Jumps	4.7
	If-Then, If-Then-Else, and Multiple If-Then-Else Programs	4.13
	While-Do Programs	4.19
	Repeat-Until Programs	4.21
	Instruction Timing and Delay Loops	4.28
	Review Questions and Problems	4.30
<b>5</b>	<b>Strings, Procedures, and Macros</b>	
	The 8086 String Instructions	5.1
	Writing and Using Procedures	5.6
	Writing and Using Assembler Macros	5.34
	Review Questions and Problems	5.36
<b>6</b>	<b>8086 Instruction Descriptions and Assembler Directives</b>	
	Instruction Descriptions	6.1
	Assembler Directives	6.29
	Assume	6.29
	DB—Define Byte	6.29
	DD—Define Doubleword	6.29
	DQ—Define Quadword	6.30
	DT—Define Ten Bytes	6.30
	DW—Define Word	6.30
	END—End Program	6.30
	ENDP—End Procedure	6.30
	ENDS—End Segment	6.30
	EQU—Equate	6.30
	EVEN—Align on Even Memory Address	6.31
	EXTRN	6.31
	GLOBAL—Declare Symbols as Public or Extern	6.31
	GROUP—Group-Related Segments	6.31
	INCLUDE—Include Source Code From File	6.32
	LABEL	6.32
	LENGTH—Not Implemented in IBM MASM	6.32
	NAME	6.32
	OFFSET	6.32
	ORG—Originate	6.32
	PROC—Procedure	6.32
	PTR—Pointer	6.33
	SEGMENT	6.33
	SHORT	6.33
	TYPE	6.33
<b>7</b>	<b>C, A High-level Language for System Programming</b>	
	Introduction—A Simple C Program Example	7.1
	Program Development Tools For C	7.3
	Programming in C	7.7
	Review Questions and Problems	7.47
<b>8</b>	<b>Semiconductor Memories and Interfacing</b>	
	Types of Memories	8.1
	Memory Device Configurations	8.3
	Read Only Memories and Static RAM Interfacing Techniques	8.6

Dynamic Memories	8.6	
DRAM Interfacing: To the System Bus	8.9	
Using an 82C08 DRAM Controller IC with an 8086	8.9	
Dynamic RAM Timing in Microcomputer Systems	8.12	
Page Mode and Static Column Mode DRAM Systems	8.12	
Error Detecting and Correcting in DRAM Arrays	8.13	
<i>Review Questions and Problems</i>	16	
<b>9 Input and Output Modes and Interfacing</b>		<b>9.1–9.59</b>
Peripheral Devices	9.1	
Input/Output Devices	9.1	
Controllers	9.2	
I/O modes in a Computer system	9.2	
Programmed I/O mode	9.3	
Interrupt Mode of I/O	9.8	
8086 Interrupts and Interrupt Responses	9.10	
Hardware Interrupt Applications	9.20	
8254 Software-Programmable Timer/Counter	9.24	
8259A Priority Interrupt Controller	9.36	
Software Interrupt Applications	9.45	
Direct Memory Access (DMA) Mode I/O	9.46	
I/O Channels	9.57	
<i>Review Questions and Problems</i>	9.58	
<b>10 Digital Interfacing</b>		<b>10.1–10.46</b>
Programmable Parallel Ports and Handshake Input/Output	10.1	
Interfacing a Microprocessor to Keyboards	10.16	
Interfacing to Alphanumeric Displays	10.23	
8279 Circuit Connections and Operation Overview	10.26	
Interfacing to 18-segment and Dot-Matrix LED Displays	10.33	
Interfacing a Microcomputer to Nonmultiplexed LCD Displays	10.34	
Interfacing Microcomputer Ports to High-Power Devices	10.35	
Optical Motor Shaft Encoders	10.40	
<i>Review Questions and Problems</i>	10.43	
<b>11 Analog Interfacing and Industrial Control</b>		<b>11.1–11.57</b>
Review of Operational-Amplifier Characteristics and Circuits	11.1	
Sensors and Transducers	11.7	
D/A Converter Operation, Interfacing, and Applications	11.12	
A/D Converter Specifications, Types, and Interfacing	11.15	
A Microcomputer-Based Scale	11.19	
A Microcomputer-Based Industrial Process-Control System	11.29	
An 8086-Based Process-Control System	11.32	
Developing The Prototype of a Microcomputer-Based Instrument	11.43	
Robotics and Embedded Control	11.44	
Digital Signal Processing and Digital Filters	11.49	
<i>Review Questions and Problems</i>	11.56	
<b>12 Microcomputer System Peripherals</b>		<b>12.1–12.54</b>
System-Level Keyboard Interfacing	12.1	
Microcomputer Displays	12.5	
Computer Mice and Trackballs	12.29	
Computer Vision	12.31	
Magnetic-Disk Data-Storage Systems	12.32	

Optical Disk Data Storage 12.45  
 Printer Mechanisms and Interfacing 12.47  
 Speech Synthesis and Recognition With a Computer 12.49  
 Digital Video Interactive 12.51  
*Review Questions and Problems* 12. 12.52

**13 Computer System and Peripheral Buses**  
 Introduction 13.1  
 Bus Termination 13.1  
 Types of Buses 13.3  
 An Example of Parallel Bus 13.3  
 RS-232 Serial Data Standard 13.17  
 USB 13.22  
 PCIE 13.28  
*Review Questions and Problems* 13.35

**14 Data Communication Interfaces**  
 Introduction to Asynchronous Serial Data Communication 14.1  
 Serial-Data Transmission Methods and Standards 14.7  
 20- and 60-mA Current Loops 14.8  
 Asynchronous Communication Software on The IBM PC 14.20  
 Synchronous Serial-data Communication and Protocols 14.32  
 The GPIB, HPIB, IEEE488 Bus 14.36  
*Review Questions and Problems* 14.38

**15 The 80286, 80386 and 80486 Microprocessors**  
 Multiuser/Multitasking Operating System Concepts 15.2  
 The Intel 80286 Microprocessor 15.10  
 The Intel 80386 32-Bit Microprocessor 15.14  
 The Intel 80486 Microprocessor 15.36  
*Review Questions and Problems* 15.40

**16 An Introduction to the Pentium Processors**  
 The Pentium Processor 16.2  
 Epilogue 16.18  
*Review Questions and Problems* 16.18

**Appendix A** A.1–A.13  
**Appendix B** B.1–B.15  
**Appendix C** C.1–C.28  
**Appendix D** D.1  
**Appendix E** E.1–E.4  
*Review Questions and Problems* 11.1–11.7

*Index* 12.1–12.54
