

Revised Edition

Modern Microeconomics

THEORY AND APPLICATIONS

H.L. AHUJA

S. CHAND

CONTENTS

PART I

SCOPE AND METHODOLOGY OF ECONOMICS

1. Nature and Scope of Economics

3 — 20

Introduction – Changing Perspectives of Economics – The Economic Problem : Scarcity and Choice – Kinds of Resources – Types of output – Central Problems of an Economy : What to Produce; How to Produce; For whom to produce – What Provision should be made for Economic Growth – Microeconomics: what, how and for whom to Produce – Macroeconomics : Whether resources are fully utilised ? – How are the Central problems solved ? Robbins' Definition : Economics is a Science of Scarcity and Choice – Critical Evaluation of Robbins' Definition – Positive Economics, and Normative Economics – Normative Economics and Value Judgements – Questions for Review

2. Production Possibility Curve, Choice and Opportunity

Cost

21 — 30

Choice and Opportunity Cost – The Production Possibility Curve – The Law of Increasing Opportunity Cost – Uses of Production Possibility Curve : Choice and Opportunity Cost; Unemployment; Inefficiency in Production; Economic Growth.

3. Micro and Macro-Economics

31 — 42

Microeconomics – Importance and Uses of Microeconomics – Macroeconomics – Macroeconomics as a Study of Determination of Income and Employment – Macroeconomics and General Level of Prices – Macroeconomics and Theory of Economic Growth – Macroeconomics and Relative Income Shares – Interdependence between Micro and Macroeconomics.

4. Methodology of Economics

43 — 56

Nature of Scientific Theory – Methods of Economic Analysis : Deductive Method – Testing of Economic Hypotheses through Statistical Methods – The Inductive Method – Conclusion : Integration of Two Methods – Nature of Economic Laws and Generalisations – Economic Laws as mere Statements of Tendencies – Scientific Nature of Economic Laws – Economic Laws are less Exact and Definite than Laws of Physical Sciences – Role of Assumptions : Friedman's Views; Questions for Review.

5. Economic Statics and Dynamics

Stationary and Changing Phenomena – Economic Statics – Importance of Economic Statics – Economic Dynamics – Frisch's Time Period Analysis – Expectations and Dynamics : Need and Significance of Economic Dynamics – Comparative Statics.

57 — 66

6. Market Economy and the Role of Price Mechanism

Introduction – Chief Features of a Market Economy – Functioning of the Free Market Economic System – How does Price Mechanism Allocate Resources? – Deciding What to Produce; Deciding How to Produce; Deciding for Whom to Produce; Deciding about Rate of Economic Growth – Solving all Problems Simultaneously – Critical Evaluation of the Working of Market Economy and Price Mechanism – Alternative Economic System – Collapse of the Command Economy – Questions for Review.

67 — 84

PART II

THE THEORY OF DEMAND

7. Demand and Law of Demand

The Meaning of Demand – The Law of Demand – Demand Schedule and Demand Curve – Market Demand Curve – Reasons for the Law of Demand: Why does Demand Curve Slope Downward? — Exceptions to the Law of Demand – Determinants of Demand – Extension and Contraction in Demand – Changes in Demand – Increase and Decrease in Demand – Demand Function and Demand Curve : Market Demand Function – Questions for Review.

87 — 98

8. Demand: Marshall's Cardinal Utility Analysis

Introduction – Assumptions of Cardinal Utility Analysis – Law of Diminishing Marginal Utility – Applications and Uses of Diminishing Marginal Utility – Principle of Equi-Marginal Utility: Consumer's Equilibrium – Limitations of the Law of Equi-Marginal Utility – Derivation of the Demand Curve and the Law of Demand – Critical Evaluation of Marshall's Cardinal Utility Analysis – Questions for Review.

99 — 115

9. Indifference Curve Analysis of Demand

Indifference Curve Approach? – What are Indifference Curves ? Indifference Map – Marginal Rate of Substitution – Principle of Diminishing Marginal Rate of Substitution – Assumptions of Indifference Curve Analysis – Properties of Indifference Curves – Indifference Curves of Perfect Substitutes and Perfect Complements – Budget Line – Budget Space – Consumer's Equilibrium: Maximising Satisfaction – Second Order Condition for Consumer's Equilibrium – Income Effect: Income Consumption Curve – Income Consumption Curve and Engel Curve –

116 — 166

Substitution Effect – Price Effect: Price-Consumption Curve – Decomposing Price Effect into Income and Substitution Effects : Compensating Variation in Income and Equivalent Variation in Income – Price-Demand Relationship: Deriving Law of Demand – Price-Demand Relationship: Normal Goods and Inferior Goods – Price-Demand Relationship: Giffen Goods or Giffen Paradox – Derivation of Individual's Demand Curve from Indifference Curve Analysis – Consumer's Equilibrium and Corner Solution – Complements and Substitutes – Questions and Problems for Review.

Appendix A to Chapter 9: Indifference Curves of Goods and Bads 167— 171

Goods and Bads – Satiation and Point of Bliss – Some Exercises on Goods and Bads.

Appendix B to Chapter 9: Slutsky Substitution Effect 172 — 178

Slutsky Substitution Effect for a Fall in Price – Slutsky Substitution Effect for a Rise in Price – Merits and Demerits of Hicksian and Slutsky Methods – Price Effect Broken up into Income and Substitution Effects : Slutsky Method – Slutsky Equation – Questions for Review.

10. Marshall's Cardinal Utility Analysis vs. Indifference Curve Analysis 179 — 187

Superiority of Indifference Curve Analysis – Is Indifference Curve Analysis 'The Old Wine in a New Bottle'? – A Critique of Indifference Curve Analysis – Questions for Review.

11. Applications and Uses of Indifference Curves 188 — 204

Effect of Subsidies to Consumers – Price Subsidy vs Cash Subsidy – Food-Stamp Programme: In-Kind Food Subsidy – Direct Tax Versus Indirect Tax – Effect of Rationing on Consumer's Welfare – Income-Leisure Choice – Need for Higher Overtime Wage Rate – Offer Curve and Supply Curve of Labour – Income Effect and Substitution Effect of a Change in Wage Rate – Backward-Bending Supply Curve of Labour – Questions for Review.

12. Revealed Preference Theory of Demand 205 — 215

Preference Hypothesis and Strong Ordering – Deriving Demand Theorem from Revealed Preference Hypothesis – Breaking up Price Effect into Substitution Effect and Income Effect – Critical Appraisal of Revealed Preference Theory – Questions for Review.

13. Elasticity of Demand 216 — 250

Various Concepts of Demand Elasticity – Price Elasticity of Demand – Measurement of Price Elasticity – Percentage Method – Mid-point Method of Calculating Percentage Changes – Arc Elasticity of Demand – Total Revenue, Total Expenditure and Price-Elasticity of Demand – Measurement of Price Elasticity at a Point on the Demand Curve –

Comparing Price Elasticity on the Demand Curves – Cross Elasticity of Demand – Income Elasticity of Demand – The Elasticity of Substitution – Relationship between Price Elasticity, Income Elasticity and Substitution Elasticity : Slutsky Theorem – Determinants of Price Elasticity of Demand – Importance of the Concept of Price Elasticity of Demand – Price Consumption Curve and Price Elasticity of Demand - Questions and Problems for Review.

Appendix to Chapter 13 Applications of Elasticity of Demand 251 — 258

Poverty Amidst Plenty – Crop Restriction Programme to Raise Farmers' Income – Why did OPEC fail to keep oil prices high? – Fight against Drugs – Elasticity and Burden of Indirect Tax.

14. Consumer's Surplus 259 — 271

Meaning of Consumer's Surplus – Marshall's Measurement of Consumer Surplus – Measurement of Consumer's Surplus with Indifference Curve Analysis – Critical Evaluation of the Concept of Consumer's Surplus – Applications of Consumer Surplus: Water-Diamond Paradox; Evaluating Loss of Benefit from Tax; Evaluating Gain from Subsidy; Use of Consumer Surplus in Cost-Benefit Analysis.

PART III

THE THEORY OF PRODUCTION AND COST

15. Factors of Production 275 — 286

Factors of Production : Meaning – Classification of Factors of Production – Land : Meaning and Significance – Land as Renewable and Non-Renewable Resource – Inelastic Supply of Land – Capital : Physical and Human – Meaning of Capital – Fixed Capital and Working Capital – Human Capital – Role of Capital – Human Capital, Education and Economic Growth – Human Capital and Sources of US Growth – Labour – Characteristics of Labour – Division of Labour – Entrepreneur – Functions of Entrepreneur.

16. The Theory of Production : Returns to a Factor 287 — 299

Importance of the Theory of Production – Production Function : Transforming Inputs into Output – Concepts of Product – Law of Variable Proportions – Three Stages of the Law of Variable Proportions – The Stage of Operation – Causes of Diminishing Returns to a Factor – Applicability of the Law of Diminishing Returns – Technological Progress and Diminishing Returns.

17. Production Function with Two Variable Factors**300 — 329**

Isoquants – Marginal Rate of Technical Substitution – General Properties of Isoquants – Isoquants of Perfect Substitutes and Complements – Linear Homogeneous Production Function – Cobb-Douglas Production Function – Elasticity of Technical Substitution (Between Factors) – Returns to Scale – Constant Returns to Scale – Divisibility, Proportionality and Constant Returns to Scale – Increasing Returns to Scale – Decreasing Returns to Scale – Varying Returns to Scale – Cobb-Douglas Production Function and Returns to Scale – Returns to Scale and Marginal Returns to a Variable Factor – Isoclines – Production Function and Technological Progress – Questions for Review.

18. Optimum Factor Combination**330 — 347**

The Economic Region of Production – Iso-Cost Line – Least-Cost Combination of Factors : Choice of Inputs – Output Maximisation for a Given Level of Outlay – Expansion Path – Expansion Path of a Linear Homogeneous Production Function – Price Effect : Effect of Change in Factor Price on Factor Usage – Price Effect : Separation of Output Effect and Technical Substitution Effect – Substitute and Complementary Factors – Factor Substitution and Relative Factor Prices – Questions and Problems for Review.

19. Cost of Production and Cost Curves**348 — 384**

The Concepts of Costs: Accounting Costs and Economic Costs; Opportunity Cost – Private Cost and Social Costs – Short-Run Total Costs – Total Fixed and Variable Costs – Sunk Cost – The Short-Run Average Cost Curves – Marginal Cost – The Relationship between the Average and Marginal Cost Curves – Derivation of the Long Run Average Cost Curve – Economies of Scope – Optimum Firm – Why Long-run Average Cost Curve is of U-shape – Long-Run Marginal Cost Curve, External Economies, External Diseconomies and Cost Curves – Learning Curve – L-shaped Long-Run Average Cost Curve : Modern Cost Theory : A Critical Evaluation of L-shaped Long-run Average Cost Curve Concept – Numerical Problems – Questions for Review.

20. Supply and its Elasticity**385 — 397**

The Meaning of Supply – Law of Supply – Explanations of the Law of Supply : Why does Supply Curve Generally Slope Upward? – The Concept of Supply Curve and Perfect Competition – Changes in Supply : Increase and decrease in Supply – Factors Determining Supply – Elasticity of Supply – Measurement of Elasticity of Supply at a Point on the Supply Curve – Factors Determining Elasticity of Supply – Questions and Problems for Review.

PART IV
THE THEORY OF FIRM AND PRICING
IN VARIOUS MARKET STRUCTURES

21. Main Market Forms and Concepts of Revenue

401 — 418

Meaning of Market – Classification of Market Forms : Perfect Competition; Monopolistic Competition; Oligopoly; Monopoly – Market Classification and Cross Elasticity of Demand – Concepts of Average Revenue and Marginal Revenue – Relationship between AR and MR Curves – Average Revenue, Marginal Revenue and Price Elasticity of Demand – Questions for Review.

Appendix to Chapter 21 : Mathematical Treatment of AR and MR Curves

419 — 421

Relationship between Linear AR and MR Curves - Relationship between AR, MR and Price Elasticity of Demand.

22. Equilibrium of the Firm – A General Analysis

422 — 439

Meaning of Firm's Equilibrium – Objectives of the Firm : Profit Maximisation – Achieving Secure Profit : Security Objective – Satisficing Objective – Sales Maximisation – Utility Maximization – Hall and Hitch's Mark-up Pricing Approach : Seeking Normal Profits – Staff Maximisation – Growth Maximisation – Case for Maximisation of Profits – Equilibrium of the Firm : Maximising Profits : Firm's Equilibrium with Total Revenue-Total Cost Approach; Marginal Revenue-Marginal Cost Approach – Second Order Condition for Equilibrium of the Firm – Numerical Problems – Questions and Problems for Review.

23. Equilibrium of the Firm and Industry under Perfect Competition

440 — 465

Meaning and Conditions of Perfect Competition – The Demand Curve of a Product Facing a Perfectly Competitive Firm – Equilibrium of the Firm under Perfect Competition : Short-run Equilibrium of the Firm ; Long-run Equilibrium of the Firm – Numerical Problems – Economic Profits and Accounting Profits – The Equilibrium of the Industry : Short-run – Equilibrium of the Industry ; Long-run Equilibrium of the Industry – The Concept of Supply Curve – Short-Run Supply Curve of the Perfectly Competitive Firm – Short-Run Supply Curve of the Competitive Industry – Long-Run Supply Curve of the Industry under Perfect Competition – Numerical Problems – Questions for Review.

Appendix to Chapter 23 Firm's Equilibrium Under Perfect Competition Under Differential Cost Conditions

466 — 470

Short-run Equilibrium of the Firm under Differential Cost Conditions – Long-run Equilibrium of the Firm under Differential Cost Conditions – Differential Cost Conditions and Economic Rent.

- 24. Price Determination under Perfect Competition** 471 — 496
- Two Approaches in Price Theory: Partial and General Equilibrium Analyses
 – Price Determination : Equilibrium between Demand and Supply –
 Changes in Market Equilibrium – Importance of Time Element in Price
 Theory – Demand-Supply Model of Pricing : Mathematical Analysis –
 Determination of Market Price – Determination of Short-Run Price –
 Determination of Long-Run Normal Price under Perfect Competition and
 Derivation of Long-Run Supply Curve – The Concept of Producer Surplus
 – Efficiency of Perfectly Competitive Equilibrium – Economic Efficiency
 and Equity.
- 24.A. Stability of Equilibrium and Cobweb Model** 497 — 504
- Stable and Unstable Equilibrium – Walras Price Adjustment Approach –
 Stability of Equilibrium : Marshall's Quantity Adjustment Approach – Static
 Stability vs Dynamic Stability – Dynamic Stability with Lagged Adjustment:
 Cobweb Model – Questions for Review.
- 25. Applications of Demand and Supply Analysis** 505 — 519
- Price Control and Rationing – Rent Control – Minimum Price Fixation –
 Incidence of Taxation – Applications of Demand and Supply Analysis to
 Agriculture: Effect of Unplanned Fluctuations in Agricultural Supply on
 Prices; Effect of Unplanned Fluctuations in Production on Incomes of the
 Farmers; Stabilisation of Agricultural Prices and Incomes – Buffer Stock
 Operations by the Government – Questions for Review.
- 26. Price and Output under Monopoly** 520 — 552
- Monopoly : Its Meaning and Conditions – The Nature of Demand and
 Marginal Revenue Curves under Monopoly – Price and Output Equilibrium
 under Monopoly – Long-run Equilibrium Under Monopoly - Sources or
 Reasons of Monopoly – Price-Output Equilibrium and Perfectly
 Competitive Equilibrium Compared – Monopoly, Allocative Inefficiency
 and Dead-Weight Loss – Measurement of Monopoly Power – Absence
 of Supply curve under Monopoly – Rule of Thumb for Pricing – Regulation
 of Monopoly – Multi-Plant Monopoly : Price and Output Equilibrium ;
 Allocation of Production between the Plants – Numerical Problems –
 Questions and Problems for Review.
- 27. Price Discrimination** 553 — 570
- Meaning of Price Discrimination – When is Price Discrimination Possible?
 – When is Price Discrimination Profitable ? – Price and Output Equilibrium
 under Price Discrimination – Equilibrium under Price Discrimination in
 the Dumping Case – Perfect Price Discrimination : Output Determination

Output Determination – Comparing Simple Monopoly Output and Discriminating Monopoly Output–Price Discrimination and Social Welfare – Social Justification of Price Discrimination; Price Discrimination and Equity – Numerical Problems on Price Discrimination.

Appendix to Chapter 27 : Peak-Load Pricing and Two – Part Tariff Pricing

571 – 575

Peak-Load Pricing : Advantages and Disadvantages – Two Part Tariff Pricing : Two–Part Tariff Pricing with Consumers having Different Demand Functions.

28. Price and Output under Monopolistic Competition

576 – 606

Imperfect Competition : Monopolistic Competition and Oligopoly – Product Differentiation and Monopolistic Competition – The Nature of Demand and Marginal Revenue Curves under Monopolistic Competition – Important Features of Monopolistic Competition. Price-Output Equilibrium under Monopolistic Competition: Individual Firm's Equilibrium and Group Equilibrium – The Concept of Excess Capacity – Causes of Excess Capacity - Benefits of Excess Capacity - Equilibrium under Monopolistic Competition : Chamberlin's Alternative Approach – Critique of the Doctrine of Excess Capacity – Selling Costs and Advertising – Optimum Level of Advertising Outlay (Selling Cost) : With Price and Product Design as Constants – Optimum Level of Advertising Expenditure with both Price and Output as Variables – Effect of Advertising (Selling Costs) on Price Elasticity of Demand – Effect of Advertising (Selling Costs) on Price and Output – Price-Output Equilibrium under Monopolistic Competition Compared with that under Perfect Competition – Monopolistic Competition and Economic Indefficiency – Questions and Problems for Review.

29. Price and Output under Oligopoly

607 – 629

Characteristics of Oligopoly – Are Price and Output under Oligopoly Indeterminate? – Various Approaches to Price-Output Determination under Oligopoly – Collusive Oligopoly : Cartels – Price leadership – Price and output Determination under Low-Cost Price Leadership – Price and Output Determination under Price Leadership by Dominant Firm – Difficulties of Price Leadership. Kinked-Demand Curve Oligopoly Theory – Why Price Rigidity under Oligopoly ? Critical Appraisal of Kinked Demand Curve Theory – Prisoners' Dilemma and Oligopoly Theory: Prisoners' Dilemma and Oligopolistic Behaviour – The theory of Contestable Markets – Questions and Problems for Review.

Cournot's Duopoly Model – Cournot's Approach to Equilibrium – Cournot's Duopoly Equilibrium Explained with the Aid of Reaction Curves – A Critique of Cournot's Oligopoly Model – Chamberlin's Oligopoly Model : Chamberlin's Approach to Stable Equilibrium under Oligopoly – Stackelberg Model. Questions and Problems for Review.

30. Sales Maximisation Model of Oligopoly **646 — 651**

Sales Maximisation vs. Profit Maximisation – Sales Maximisation: Price-Output Determination – Emphasis on Non-Price Competition – Sales Maximisation Model : Optimal Advertising Expenditure – Critical Appraisal of Sales Maximisation Theory.

31. Theory of Games and Competitive Strategy **652 — 666**

Introduction – Cooperative and Non-Cooperative Games – Dominant Strategy – Choice of an Optimal Strategy in the Absence of Dominant Strategy – The Nash Equilibrium-Neumann-Morgenstern Game Theory : Maximin and Minimax Strategies – The Critical Appraisal of Neumann – Morgenstern Strategy – Prisoners' Dilemma and Oligopoly Theory – Repeated Games and Tit-for-Tat Strategy – Strategic Moves : Commitment, Threats and Credibility – Entry Deterrence.

PART V

THE THEORY OF DISTRIBUTION

32. The Theory of Distribution : A General View **669 — 706**

Functional vs. Personal Distribution – Theory of Distribution as a Special Case of the Theory of Price – Micro and Macro Theories of Distribution – Marginal Productivity Theory of Distribution – Critical Evaluation of Marginal Productivity Theory – Concepts of Productivity : Marginal Revenue Product (MRP) and Value of Marginal Product (VMP) – A Competitive Firm's Equilibrium regarding Factor Employment : General Conditions – Derivation of Demand Curve in Case of a Single Variable Factor – Derivation of Demand Curve for a Factor when all Factors are Variable – Determination of Factor Prices under Perfect Competition : Pricing of Factors under Imperfect Competition in the Product Market – Determination of Factor Prices under Monopsony – Determinants of Demand for Factors – Euler's Theorem and Product Exhaustion Problem – Hicks-Samuelson's Solution to the Product Exhaustion Problem – Questions and Problems for Review.

33. Wage Determination in Competitive and Imperfectly Competitive Markets

707 — 734

Supply of Work Effort, Income and Leisure – Effect of Wage Increase on Work Effort : Income Effect and Substitution Effect – Wage Offer Curve and Supply Curve of Labour – Wage Determination under Perfect Competition in the Labour Market – Wage Determination under Monopsony – Exploitation of Labour – Role of Trade Unions and Collective Bargaining in Raising Wages – Wage Determination under Collective Bargaining: Bilateral Monopoly Model – Why Wage Rates Differ ?

Appendix to Chapter 33 : An Application of the Theory of Wages

735 — 739

Fixation of Minimum Wages – Effect of Fixation of Minimum Wages – Case for Minimum Wage.

34. The Theory of Rent

740 — 758

Concepts of Rent – Ricardian Theory of Rent : Scarcity Rent and Differential Rent – Critical Evaluation of Ricardian Theory of Rent – Explaining Determination of Land Rent through Demand and Supply – Land Rent, Cost and Price – Modern Theory of Rent : Economic Rent as a Surplus over Transfer Earnings – Quasi Rent.

35. Alternative Theories of Interest

759 — 776

Introduction : – Classical Theory of Interest – Critical Appraisal of the Classical Theory of Interest – Loanable Funds Theory of Interest – Critical Evaluation of Loanable Funds Theory – Keynes' Liquidity Preference Theory of Interest – Critical Appraisal of Keynes' Liquidity Preference Theory of Interest – Questions for Review.

36. The Theory of Profits

777 — 783

Introduction – Profits as a Dynamic Surplus: Clark's Dynamic Theory – Schumpeter's Innovation Theory of Profits – Risk, Uncertainty and Profits: Knight's Theory of Profits – Questions for Review.

PART VI

GENERAL EQUILIBRIUM ANALYSIS AND WELFARE ECONOMICS

37. General Equilibrium Analysis

787 — 803

Partial Equilibrium Analysis and General Equilibrium Analysis – General Equilibrium of Exchange and Consumption : Distribution of Goods between Individuals – Edgeworth Box and General Equilibrium of Production – Transformation Curve and General Equilibrium of Production – General Equilibrium of Production and Exchange (Consumption) – General Equilibrium and Perfect Competition – Perfect

Competition and General Equilibrium of Exchange – Perfect Competition and General Equilibrium of Production – Perfect Competition and General Equilibrium of Production and Exchange – General equilibrium determines only relative prices – Questions for Review.

38. Welfare Economics: An Introduction 804 — 808

What Welfare Economics is about? – Three Concepts of Social Welfare – Role of Value Judgements in Welfare Economics – Questions for Review.

39. Economic Efficiency and Pareto Optimality 809 — 823

Notion of Pareto Optimality and Economic Efficiency – Pareto Criterion of Social Welfare – Marginal Conditions of Pareto Optimality – The Optimum Distribution of Products among the Consumers : Efficiency in Exchange – Optimum Allocation of Factors : Pareto Efficiency in Production – Optimum Direction of Production : Efficiency in Product-Mix – The Second Order and Total Conditions of Pareto Optimality – A Critical Evaluation of Pareto Criterion and Pareto Optimality – Prof. Amartya Sen's Critique of Pareto Optimality – Perfectly Competitive Equilibrium and Pareto Optimality – Fundamental Theorem of Welfare Economics and its Critique.

40. Market Failures, Externalities and Public Goods 824 — 834

– Monopoly as an Obstacle to the Attainment of Pareto Optimality – Externalities and Pareto Optimality – Public Goods and Market Failures – Free-Rider's Problem – Public Goods and Pareto Efficiency.

41. New Welfare Economics : Compensation Principle 835 — 842

Kaldor-Hicks Welfare Criterion : Compensation Principle – Scitovsky's Paradox – Scitovsky's Double Criterion of Welfare – A Critique of the Compensation Principle – Bergson Social Welfare Criterion – Questions for Review.

42. Social Welfare Function 843 — 848

Bergson-Samuelson Social Welfare Function – Social Welfare Function and Value Judgements – Grand Utility Possibility Frontier and Point of Constrained Bliss – A Critical Evaluation of Bergson-Samuelson Social Welfare Function – Prof. Amartya Sen's Critique.

PART VII

ASYMMETRIC INFORMATION, INTERTEMPORAL ANALYSIS AND CHOICE UNDER UNCERTAINTY

43. Markets with Asymmetric Information 851 — 866

Introduction – The Market for Lemons – Asymmetric Information and Market Failure – Measures Adopted to Solve the Problem of Adverse

Selection – The Insurance Market and Adverse Selection – The Problem of Moral Hazard – Moral Hazard and Allocative Inefficiency – Market Signalling – The Principal-Agent Problem – Questions for Review.

44. Intertemporal Choice and Borrowing - Borrowing - Lending 867 — 878
Equilibrium

Introduction – Intertemporal Choice : Equilibrium of a Lender – Effect of Changes in Rate of Interest on Supply Curve of Lending – Intertemporal Choice : Equilibrium of a Borrower – Borrowing-Lending Equilibrium : Determination of Rate of Interest – Intertemporal Choice : Production and Consumption Decisions – Intertemporal Equilibrium : Investment, Borrowing and Lending–Determination of Market Interest Rate with Saving and Investment, Borrowing and Lending – Questions for Review. 879 — 904

45. Investment Decision Analysis

Introduction – Stocks Versus Flow_s – Discounting and Present Values – Value of a Bond – Effective Yield and Risk – Capital Investment Decision: Net Present Value Criterion – Numerical Problems – Present Value of an Annuity – Effect of Change of Rate of Interest on Present Value – Internal Rate of Return Method – Comparison of NPV and IRR Methods – Profitability Index (PI) Method – The Level of Investment Expenditure and Capital Rationing – Investment Decision by Consumers – Determination of Interest : A Complete Analysis – Questions for Review. 905 — 905

Appendix to Chapter 46 : Present Value of Rupees 906 — 920

46. Choice under Risk and Uncertainty

Introduction – Risk and Decision-Making, Preferences Toward Risk – Insurance and Risk Premium – Reducing Risk : Diversification, Insurance – Risk-Return Trade off and Choice of an Investment Portfolio – Questions for Review.
