NETWORK PROGRAMMING IN C

BARRY NANCE

A PRENTICE HALL COMPUTER PUBLISHING REPRINT

CONTENT OVERVIEW

Introduction.....	1
-------------------	---

Part I Local Area Networks

Chapter 1	The Basics of Networking.....	9
Chapter 2	Multiuser Concepts.....	41
Chapter 3	PC-to-PC Communications Concepts.....	63

Part II Network Programming Techniques

Chapter 4	DOS-Level Programming.....	103
Chapter 5	PC-to-PC NETBIOS Programming.....	145
Chapter 6	IPX and SPX Programming.....	175
Chapter 7	Testing and Debugging Your Program.....	207
Chapter 8	Network Applications.....	219

Part III Reference

DOS Services for Network Programming.....	257
PC LAN Program Services.....	275
Novell's Extended DOS Services.....	283
OS/2 Services.....	345
NETBIOS Functions.....	359
IPX and SPX Functions.....	391

Part IV Appendixes

Appendix A	Source Listing for File/Record Collision Tester.....	419
Appendix B	Source Listing for NETBIOS Microscope.....	461
Appendix C	Source Listing for RPE.C.....	479
Appendix D	Source Listing for REMOTE.C.....	497
Appendix E	Source Listing for the Postman Program.....	511
Appendix F	Source Listing for the Electronic Mail Program.....	541
Appendix G	Source Listing for NETBIOS.H.....	595
Appendix H	Library Source Listing for IPX.C.....	599
Appendix I	Header Source Listing for Use with IPX.C.....	605

Appendix J	DOS Error Codes	607
Appendix K	OS/2 Error Codes	611
Appendix L	NETBIOS Error Codes	621
Appendix M	IPX and SPX Error Codes	623
Appendix N	Disk Contents	625
Index		627

TABLE OF CONTENTS

	Introduction	1
<hr/>		
I	Local Area Networks	
	LANs—a New Frontier	2
	The Purpose of This Book	3
	Who Should Read This Book	3
	What This Book Covers	3
	What You Need, and What You Need to Know	5
1	The Basics of Networking	9
	Characteristics	10
	Message Packets (Frames)	10
	Types of Networks	13
	Components of a LAN	16
	Network Adapter Cards	17
	Cabling Systems	19
	IBM Cabling System	20
	AT&T Premises Distribution System	22
	DECconnect	22
	Access Units and Repeaters	22
	File Servers	23
	File Server Hard Disks	24
	File Server CPU, Memory, and Network Adapter	24
	Network Support Software	26
	PC-to-PC Communications	27
	DOS Redirection and Emulation	27
	Vendor-Specific Protocols	29
	IBM PC LAN Support Program	29
	IBM PC LAN Program	30
	Advanced Program-to-Program	
	Communications (APPC)	32
	OS/2 LAN Server	33
	Novell NetWare 286	35
	The NetWare Server and File System	35
	NetWare Security	36
	NetWare Fault Tolerance	36
	A NetWare Workstation	37

	Novell NetWare 386.....	37
	Other Environments.....	38
	Summary.....	39
2	Multiuser Concepts.....	41
	The Multiuser PC DOS Environment.....	42
	DOS Versions.....	43
	The SHARE.EXE Program.....	44
	Is This PC on a LAN?.....	45
	Identifying the Workstation.....	46
	IBM PC LAN Program Workstation IDs.....	46
	Novell NetWare Workstation IDs.....	47
	File Ownership and Locking.....	47
	Deadlocks.....	48
	File Sharing under PC DOS.....	49
	DENY—READ—WRITE Mode (Exclusive Access).....	49
	DENY—WRITE Mode.....	50
	DENY—READ Mode.....	50
	DENY—NONE Mode.....	50
	Compatibility Mode.....	50
	File-Sharing Situations.....	51
	Exclusive Access Example.....	51
	DENY—NONE Example.....	52
	Sharing Retry Count and Delay.....	53
	NetWare Synchronization Services for Files.....	53
	DOS Commands versus File Sharing.....	54
	Record Locking.....	54
	Deadlocks.....	55
	PC DOS Record Locks.....	55
	NetWare Synchronization Services for Records.....	56
	Printing across the LAN.....	57
	Printer Control under the PC LAN Program.....	57
	Printer Control under NetWare.....	58
	Security Issues.....	58
	Checking Return Codes and Handling Errors.....	59
	Summary.....	61
3	PC-to-PC Communications Concepts.....	63
	General Features.....	64
	The OSI Model.....	64
	Ethernet and IEEE 802.3 frames.....	66
	Ethernet Frames.....	68
	IEEE 802.3 Frames.....	69

Token Ring Frames	70
Tokens, Frames, and Abort Sequences	71
The Token	72
The Data Frame	74
The Abort Sequence	77
FDDI Frames	77
Higher-Level Protocols	79
Datagrams and Sessions	80
IPX—a Datagram Service	80
IPX Destination Address	81
IPX Program Services	81
Initialization and Termination Functions	82
Sending and Receiving Packets	82
Miscellaneous Functions	83
IPX Packet Format	83
SPX—Session-Level Communications	85
Establishing and Terminating a Connection	86
Sending and Receiving Packets	87
Miscellaneous Functions	87
SPX Packet Format	88
NETBIOS	89
NETBIOS Names	91
NETBIOS Datagrams	92
NETBIOS Sessions	92
Miscellaneous NETBIOS Services	93
Network Control Blocks (NCBs)	93
NETBIOS Frames	94
Server Message Blocks (SMBs)	96
Session Control	96
File Access	97
Print Service	97
Messages	97
Format of an SMB	98
Summary	100

II Network Programming Techniques

4	DOS-Level Programming	103
	Design Considerations	104
	General Techniques	104
	Choosing a File- and Record-Locking Scheme	106
	Coordinating Related File Updates	110

Far Pointers	111
Detecting the LAN.....	113
SHARE Installed Test	113
Network Drive Test	114
NETBIOS Installed Test	115
NetWare Installed Test.....	117
PC LAN Program Installed Test	117
Custom LAN-Presence Test.....	118
Identifying the Workstation.....	118
Machine Name.....	119
NetWare User IDs.....	121
Sharing Files	122
Exclusive Access	123
One Writer; Many Readers	124
Shared Access	125
Setting the Sharing Retry Count/Delay	125
NetWare File Sharing	125
OS/2 File Sharing.....	129
Setting File Attributes	130
Locking Records.....	130
NetWare Record Locking.....	136
OS/2 Record Locking	136
Committing Changes to Disk.....	137
Printing to a Shared Printer.....	138
Setup Strings	139
PC LAN Program Printer Control.....	140
NetWare Print Services	141
Things You <i>Cannot</i> Do on a Network.....	143
Summary	144
5 PC-to-PC NETBIOS Programming	145
Designing the Dialog.....	146
Simple Dialogs.....	146
Complex Dialogs.....	147
Design Considerations	147
Session or Datagram?	148
Polling versus Asynchronous Event Handling	149
Planning for Time-Outs and Errors	150
Programming NETBIOS.....	150
Invoking NETBIOS	151
Network Control Block	152
NETBIOS Commands	153
NETBIOS Return Codes.....	154

	POST Routines	155
	NETBIOS Installed Test	158
	NETBIOS Names and Workstation IDs	159
	Adding Names	160
	NETBIOS Datagrams	161
	NETBIOS Sessions	163
	Establishing a Session	163
	Sending and Receiving Session Messages	165
	Terminating the Session	167
	Deleting Names	168
	Determining Session Status	169
	Determining Adapter Status	171
	Resetting the Adapter	173
	Summary	174
6	IPX and SPX Programming	175
	Programming IPX	175
	IPX Installed Test	176
	Invoking IPX	177
	Event Control Block	181
	IPX Packet Header	182
	IPX Commands	183
	Event Service Routines	183
	Sockets	186
	Destination Address	188
	Receiving IPX Messages	193
	Sending IPX Messages	194
	Programming SPX	196
	SPX Installed Test	197
	ECBs, ESRs, and Sockets	197
	SPX Header	198
	SPX Commands	199
	Establishing a Connection	199
	Sending and Receiving Messages	203
	Terminating a Connection	204
	Summary	204
7	Testing and Debugging Your Program	207
	DOS-Level Testing	208
	LAN Detection	209
	Workstation IDs	209
	File Sharing	210
	Record Locking	210

DOS Function Call Tracking	211
The File Server as a Debugging Tool	212
NETBIOS Debugging	213
Adding and Deleting Names	213
Passing NETBIOS Datagrams	214
Establishing Sessions	214
Sending and Receiving Session Messages	215
IPX and SPX Debugging	216
Opening Sockets	216
Determining Destination Addresses	216
Sending and Receiving IPX Messages	217
Establishing an SPX Connection	217
Sending and Receiving SPX Messages	218
Summary	218
8 Network Applications	219
File and Record Collision Tester	220
User Guide	220
Opening and Closing Files	221
Locking and Unlocking Records	222
Programmer Guide	223
Predetermined Network Environment	225
Files and Records	225
NETBIOS Microscope	226
User Guide	226
Session Status and Adapter Status	227
NETTEST Sessions	230
Sending and Receiving Messages	231
Programmer Guide	232
Remote Program Execution	234
User Guide	234
Submitting a Job Using REMOTE	235
Using Status, Cancel, and Quit Commands	235
Programmer Guide	236
RPE (Program Launcher)	236
REMOTE (Job Submission)	238
Dialog Design	239
Electronic Mail	240
User Guide	240
Installing the Mail Program and Popping Up	241
Sending Mail	243
Reading and Disposing of Mail	244
Using the Text Editor	245

Programmer Guide	246
The Postman Program	247
The Mail Program	249
E-Mail Functional Design	251
Summary	254

III Reference

Dos Services for Network Programming	257
PC LAN Program Services	275
Novell's Extended DOS Services	283
Numeric Formats and Buffer Lengths	284
Bindery Services	285
Objects	285
Properties of an Object	287
Values of a Property	288
Filling in the Structs	288
Connection Services	310
Print Services	316
Synchronization Services	326
Transaction Tracking Services	332
Workstation Services	339
OS/2 Services	345
NETBIOS Functions	359
IPX and SPX Functions	391
IPX Functions	396
SPX Functions	405

IV Appendixes

A	Source Listing for File/Record Collision Tester	419
B	Source Listing for NETBIOS Microscope	461
C	Source Listing for RPE.C	479
D	Source Listing for REMOTE.C	497
E	Source Listing for the Postman Program	511

F	Source Listing for the Electronic Mail Program.....	541
G	Source Listing for NETBIOS.H.....	595
H	Library Source Listing for IPX.C.....	599
I	Header Source Listing for Use with IPX.C.....	605
J	DOS Error Codes.....	607
K	OS/2 Error Codes.....	611
L	NETBIOS Error Codes.....	621
M	IPX and SPX Error Codes.....	623
N	Diskette Contents.....	625
	Index.....	627
