Complete Guide to Networking

- Everything you need to know about networking—
in plain English!
- Discover advanced maintenance and security topics—
from a user's point of view
- Packed with performance, compatibility,
troubleshooting, and other tips
- Learn about the three most popular network
environments—Windows NT[®]/2000, Unix/Linux,
and NetWare[®]

Overview

Introduction	1
Part I Network Fundamentals	3
1 A Networking Primer	5
2 The Physical (and Not So Physical) Layer	25
3 The Data Link Layer	63
4 The Network and Transport Layers	99
Part II Building Local Area Networks	127
5 LAN Types and Topologies	129
6 Ethernet	157
7 Token Ring	187
8 FDDI	207
9 ATM	229
Part III Building Wide Area Networks	249
10 Wide Area Networking	251
11 Transmission Facilities	283
12 Modems and Dial-Up Technologies	315
13 Remote Access Services (RAS)	331
Part IV Operating Networks	363
14 Network Operating Systems (NOS)	365
15 Network Administration	383
16 Managing Network Performance	399
17 Protecting the Network	413
18 Directory Services	451
19 Troubleshooting and Preventing Problems	497
Part V Appendix	529
A Glossary	531
Index	547

Contents

	Introduction	1
PART I	NETWORK FUNDAMENTALS	3
1	A Networking Primer	5
	Evolution of Networks	5
	Standards Organizations.....	7
	ANSI	8
	IEEE	8
	The ISO.....	8
	The IEC.....	9
	IAB	9
	The OSI Reference Model	10
	Layer 1: The Physical Layer.....	11
	Layer 2: The Data Link Layer	12
	Layer 3: The Network Layer	13
	Layer 4: The Transport Layer.....	13
	Layer 5: The Session Layer	14
	Layer 6: The Presentation Layer	14
	Layer 7: The Application Layer	14
	The Model's Usage.....	14
	Networking Basics	16
	Hardware Components	17
	Software Components.....	19
	Making Networks from Components	21
	Summary	24
2	The Physical (and Not-So-Physical) Layer	25
	The Physical Layer.....	26
	Physical Layer Functions	27
	Distance Implications	31
	Physical Transmission Media.....	34
	Coaxial Cable	35
	Twisted Pair Wire	36
	Fiber-Optic Cable	41
	The Not-So-Physical Layer	45
	Spectral Characteristics.....	46
	The Relevance of Spectral Characteristics	48

Wireless LANs	49	The Internet Protocol, Version 6 (IPv6)	108
Wireless Station Connectivity.....	50	IPv6 Unicast Address Structures	109
Wireless Peer-to-Peer Connectivity	51	IPv6 Transitional Unicast Address Structures	111
Wireless Hub Interconnection	51	IPv6 Anycast Address Structures	112
Wireless Bridges	51	IPv6 Multicast Address Structures	112
Transmission Technologies.....	52	IPv6 Conclusion	112
The IEEE 802.11	60	Novell's IPX/SPX	113
Media Access	61	Dissecting IPX/SPX	113
Physical Layers	61	Apple Corporation's AppleTalk Protocol Suite	118
Summary	62	Dissecting AppleTalk	119
3 The Data Link Layer	63	NetBEUI.....	124
OSI Layer 2	63	NetBEUI Conclusion	125
Frames	64	Summary	125
Typical Frame Components	64	PART II BUILDING LOCAL AREA NETWORKS	127
Frame Summary	66	5 LAN Types and Topologies	129
Evolution of Proprietary Frame Structures	66	LAN-Attached Devices	129
Xerox's PARC Ethernet Frame.....	66	Types of Servers	130
DIX Ethernet Frame	68	Network Type.....	133
IEEE Project 802	70	Peer-to-Peer Networks	133
IEEE 802.2 Logical Link Control (LLC)	71	Server-Based Networks	136
IEEE 802.2 Subnetwork Access Protocol (SNAP)	73	Combination Networks	138
IEEE 802.3 Ethernet Frame	74	LAN Topologies.....	139
IEEE 802.5 Token Ring	78	Bus Topology	140
FDDI.....	80	Ring Topology	141
Selecting a LAN Technology.....	82	Star Topology	143
802.3 Ethernet.....	83	Switched Topology	144
802.5 Token Ring	83	Complex Topologies.....	145
FDDI	83	Daisy Chains.....	145
802.12 VG-AnyLAN.....	83	Hierarchies	146
Media Access	84	LAN Functional Areas	149
Contention-Based Media Access	84	Station Connectivity	149
Token-Based Media Access	90	Server Connectivity	149
Demand-Priority Media Access	92	WAN Connectivity	151
Switched LAN Media Access	94	Backbone Connectivity.....	152
Summary	97	Summary	156
4 The Network and Transport Layers	99	6 Ethernet	157
Protocol Stacks.....	99	History of Ethernets	158
The Internet Protocol, Version 4 (IPv4).....	101	Fundamentals of Ethernet	159
Dissecting TCP/IP.....	102	Supported Hardware	160

Layered Functions	163		
Data Link Layer Functions	164		
Physical Layer Functions	165		
The Physical Layer's Medium			
Dependent Interfaces	166		
10Base2	167		
10Base5	168		
10BaseT	168		
10BaseFL	170		
10BaseFOIRL	170		
Media Type Mixing	171		
Fast Ethernet	172		
Fast Ethernet's Media Choices	173		
100BaseTX	173		
100BaseFX	174		
100BaseT4	174		
Signaling Schemes	174		
Maximum Network Diameter	176		
Gigabit Ethernet	176		
Physical Interfaces	177		
IEEE 802.3 Ethernet Frame	179		
Changes for Gigabit Ethernet	183		
Delay Budgets	185		
Estimates of Propagation Delays	185		
Delay Budget Calculations	186		
Summary	186		
7 Token Ring	187		
Fundamentals of Token Ring	187		
Standardization of Token Ring	188		
Token Ring Frame Structures	189		
The Token Frame	189		
The Data Frame	191		
LLC Data Frame	192		
The MAC Management Frames	193		
The Abort Frame	193		
The Fill Sequence	194		
Token Ring Mechanics	194		
Token Ring Hardware	196		
Topology	197		
Dynamic Ring Membership	198		
The Active Monitor	200		
Token Ring's Future	202		
Switching and Dedicated			
Token Ring	202		
Faster Transmission Speed	203		
Benefits of Token Ring	205		
Limitations of Token Ring	205		
Summary	206		
8 FDDI	207		
Fundamentals of FDDI	207		
Functional Components	208		
Building FDDI Networks	210		
Port Types and Attachment			
Methods	211		
Valid Connections	212		
Topologies and Implementations	214		
Network Size	219		
FDDI Frames	221		
Basic Data Frame	221		
LLC Data Frame	222		
LLC SNAP Data Frame	224		
Token Frame	225		
SMT Frames	226		
The Mechanics of FDDI	226		
Station Initialization	226		
Ring Initialization	228		
Summary	228		
9 ATM	229		
Fundamentals of ATM	230		
Virtual Connections	230		
Connection Types	230		
Transmission Rates	232		
Topology	233		
ATM Interfaces	233		
ATM Reference Model	234		
Physical Layer	235		
ATM Adaptation Layer	237		
ATM Layer	242		
Cell Structure	243		
Local Area Network Emulation			
(LANE)	246		
Summary	248		
Part III Building Wide Area Networks	249		
10 Wide Area Networking	251		
Understanding WAN Technologies	251		
Using Transmission Facilities	252		
Circuit-Switched Facilities	252		
Packet-Switched Facilities	254		
Cell-Switched Facilities	257		

Choosing Communications		
Hardware	258	
Customer-Provided Equipment (CPE)	258	
Premises Edge Vehicles	260	
Understanding Internetwork		
Addressing	260	
Ensuring Unique Addressing	260	
Internetworking with Different Protocols	261	
Using Routing Protocols	263	
Distance-Vector Routing	263	
Link-State Routing	264	
Hybridized Routing	264	
Static Routing	265	
Protocol Selection	265	
Understanding WAN Topologies	266	
Peer-to-Peer Topology	266	
Ring Topology	267	
Star Network Topology	269	
Full-Mesh Topology	270	
Partial-Mesh Topology	271	
Two-Tiered Topology	272	
Three-Tiered Topology	273	
Hybrid Topologies	274	
Designing Your WAN	275	
WAN Performance Criteria	275	
Costs of the WAN	280	
Summary	281	
11 Transmission Facilities	283	
Leased Lines	283	
Multiplexing Techniques	284	
Benefits and Drawbacks of Leased Lines	285	
Topology of Leased Lines	286	
Digital Signal Standards	288	
ANSI's Digital Signal Hierarchy	288	
ITU's Digital Signal Hierarchy	290	
SONET's Carrier Systems	290	
The T-Carrier System	292	
T-Carrier Services	292	
Line Encoding	293	
Framing Formats	294	
Circuit Switched Transmission Facilities	295	
Switched 56	296	
Switched 56 Technologies	296	
Frame Relay	296	
Frame Relay Versus Leased Lines	297	
Extended Frame Relay	299	
Permanent Virtual Circuits Versus Switched Virtual Circuits	299	
Basic Frame Relay Format	300	
Frame Relay Networks Design	301	
UNI Versus NNI	301	
Going Above the CIR	301	
Flow Control in the Frame Relay Network	302	
Voiceover Frame Relay (VoFR)	302	
Internetworking Frame Relay with ATM	303	
ATM	303	
ATM Layers	304	
ATM Connections	305	
Quality of Service	306	
Signaling	306	
Interoperating with LANE	307	
Packet Switched Transmission Facilities	307	
X.25	307	
History of X.25	308	
Pros and Cons of X.25	308	
Common Uses	308	
Comparison to the OSI Reference Model	308	
Different Types of Networks	311	
X.25 Specifications (RFC 1356)	312	
Summary	312	
12 Modems and Dial-Up Technologies	315	
How Modems Work	315	
Bits and Bauds	317	
Modem Modulation Types	319	
Asynchronous and Synchronous	321	
Standard Modem Interfaces	322	
ITU-T (CCITT) Modem Standards	325	
Modems and Microsoft Networking	327	
Summary	329	

13	Remote Access Services (RAS)	331
	History of Remote Access	
	Networking	331
	The 1970s	332
	The 1980s	333
	The Craze of the 90s.....	333
	Remote Connection Setup	334
	Early Protocol Standards	334
	The AT Command Set.....	335
	RAS Connection Protocols.....	336
	TCP/IP Access Protocols	336
	Remote Access Transport Services	339
	How RAS Users Are Currently	
	Connecting	339
	Network Operating Systems and RAS	
	Capabilities	344
	Using RAS As an Internet	
	Gateway/Router for a LAN	344
	Using RAS to Provide Internet	
	Access for Dial-in Users	346
	RAS Security Issues.....	348
	Passwords	348
	Dialers.....	349
	Callback Systems	349
	Intranets and the Internet	349
	What's So Special About	
	the Web?.....	350
	What About Intranets?	351
	The Key Differences Between the	
	Internet and Intranets	351
	Extranets.....	352
	The Trouble with Open	
	Protocols.....	352
	The Trouble with Connectionless	
	Protocols.....	353
	Mixing Open Protocols and	
	Extranets.....	355
	Rules for Securing an Extranet.....	357
	Am I Wasting My Time?	359
	Virtual Private Networks	359
	Carrier-provided VPNs	360
	Tunneling	361
	Summary	361

PART IV	OPERATING NETWORKS	363
14	Network Operating Systems (NOS)	365
	History of Network Operating	
	Systems	365
	Novell Dominates the Market.....	365
	New Players Emerge.....	366
	Microsoft Takes Hold	366
	Traditional Services of a NOS	367
	Banyan Network Systems	368
	Services and Applications of	
	VINES	369
	VINES-Supported Standards	371
	Strengths and Weaknesses of	
	VINES	371
	Novell NetWare	371
	Features of NetWare	372
	NetWare-Supported Standards	376
	Strengths and Weaknesses of	
	NetWare	376
	Microsoft Windows NT	377
	Features of Windows NT	378
	Windows NT-Supported	
	Standards	380
	Windows NT Security.....	380
	Strengths and Weaknesses of	
	Windows NT	380
	Summary	381
15	Network Administration	383
	What Is Network Administration?	383
	Managing Network Accounts.....	384
	User Accounts	384
	Group Accounts	388
	Multiple Logins.....	391
	Managing Resources	391
	Hardware Resources	392
	Disk Quota	392
	Files and Directories	392
	Software Installation/Upgrades.....	392
	Email Applications	393
	Network Printing.....	393
	Management Tools	395
	Microsoft Management Tools.....	395
	Zero Administration	397
	Management Console	398
	Summary	398

16	Managing Network Performance	399	18	Directory Services	451
	Potential Network Performance			The Purpose of a Network	
	Problems	399		Directory	451
	Physical Layer Issues	400		Directory Framework	452
	Network Traffic Issues	401		Directory Scope	452
	Address Resolution Problems.....	404		Directory Structure	452
	Internetworking Issues	404		Directory Presentation	454
	Tools and Techniques	404		An Illustration of the Directory	
	Ping	405		Model.....	456
	Traceroute	406		Scope: What's in a Phone Book?	456
	Windows NT Performance			Telephone Directory Structure	456
	Monitor.....	408		Telephone Directory Presentation....	457
	Network Analyzers	408		The Network Directory's Special	
	Hardware Troubleshooting	409		Features	458
	Summary	412		Access Control	459
17	Protecting the Network	413		Multiple Network Directories.....	459
	Ensuring Data Integrity	413		The X.500 Specification.....	460
	Protecting the Operating System	414		The Directory's Origins	461
	Installation Procedures	414		Scope of The Directory.....	462
	Maintenance Techniques.....	417		Structure of The Directory	464
	Protecting Your Hardware	423		Distribution and Replication.....	466
	Uninterruptible Power Supplies	423		Controlling Access to The	
	Environmental Factors	427		Directory	467
	Hardware Redundancy	427		Presentation of The Directory.....	467
	Protecting User Data	428		Network Name Resolution.....	472
	Backing Up Your Data	428		Domain Naming System (DNS).....	472
	Redundant Disk Storage	432		Windows Internet Naming System	
	Implementing Your Data Integrity			(WINS).....	475
	Plan	434		Service Advertising Protocol	
	Planning for Network and Data			(SAP)	476
	Security	434		Kerberos	478
	Levels of Security	435		Kerberos V4 and V5	
	Security Policies	436		Implementation.....	478
	Workgroups, Domains, and			The Authentication Process	479
	Trusts	438		Windows Networking: Workgroups	
	The Four Domain Models.....	440		and Domains	480
	Security in Windows 95/			Implementing Trust	
	Windows 98	442		Relationships	482
	Password-Protected Shares	443		Banyan StreetTalk	482
	Security in Windows NT	443		Novell Directory Services (NDS)	484
	Auditing	446		Beginnings of NDS.....	484
	Diskless Workstations	447		Today's NDS.....	485
	Encryption.....	448		Microsoft's Active Directory	
	Virus Shields	448		Service	488
	Summary	449		ADS Naming.....	488
				ADS and Domain Systems	488

ADS Architecture	489	Helpful Resources	524
The ADS Schema	491	Vendor Technical Support.....	525
The ADS Database	492	Internet Newsgroups and Mailing	
ADS Replication.....	492	Lists	525
Summary	494	Download Sites	525
19 Troubleshooting and Preventing	497	Magazines and Technical	
Proactive Network Control		Journals.....	525
Operations	498	Microsoft Windows NT	
Applications for Proactive Network		Hardware/Software	
Control Operations.....	500	Compatibility Lists.....	526
Network Testing, Baselineing, and		Microsoft Technical Information	
Monitoring	503	Network	526
Refining Existing Network Control		The Microsoft Online	
Operations	505	Knowledgebase	526
Proactive Network Disaster		Windows NT Server Resource Kit ..	526
Operations	506	Summary	527
Applications for Proactive		PART V APPENDIX	529
Network Disaster Operations.....	507	A Glossary	531
Testing Disaster-Recovery		Index	547
Operations and Strategies.....	509		
Refining Existing Network Disaster			
Operations	510		
Logical Fault Isolation	510		
Assess the Priority	511		
Discover Pertinent Information	512		
Justify Probable Causes	514		
Unit Test and Isolate	514		
Study and Evaluate Results	515		
Transcribe Results and Processes	516		
Common Networking Problems.....	516		
Physical Media	516		
Network Interface Cards (NIC)	517		
NIC Configuration Parameters	518		
Network Protocol Mismatch.....	519		
Network Congestion	520		
Broadcast Storms	520		
Power Problems	521		
Server Problems	521		
Tools for Gathering Information	522		
Digital Volt Meters	522		
Time-Domain Reflectometers.....	522		
Oscilloscopes	523		
Advanced Cable Testers	523		
Protocol Analyzers	523		
Network Monitors.....	524		
Performance Monitors	524
