COMPUTER ORIENTED NUMERICAL METHODS

THIRD EDITION

V. RAJARAMAN

Contents

Preface to the Third Edition	ix
1. Computational Algorithms	1
1.1 Introduction	1
1.2 The structure of a computer	3
1.3 Some examples of algorithms	5
EXERCISES	13
2. Computer Arithmetic	15
2.1 Introduction	15
2.2 Floating point representation of numbers	15
2.3 Arithmetic operations with normalized floating point numbers	17
2.4 Consequences of normalized floating point representation of numbers	20
2.5 Some pitfalls in computing	23
2.6 Errors in numbers	27
2.7 Binary representation of numbers	29
2.8 Conclusions	32
EXERCISES	33
3. Iterative Methods	35
3.1 Introduction	35
3.2 Beginning an iterative method	36
3.3 The method of successive bisection	37
3.4 The method of false position	41
3.5 Newton-Raphson iterative method	44
3.6 The secant method	49
3.7 The method of successive approximations	53
3.8 Comparison of iterative methods	55
3.9 Solution of polynomial equation	57
3.10 Solution of simultaneous nonlinear equations	70
EXERCISES	74

4. Solution of Simultaneous Algebraic Equations	...	77
4.1 Introduction	...	77
4.2 The Gauss elimination method	...	77
4.3 Pivoting	...	83
4.4 Illconditioned equations	...	85
4.5 Refinement of the solution obtained by Gaussian elimination	...	85
4.6 The Gauss-Seidel iterative method	...	86
4.7 An algorithm to implement the Gauss-Seidel method	...	88
4.8 Comparison of direct and iterative methods	...	91
EXERCISES	...	92
5. Interpolation	...	95
5.1 Introduction	...	95
5.2 Lagrange interpolation	...	96
5.3 Difference tables	...	99
5.4 Truncation error in interpolation	...	106
5.5 Spline interpolation	...	107
EXERCISES	...	114
6. Least Squares Approximation of Functions	...	117
6.1 Introduction	...	117
6.2 Linear regression	...	119
6.3 Algorithm for linear regression	...	122
6.4 Polynomial regression	...	124
6.5 Fitting exponential and trigonometric functions	...	125
EXERCISES	...	129
7. Approximation of Functions	...	133
7.1 Introduction	...	133
7.2 Taylor series representation	...	134
7.3 Chebyshev series	...	136
EXERCISES	...	140
8. Differentiation and Integration	...	142
8.1 Introduction	...	142
8.2 Formulae for numerical differentiation	...	143
8.3 Numerical integration	...	146

8.4	Simpson's rule	...	147
8.5	Errors in integration formulae	...	150
8.6	Algorithms for integration of tabulated function	...	151
8.7	Algorithms for integrating a known function	...	152
8.8	Gaussian quadrature formulae	...	156
8.9	Comparison of integration formulae	...	161
	EXERCISES	...	162
9.	Numerical Solution of Differential Equations	...	164
9.1	Introduction	...	164
9.2	Euler's method	...	164
9.3	Taylor series method	...	167
9.4	Runge-Kutta methods	...	168
9.5	Runge-Kutta fourth order formula	...	173
9.6	Predictor-corrector method	...	175
9.7	Higher order differential equations	...	180
9.8	Comparison of predictor-corrector and Runge-Kutta methods	...	183
	EXERCISES	...	184
	Solutions to Selected Exercises	...	187
	Index	...	195
