CONTENTS

1. **INFORMATION CONCEPTS AND PROCESSING** 1
1.1 Computer :The Information Processor 1
1.2 Data and Information 1
1.2.1 Data 1
1.2.2 Information 2
1.2.3 Difference between Data and Information 3
1.3 Features of Information 3
1.4 Categories of Information 5
1.4.1 Decisions at Different Organizational Levels 5
1.4.2 Long Term Planning 6
1.4.3 Short-Range Planning 7
1.4.4 Operational Information 7
1.4.5 International Information 7
1.4.6 National Information: Official Publications of Central and state Governments 7
1.4.7 Semi-Official Publications 8
1.4.8 Historical Data for Reference and Analysis 8
1.5 Levels of Information 8

2. **DATA CONCEPTS** 11
2.1 Data Type 11
2.2 Data Concepts: Logical & Physical Data 12
2.3 Logical Concept Of Data 12
2.3.1 Entities and Attributes 12
2.4 Physical Concepts 13
2.4.1 Data Storage 13
2.4.2 Data Retrieval 13
2.5 Organisation of Data as Files 14
2.6 File 15
2.6.1 Record Layout 16
2.6.2 File Formats 16
2.6.3 File Compression 17
2.7 Classification of Data Files by Function 17
2.7.1 Master File 17
2.7.2 Transaction Files 18
2.7.3 Security Files 18
2.7.4 Control (Audit) Files 18
2.7.5 Back Up File 19
2.8 Basic Tasks in Business Data Processing 19
2.8.1 Inputting 19
2.8.2 Data Processing 22
2.8.3 Outputs Obtained 24
2.8.4 Data transmission 26
2.9 File Organization 26
2.9.1 Serial File 27
2.9.2 Sequential File 27
2.9.3 Indexed Sequential File 27
2.9.4 Direct Access File 28
2.9.5 Difference between Serial and Sequential Files 28
2.9.6 Serial Magnetic Tape files 28
2.9.7 Sequential Files on Magnetic Tapes 28
2.10 Disk-files 29
2.10.1 Serial Organization on disks 30
2.10.2 Sequential Organization on Disks 30
2.10.3 Indexing 30

Scanned by TapScanner

2.10.4 Random Organization 30
2.10.5 Relative Files 31
2.10.6 Indexed Sequential Files 31
2.11 Database Creation : Logical Design to Physical Design 32
2.11.2 Other points in file creation are 33
2.11.3 Example of File Creation 33
2.12 Types of Databases 35
2.12.1 Hierarchical Databases 36
2.12.2 Network Databases 36
2.12.3 Relational Databases 36
2.12.4 Object Oriented Databases 37
2.13 The Advantages of Database 38

3. ELEMENTS OF ELECTRONIC DATA PROCESSING 49
3.1 Elements of Computerized Business Information System 49
3.2 Computer the Potent Tool for Data Processing 49
3.2.1 Enhancing Human Capabilities 51
3.2.2 Speed 51
3.2.3 Accuracy 51
3.2.4 Ease of Communications. 52
3.2.5 Capacity for Storage. 52
3.3 Facilities Available in Computer Data Processing 52
3.3.1 Data Entry. 52
3.3.2 Capturing Input Data: Data Acquisition 52
3.3.3 Types of Information Systems 53
3.3.4 EDI 53
3.3.5 Transaction Processing Systems (TPS) 54
3.3.6 Banking through Internet 54
3.4 Overview of Commercial Applications 55
3.4.1 Computerized Accounts 55
3.4.2 Advantages of Computerized Accounting 55
3.4.3 Major Financial Accounting Functions 56
3.4.4 Billing 56
3.4.5 Accounts Receivable 57
3.4.6 Invoices and Payments 58
3.5 Transaction Processing 58
3.5.1 TPS Input 58
3.5.2 Elements of Transaction Processing 59
3.5.3 Production of Output 60
3.5.4 Functions of TPS 61
3.5.5 Data Validation 61
3.6 Modes Of Transaction (Data) Processing 62
3.7 Batch Processing 63
3.7.1 Real Time Processing 63
3.7.2 Examples of Realtime Processing 64
3.7.2 Advantages and Drawbacks of Real Time Processing 65
3.8 Comparison of three Processing Methods 66
3.9 Text Processing with Computers 67
3.9.1 Textual Information 67
3.9.2 Elements of textual matter 67
3.9.3 Typefaces and Fonts 67
3.9.4 Rasterization and Antialiasing 70
3.9.5 Rich Text Format 70
3.9.6 Unicode 70
3.9.7 The ATypal Organization 71
3.9.8 Adobe Type Manager 71
3.9.9 Font Editing and Design Tools 71
3.9.10 Type-Designer 72
3.10 Hypertext 72
3.10.1 Indexed Retrieval Systems 73

Scanned by TapScanner

3.10.2 Types of searches: ... 73
3.10.3 Linked or Hyperlinked Systems ... 74
3.11 Codes for Information Exchange ... 74
3.11.1 ASCII ... 75
3.12 Text Editor ... 75
3.13 Word Processing ... 75
3.13.1 Advantages of Word Processing ... 76
3.13.2 Preparation of Document ... 76
3.13.3 Special Features ... 77

4. SPECIAL APPLICATIONS OF INFORMATION TECHNOLOGY ... 83
4.1 Graphics ... 83
4.2 Graphic Packages ... 84
4.3 Consideration in Using Graphics Systems ... 86
4.4 Advantages of Computer Graphics ... 86
4.5 Pictures and Images ... 87
4.5.1 Raster of Bitmap images ... 88
4.5.2 Bitmap Formats: GIF, JPEG and PNG ... 89
4.5.3 GIF: Better For Designed Graphics ... 90
4.5.4 When To Use GIF ... 90
4.5.5 JPEG: Better For Photographs ... 90
4.5.6 When To Use JPEG ... 91
4.5.7 PNG: Using The best of the two others ... 92
4.6 Vector Graphics ... 92
4.7 Vector Formats: PGML, VML, SWF ... 93
4.8 Vector Graphics vs Raster ... 93
4.9 Clip Art 94
4.10 Three-D graphics ... 94
4.10.1 Displaying 3D Graphics ... 94
4.10.2 Modeling ... 95
4.10.3 Animation ... 95
4.10.4 Rendering ... 95
4.11 Applications of Computer Graphics ... 95
4.12 Graphic Hardware ... 96
4.13 Graphic Software ... 97
4.14 Computer-Aided Design (CAD) ... 97
4.15 Office Automation ... 97
4.15.1 A Definition of the Automated Office ... 98
4.15.2 Office Automation Systems ... 99
4.15.3 Document Preparation ... 99
4.15.4 Typewriters ... 99
4.15.5 Word Processors ... 100
4.15.6 Computers ... 100
4.15.7 Dictation Equipment ... 101
4.16 Document Reproduction and Storage ... 101
4.17 Other Advances In Automation ... 103

5. NUMBER SYSTEMS IN COMPUTERS ... 108
5.1 Representing Characters in Memory with Binary Code ... 108
5.2 Size of Memory ... 111
5.2.1 Memory Locations ... 111
5.3 Number System ... 111
5.4 Decimal system ... 111
5.5 Binary Number System ... 113
5.6 Conversion from Binary to Decimal ... 114
5.7 Conversion from Decimal to Binary System ... 114
5.8 Octal Number System ... 115
5.9 Conversion from Decimal to Octal ... 116
5.10 Hexadecimal Number System ... 116
5.11 Conversion of Hexadecimal into Decimal. ... 117

Scanned by TapScanner

5.12 Conversion from Decimal to Hexadecimal. 118
5.13 Binary Arithmetic 119
5.14 Representation of Information in Computers 120
5.15 BCD Numbers: 120
5.16 Other Codes 120
5.16.1 EBCDIC 121
5.16.2 ASCII 121

6. ELEMENTS OF A COMPUTER SYSTEMS 125
6.1 Elements of a Computer Systems 125
6.2 Capabilities of Computer Elements of Computer System 125
6.3 Limitation of Computers 127
6.4 Computer Classification 128
6.4.1 Classification of Computers based on size 129
6.4.2 Categories Of Computers 129
6.4.3 Microcomputers: 129
6.4.4 Minicomputers 130
6.4.5 Mainframes 130
6.4.6 Supercomputers 130
6.4.7 Compatibility 131
6.5 Personal Computer (pc) 131
6.6.1 Laptop Portable Computers 133
6.6.2 Palmtop Computers 133
6.7 Main Frame Computers 134
6.8 Super-computers 134
6.8.1 Supercomputer: Past And Present 136
6.8.2 Supercomputers in India and abroad 137
6.8.3 Characteristics of a Supercomputer 138
6.8.4 Application of Supercomputers 139
6.9 Desktop Computers 139
6.10 Workstation 140
6.11 Workstations as Client 140
6.12 Unix WorkStations 140
6.13 Computer Based Information Systems 141
6.14 Types of Information System 142
6.15 The Importance of Informal Information Systems 142

7. CONCEPTS OF HARDWARE 146
7.1 Basic Components of a Digital Computer 146
7.2 Detailed Functioning of Computer 146
7.3 Hardware 147
7.4 Devices 147
7.5 Function of Central Processing Unit (CPU) 147
7.6 The Processor 148
7.6.1 Intel Pentium with MMX Technology 149
7.6.2 Intel Celeron : A cheaper alternative to pentiums 149
7.7 The Motherboard 149
7.7 Numeric Coprocessor 150
7.8 The System Unit 150
7.8 How the System Units Work Together 150
7.9 Input/Output Unit 151
7.9.1 I/O Ports 151
7.9.2 Peripheral 151
7.10 Interfacing Buses 151
7.11 Arithmetic & Logic Unit (ALU) 152
7.11.1 Detailed functioning of A.L.U. 153
7.12 Control Unit 154
7.13 The Multimedia Computer 155
7.14 Computer Architecture Standards 156
7.15 Specialized Multimedia Hardware 156

Scanned by TapScanner

7.16 The Multimedia Computer's Hardware 157
7.16.1 Digital Audio and Video 157
7.16.2 Audio Hardware 157
7.16.3 Video Hardware 157

8. INPUT UNITS 159
8.1 Functions of Input Unit 159
8.2 Input Devices 159
8.3 Off-line Data Input/Entry 160
8.4 On-line Data Input Devices 160
8.5 Computer Terminals 160
8.6 Graphics Terminals 161
8.6.1 Mouse (Fig. 8.1) 161
8.6.2 Tracker Ball and Joystick 161
8.6.3 Light Pen (Fig. 8.4) 162
8.6.4 Touch Terminals (Touch Screens) 163
8.6.5 Digitizer Tablets (Graphic Tablets) (Fig. 8.5) 163
8.7 Graphic Tablets 164
8.8 Graphics versus Non-graphic Terminals 164
8.9 KeyBoards 164
8.9.1 The Keyboard Keys 165
8.9.2 Keyboard Types and Problems with Them 166
8.10 Voice Input/Recognition Devices 166
8.11 Off-line Data Input/Entry 167
8.11.1 Key to Punched Card System 168
8.11.2 Key to Disk and Key to Diskette Unit (Fig. 8.13) 168
8.11.3 Key-to-Tape 169
8.12 Source data input (or data capturing) 169
8.12.1 Point-of-Sale Terminals 170
8.12.2 Laser Beam Scanners 170
8.12.3 Optical Mark (sense) reader (OMR) (Fig. 8.8) 171
8.12.4 Magnetic Ink Character readers 172
8.12.5 Optical Character Readers (OCR) (Fig. 8.10) 173
8.12.6 Optical Bar Code Reader (OBR) 174
8.13 Scanner 174

9. OUTPUT DEVICES 178
9.1 Output devices 178
9.2 Printers 179
9.3 Impact Printers 179
9.5 Daisy Wheel Printer 180
9.6 Line Printers 181
9.7 Non-Impact Printers 181
9.8 Thermal 181
9.9 Laser 181
9.10 Ink Jet 182
9.11 Electrostatic 183
9.12 Comparison of Printers 183
9.13 Qualities of Printers 183
9.13.1 Printer I/O Interfaces 184
9.13.2 Printer Languages 184
9.13.3 Fonts 184
9.14 The Screen (Monitor or VDU) 185
9.15 Display Devices 185
9.15.1 CRT Displays 185
9.15.2 Liquid Crystal Displays(LCD) 187
9.15.3 Flat screen or LCD monitors 187
9.15.4 Projection Displays 188
9.16 Terminals 188
9.17 Graphic Display Terminal 188

Scanned by TapScanner

9.17.1 Display 188
9.17.2 Color Capability 189
9.17.3 The Size of the Screen 189
9.17.4 The Projection Technology 189
9.17.5 True Color 190
9.17.6 Display modes (CGA, EGA, VGA, XGA, and SVGA) 190
9.18 Video Displays Adapters 191
9.19 Characteristics of a Good Monitor 192
9.20 The 3D Graphic Cards 195
9.21 Accelerated Graphics Port (AGP) 196
9.22 Plotter Output 197
9.23 Audio Response Unit 197

10. MEMORY 207
10.1 Memory 207
10.2 Classification of Memories: 207
10.3 Primary or Internal Memory 207
10.4 Use of Primary Memory 208
10.5 How Memory Works 208
10.6 Random Access Memory (RAM) 209
10.6.1 Static RAM (SRAM) 210
10.6.2 Dynamic RAM (DRAM) 211
10.6.3 DRAM Technologies and Relative Performance 211
10.6.4 Flash memory (flash RAM) 212
10.6.5 How Big is RAM? 212
10.6.6 Why Random Access? 213
10.7 Read-Only Memory (ROM) 213
10.8 Random access memory (RAM) and ROM 215
10.8.1 Application of different types of RAM/ROM. 215
10.9 Storage Hierarchy and Cache 215
10.10 Characteristics of Memories 216
10.11 Measurement of Computer Memory 216
10.12 Memory Address 217
10.13 Memory Size and System Performance 217
10.14 Memory Developments and Limitations 219

11. CONCEPTS OF STORAGE DEVICES AND DATA COMMUNICATION EQUIPMENT 223
11.1 Auxiliary (Secondary) Storage Devices 223
11.2 Arranging Data in Secondary Storage 223
11.3 Magnetic Media 224
11.4 Advantages and Limitations of Secondary Storage 224
11.5 Disk Types 224
11.5.1 Disk Drives 225
11.5.2 Storage Principles 225
11.6 Magnetic Tape 226
11.6.1 Advantages of Using Magnetic Tapes 226
11.6.2 Disadvantages of Magnetic tape : 226
11.7 Magnetic Disks 227
11.8 Types of Magnetic Disks 227
11.9 Winchester Disk 227
11.10 Removable Cartridges or Disk-packs 227
11.11 Hard Disk 228
11.11.1 History of Hard Disks 229
11.11.2 Hard Disk Drive 229
11.11.3 Writing in Layers 229
11.11.4 Physical aspects of the hard disk 230
11.12 Floppy Disks 231
11.13 Merits of Magnetic Disks 232
11.14 CD ROM and DVD : The Optical Media 233
11.15 CDROM 233

Scanned by TapScanner

11.15.1 Drives and Operating System 234
11.15.2 Tracks 234
11.15.3 Data read from CD-ROM 235
11.15.4 Rotation speed and Data Transmission 235
11.16 CD-R and CD-RW 235
11.17 CDROM and Information 236
11.18 Merits of using Compact Disks for Multimedia 236
11.19 Compact Disk Digital Audio (CD-DA) 237
11.20 Video CD (VCD) 238
11.21 Digital Video Disk (DVD) 238
11.21.1 Various DVD Types 238
11.22 Standards for CDROM 240
11.23 Bubble Memory 240
11.24 Charged Coupled Devices 241
11.25 Tape Cassettes and Cartridges 241
11.26 Characteristics Terms for various Memory Devices 242
11.27 Communications 243
11.28 Modem 244
11.26.1 Connecting the Modem 245

12. COMPUTER SOFTWARE 257
12.1 Computer System Organisation 257
12.2. Software 257
12.3. System Software 257
12.4. Applications Software. 258
12.5 Middleware 258
12.6 An operating system (OS) 258
12.7 Translators 258
12.8 Compilers and Interpreters 259
12.8.1 Compiler Translation. 259
12.8.2 Interpreter Translation. 260
12.9 The Assembler 260
12.10 Emulators260
12.11 Simulators 260
12.12 User Applications Programs (Fig. 12.2) 261
12.13 Application Packages. 261
12.14 Advantages of Packages. 262
12.15 Groupware 262
12.16 Presentation Software 262
12.17 Accounting Software 262
12.18 Applets 263
12.19 Utilities and Service programs 263
12.20 Firmware 264

13. OPERATING SYSTEM 266
13.1. Operation of Computer 266
13.2. Evolution of Operating Systems 266
13.3. The Operating System (O.S.) 268
13.4. Operating System : The Resource Manager 269
13.5 Functions of Operating system (OS) 270
13.6 Components of Processor Management 271
13.7 Single -User Systems 272
13.8 Multi-tasking Operating System 272
13.8.1 Nonpromptive Multitasking 272
13.8.2 Preemsptive Multitasking 272
13.8.3 Multitasking within a single program 273
13.9 Multi-User Time-sharing Systems 273
13.10 Common Operating Systems 273
13.11 Priorities 274
13.12 Processor Management 274

Scanned by TapScanner

13.12.1 Concurrency of Operation 274
13.12.2 Multiprogramming Environment 275
13.12.3 Job Scheduling 278
13.12.4 Batch Scheduling 278
13.12.5 Batch Processing Systems 279
13.12.6 Time Sharing (Multi Access) 279
13.12.7 Multiprocessing 280
13.12.8 Multiprocessor Operating Systems 281
13.13 Some Other Famous Operating Systems 281
13.14 XENIX 283

14. WORKING IN DOS ENVIRONMENT 288
14.1 Booting 288
14.2 How Booting Works 288
14.3 Boot Record 289
14.4 MBR (Master Boot Record) 289
14.5 BIOS (Basic Input/output System) 289
14.6 Operating Systems 290
14.6.1 MS-DOS (Microsoft Disk Operating System) 290
14.7 History of MS-DOS 290
14.8 The Command Interpreter of DOS : The Shell 292
14.9 Finding Your Way Around The Data In Ms-Dos 292
14.9.1 Files: Names and Addresses 292
14.9.2 File Types 292
14.9.3 Directories 293
14.10 MS-DOS BASICS 293
14.11 Learning MS-DOS Basics—A Tutorial 293
14.11.1 The Command Prompt 293
14.11.2 Typing Command 294
14.12 Managing Directories 294
14.13 Viewing the Contents of a Directory 294
14.14 Changing Directories 296
14.15 Changing Drives 300
14.16 Copying Files 301
14.16.1 Copying a Single File 301
14.16.2 Copying Group of Files 303
14.17 Renaming 304
14.17.1 Renaming a File 304
14.17.2 Renaming a Group of Files 305
14.18 Deleting Files 306
14.18.1 Deleting a File 306
14.18.2 Deleting a Group of Files 306
14.19 Undeleting a File 308
14.20 Other Dos Command 308
14.21 Formatting 308
14.22 File Security 308
14.23 Failure and Recovery 309
14.24 CHKDSK 309

15. WINDOWS AND GUI 313
15.1 What is an Interface? 313
15.2 Graphical User Interface (GUI) 315
15.3 Window 316
15.4 Windowing System 316
15.5 Introduction to Windows 316
15.5.1 Why Windows are more popular ? 317
15.6 Using the Mouse 317
15.7 Anatomy of a Window 318
15.8 The WINDOWS Environment 319
15.9 Menus And Dialog Boxes 321

Scanned by TapScanner

15.10 Some Essential Elements of Window's Working 323
15.11 Opening and Closing Windows 325
15.12 Closing a Program Window 326
15.13 Closing Window with the Control Menu 326
15.14 Opening a Program Group Window 328
15.15 MANIPULATING WINDOWS 329
15.15.1 Sizing and Moving Windows 329
15.15.2 Moving a Window 329
15.15.3 Using the Control Menu's Move Option 330
15.15.4 Sizing a Window 330
15.15.5 Sizing a Window Incrementally 331
15.15.6 Using the Control Menu's Size Option 331
15.16 The Program Manager 332
15.16.1 The Program Manager? 332
15.16.2 Deleting Groups 333
15.17 Widget 333
15.18 MDI (Multiple Document Interface) 334
15.19 Microsoft Windows 3.1 334
15.20. WYSIWYG 334
15.21 Installing Software 335
16. UNIX OPERATING SYSTEM 337
16.1 UNIX 337
16.2 What is UNIX 337
16.3 UNIX : Brief History 338
16.4 Starting with Unix 338
16.5 Some List Command Options 339
16.6 Changing Directories Slowly and Carefully 339
16.7 Changing Directories Quickly 340
16.8 Get Organized, Create Directories! 341
16.9 Copying Files 342
16.10 Copying Directories 342
16.11 Moving Files 343
16.12 Moving Directories Around 343
16.13 Removing Files 343
16.14 Removing Directories 344
16.15 Controlling Access to Files and Directories 344
16.16 What's in a Filename? 344
16.17 Looking at Your File Permissions 345
16.18 Changing File Permissions 346
16.19 A Sample Session with Unix 347
16.20 Logging in Unix Environment 348
16.21 Reaching the Shell: The $ Prompt 348
16.22 Typing Comands in Unix 348
16.23 Mistake in Typing 349
16.24 Stopping a Program 350
16.25 Logging Out 350
16.26 Mail 350
16.27 Writing to Other Users 351
16.28 Files and Common Commands 352
16.29 Creating Files - The Editor 352
16.30 Listing the Files 353
16.31 Printing files - cat and pr 354
16.32 Moving, Copying, Removing Files - mv, cp, rm 355
16.33 List of few File System Commands 355
16.34 The shell 356
16.35 POSIX (Portable Operating System Interface) 356
16.36 Using the VI Editor 357
16.36.1 Introduction 357
16.32.2 Basic UNIX VI Editor Commands 359
16.32.3 Mastering the VI editor 360

Scanned by TapScanner

17. ELEMENTS OF WINDOWS NT 366
17.1 Windows NT 366
17.1.1 The Mission behind Windows NT 366
17.1.2 The Design Goals 366
17.2 NT 4.0 Desktop 369
17.3 My Computer 369
17.4 Network Neighborhood 370
17.5 Recycle Bin 370
17.6 Task Bar 370
17.7 Start Button 370
17.8 Clipboard Viewer 371
17.9 Print Manager 372
17.10 The Control Panel 372
17.11 Your Environment 377
17.12 Keyboard Shortcuts 378
17.13 Navigating Windows NT 4.0 Without a Mouse 378
17.14 Common Problems 379
17.15 Client Server Computing 380
17.15.1 Client/server 380
17.15.2 Dumb Server 381
17.15.3 File Server 381
17.15.4 Understanding Database Servers 382
17.16 Window NT Server 382
17.17 What Is the Internet Information Server? 387
17.17.1 A Collection of Windows NT Services 387
17.17.2 WWW Publishing Service 388
17.17.3 FTP Publishing Service 388
17.17.4 Gopher Publishing Service 389

18. COMPUTERS AND COMMUNICATION 390
18.1 Communications 390
18.2 The convergence of Computing with Communications 392
18.3 Data Transmission and Communication 392
18.4 Need of data communication/transmission and computer networks 392
18.5 Speeds of Transmission 393
18.6 Communication Channels 393
18.7 Digital v/s Analog Transmission 393
18.8 Methods of Data-transmission 394
18.8.1 Paired Wires and Cables 395
18.8.2 Co-axial Cable 395
18.8.3 Fiber-optics 396
18.8.4 Satellite Link 396
18.9 Mode of Transmission 396
18.10 Modems 398
18.11 Communication Protocols 399
18.12 Synchronous and Asynchronous Transmission 399
18.13 Asynchronous Transmission 399
18.14 Synchronous Transmission 401
18.15 Data Transmission Modes 401
18.16 Multiplexing. 402
18.16.1 Frequency Division Multiplexing (FDM). 403
18.16.2. Time Division Multiplexing (TDM). 404
18.17 Communication Program 405

19. INTRODUCTION to NETWORKS 410
19.1 Networks : Overview 410
19.2 Network Computers 410
19.3 Organization of Computer Systems 411
19.4 Centralized Computer Systems 411
19.5 Decentralized Computer Systems 411

Scanned by TapScanner

19.6 Comparison of Centralized V/S Decentralized Systems 412
19.6.1 Benefits of Decentralized Systems 412
19.6.2 Benefits of Decentralized Systems 412
19.7 Concept of Distributed Computer Systems 412
19.8 Merits of Distributed data-processing networks 413
19.9 Networks 414
19.10 Network Components 415
19.11 Advantages of Networking 415
19.12 Disadvantages of a Network 416
19.13 Need of Networks 416
19.14 Network Topologies 417
19.14.1 Star Networks 417
19.14.2 Bus Network 418
19.14.3 Ring Networks 418
19.15 Switching Alternatives 418
19.16 Circuit switching 419
19.16.1 Circuit-Switching Services 419
19.16.2 Packet Switching 420
19.16.3 Datagrams and Streams 421
19.16.4 Difference between circuit- and packet-switching services 421
19.17 Computer Network Architectures 422
19.17.1 OSI (Open Systems Interconnection) 422
19.18 ISO Open Systems Interconnection (OSI) 7-layer model 423
19.18.1 Application Layer (Layer 7) 424
19.18.2 Presentation - Layer 6 425
19.18.3 Session Layer - Layer 5 425
19.18.4 Transport Layer- Layer 4 426
19.18.5 Network - Layer 3 426
19.18.6 Data Link - Layer 2 426
19.18.7 Physical - Layer 1 427
19.19 Communication Protocols 428
19.19.1 Data protocols 428
19.19.2 Data Link 428
19.19.3 Data Link Protocol 428
19.20 Media Access Controls (MAC) 429
19.21 Token Ring 429
19.21.1 Token 429
19.21.2 Token Ring 429
19.21.3 Token Passing 429
19.22 Ethernet 431
19.22.1 Ethernet Cabling Systems 432
19.23 High-Speed Networking 432
19.24 FDDI (Fibre Distributed Data Interface) 432
19.241 FDDI-II 433
19.25 Gigabit Ethernet 433
19.25 X.25 434
19.26 Frame Relay 434
19.27 ATM 436
19.27.1 ATM Cell Relay 436
19.28 ISDN and the Future Office 436
19.29 Types of Networks 437
19.30 Local Area Networks 438
19.31 Characteristics of LANs 439
19.32 Types of LANs 440
19.33 LAN Implementation 440
19.34 LAN Protocols and the OSI Reference Model 441
19.35 LAN Protocols 441
19.35.1 Polling 441
19.35.2 Contention and CSMA/CD 441
19.35.3 Token passing 442

Scanned by TapScanner

19.36 Lan Topologies 442
19.36.1 Star LANs 442
19.36.2 Ring LANs 443
19.36.3 Bus LANs 443
19.36.4 Tree Topology 444
19.37 LAN Transmission Methods 444
19.38 LANs Data Transmission Methods 445
19.39 LAN Access Method and Technologies 445
19.39.1 CSMA/CD 445
19.39.2 IEEE 8019.3 LAN and CSMA/CD Protocol 445
19.39.3 Token Passing 446
19.40 Network Connections 446
19.41 Local Area Networking Hardware 448
19.41.1 Network Cable 448
19.41.2 Cable Interface Unit (Hub) 448
19.41.3 Network Interface Card [NIC] 449
19.41.4 Repeater 449
19.41.5 LAN Extender 450
19.41.6 Bridges Routers or Gateways 451
19.42 External Lan Connections 452
19.43 Types of LAN Models 452
19.43.1 Peer to Peer Lan Network 452
19.43.2 Client Server Architecture 453
19.44 LAN Software 455
19.44.1 Leading LAN Operating Systems Vendors 456
19.45 Advances in LAN Development 456
19.46 Digitization of the Network 457
19.47 MAN (Metropolitan Area Network) 457
19.48 WAN (Wide Area Network) 457
19.48.1 WAN Protocols 457
19.48.2 Network Architecture 458
19.48.3 System Network Architecture (SNA) 458
19.49 WAN Hardware 458
19.50 WAN Software 460
19.51 Types of WAN Connection Services 460
19.52 Difference Between LAN & WAN 461
19.53 Public Networks 461
19.54 Public Switched Telephone Network (PSTN) 461
19.55 Public Switched Data Networks (PSDN) 461
19.56 Value Added Services (VANs/VADs) 462
19.57 Integrated Services Digital Network (ISDN) 462
19.58 PDNs (Public Data Networks) 462
19.59 Common Carriers 463
19.60 Leased Telephone Lines 463
19.61 Dedicated Lines 463
19.62 Wireless Data Networks 463
19.62.1 Advantages of Wireless LAN 464
19.62.2 Wireless LAN Technology types 464
19.64 Virtual Private Networks 465
19.65 Backbone Networks 465
19.66 Private Branch Exchanges (PBX) 467
19.67 Hierarchical Networks 467

23. PRINCIPLES OF DATA SECURITY,MAINTENANCE AND TROUBLE SHOOTING 609
23.1 Security Concepts 609
23.2 Data Security 610
23.3 File Security 610
23.4 Logging 610
23.5 Ensuring complete processing of all data: 610
23.6 Protecting Programs from Accidental Erasure 610
23.7 Reconstruction of file in case of disaster 611
23.8 Prohibit tampering by unauthorised access: 612
23.9 Monitoring Computer Access and Usage. 612
23.10 Protecting Users from Each Other. 612
23.11 Methods of ensuring security: 612
23.11.1 Passwords 613
23.11.2 Encryption 613
23.12 Physical Security 614
23.12.1 Security against fire 614
23.12.2 Security against ESD (electrostatic discharge) 615
23.12.3 Security against power disturbances 615
23.13 Security Software 615
23.14 Failure and Recovery 615
23.15 Security on the Internet or Network 615
23.16 How does Internet Explorer help protect you and your data? 616
23.16.1 Security System of Internet 616
23.16.2 Security Zones 617
23.16.3 Digital IDs 617
23.16.4 Getting a Digital ID 618
23.16.5 Using your Digital ID 618
23.16.6 Backing up your Digital ID 618
23.16.7 Secure E-mail 618
23.16.8 Filling the form in internet 618
23.17 Viruses And The Internet 620
23.18 Firewall 620
23.18.1 Defensive Firewalls 620
23.19 Internet Security 621
23.20 User Accounts 621
23.21 Maintaining Your System 622
23.22 PC Preventive Maintenance 622
23.23 Troubleshooting Solution Basics 624
23.22.1 Using the Windows 98 troubleshooters 625

24. INFORMATION TECHNOLOGY APPLICATIONS 627
24.1 Information Technology Applications 627
24.1.1 Business data Processing 627
24.1.2 Scientific Computations 628
24.1.3 Process control 629
24.2 Financial Accounting 629
24.2.1 Financial Accounting and Cost Accounting 629
24.2.2 Computerized Financial Accounting Systems 631
24.2.3 Application Packages 631
