

ORGANIC SYNTHESIS

Jagdamba Singh
L.D.S. Yadav
Jaya Singh

A Pragati Edition

CONTENTS

0. ACRONYMS AND ABBREVIATIONS	(i)–(x)
1. REAGENTS IN ORGANIC SYNTHESIS	1–303
1.0 Organometallic compounds	01
1.1 Organomagnesium halides	02
1.2 Organolithium reagents	10
1.3 Organoaluminium compounds	21
1.4 Organocopper reagents	33
1.5 Organozinc compounds	41
1.6 Organocadmium compounds	46
1.7 Organomercury compounds	49
1.8 Organosilicon compounds	54
1.9 Organotin compounds	69
1.10 Organocerium compounds	76
1.11 Organotitanium compounds	78
1.12 Transition metal complexes in organic synthesis	82
1.13 Organopalladium compounds	87
1.14 Rhodium complex	101
1.15 Metal carbonyl complex of Fe, Co and Ni	107
1.16 Pentacarbonyliron	107
1.17 Octacarbonyl dicobalt	112
1.18 Tetracarbonylnickel	115
1.19 Organochromium compounds	118
1.20 Sodium borohydride	128
1.21 Lithium aluminium hydride	131
1.22 Diisobutylaluminium hydride (DIBAL)	138
1.23 Alkylboranes	140
1.24 Stereochemistry of reduction of cyclic ketones with metal hydrides	152
1.25 Reduction with dissolving metals	153

1.26 Reduction with alkali metals	154
1.27 Reduction with zinc	161
1.28 Baker's yeast	163
1.29 Lead tetraacetate	167
1.30 Periodic acid and periodate	173
1.31 Selenium dioxide	181
1.32 Aluminium isopropoxide	186
1.33 Aluminium tertiarybutoxide	188
←1.34 DDQ	190
1.35 Osmium tetroxide	198
←1.36 Prevost reagent	202
←1.37 Woodward reagent	204
←1.38 Dithianes	205
←1.39 Lithium diisopropylamide (LDA)	211
←1.40 Diazomethane	216
←1.41 1,3-Dicyclohexylcarbodiimide (DCC)	224
1.42 Phase transfer catalysts	230
1.43 Crown ether complexes	236
1.44 Polymer supported reagents : Merrifield resin	245
1.45 Diethyl azodicarboxylate	248
1.46 Hydrazine	260
1.47 Tosyl Hydrazide	263
<i>Problems</i>	270
<i>Problems for self Assessment</i>	279
<i>Solutions</i>	287
2. OXIDATION	304-379
2.0 Introduction	304
←2.1 Oxidation of hydrocarbons	308
←2.2 Oxidation of alcohols	332
←2.3 Oxidation of 1,2-diols	340
←2.4 Oxidation of aldehydes	343
←2.5 Oxidation of ketones	345

→2.6	Oxidation of carboxylic acids	349
→2.7	Oxidation of amines	350
→2.8	Oxidation of hydrazine	354
→2.9	Oxidation of sulphides	355
→2.10	Oxidation with ruthenium tetroxide	357
→2.11	Oxidation with thallium nitrate	358
→2.12	Oxidation with iodobenzene diacetate	361
	<i>Problems</i>	365
	<i>Problems for self Assessment</i>	370
	<i>Solutions</i>	373
3.	REDUCTION	380–437
3.0	Introduction	380
→3.1	Reduction of hydrocarbons	381
→3.2	Reduction of aldehydes and ketones	392
→3.3	Reduction of carboxylic acids	400
→3.4	Reduction of esters	401
→3.5	Reduction of acid chlorides	404
→3.6	Reduction of anhydrides	406
→3.7	Reduction of amides	407
→3.8	Reduction of nitriles	411
→3.9	Reduction of epoxides	413
→3.10	Reduction of nitro group	415
→3.11	Reduction of nitroso compounds	419
→3.12	Reduction of azo compounds	420
→3.13	Reduction of oximes	420
→3.14	Hydrogenolysis	421
	<i>Problems</i>	425
	<i>Problems for self Assessment</i>	429
	<i>Solutions</i>	432
4.	REARRANGEMENTS	438–561
4.0	Introduction	438

4.0.1	Heterolytic rearrangements	438
4.0.2	Homolytic rearrangements	439
4.0.3	Aromatic rearrangements	439
4.0.4	Nucleophilic rearrangements	439
4.0.5	Migratory aptitude	440
4.0.6	Migratory effects	441
4.1	Migration to electron deficient carbon or carbocation rearrangements	442
4.1.1	Pinacol-Pinacolone rearrangement	442
4.1.2	Semipinacol rearrangement	448
4.1.3	Wagner-Meerwein rearrangement	448
4.1.4	Tiffeneu-Demjanov rearrangement	452
4.1.5	Dienone-Phenol rearrangement	455
4.1.6	Wolff rearrangement	457
4.2	Rearrangements to electron-deficient nitrogen	460
4.2.1	The Beckmann rearrangement	460
4.2.2	The Hofmann rearrangement	466
4.2.3	Curtius rearrangement	468
4.2.4	The Lossen rearrangement	471
4.2.5	The Schmidt reaction	472
4.3	Rearrangements to electron deficient oxygen	477
4.3.1	The Baeyer-Villiger rearrangement	477
4.3.2	The hydroperoxide rearrangement	482
4.3.3	The Dakin rearrangement	484
4.3.4	Benzilic acid rearrangement	486
4.3.5	The Favorskii rearrangement	489
4.3.6	The Neber rearrangement	496
4.4	Electrophilic rearrangements	498
4.4.1	Stevens rearrangement	498
4.4.2	Sommelet-Hauser rearrangement	501
4.4.3	The Wittig rearrangement	504
4.4.4	The Smiles rearrangement	508
4.5	Aromatic Rearrangements	512
4.5.1	Isomerisation of xylenes	512

4.5.2	The Jacobsen rearrangement	513
4.5.3	The Orton rearrangement	515
4.5.4	The Hofmann-Martius rearrangement	517
4.5.5	Fischer-Hepp rearrangement	519
4.5.6	The Benzidine rearrangement	520
4.5.7	The Fries rearrangement	524
4.5.8	Claisen rearrangement	528
4.6	Miscellaneous rearrangements	533
4.6.1	von Richter rearrangement	533
4.6.2	Allylic rearrangements	536
4.6.3	Acetylene-alkene rearrangement	539
4.6.4	The Nazarov rearrangement	540
4.6.5	Shapiro reaction	541
	<i>Problems</i>	542
	<i>Problems for self Assessment</i>	546
	<i>Solutions</i>	554
5.	METALLOCENES, NONBENZENOID AROMATIC AND POLYCYCLIC AROMATIC COMPOUNDS	562-622
5.1	Metalloenes	562
5.1.1	Introduction	562
5.1.2	Synthesis of metallocenes	564
5.1.3	Ferrocene	565
5.1.4	General characteristics and chemical reactivity	567
5.1.5	Cobaltocene	570
5.1.6	Nickelocene	571
5.2	Nonbenzenoid aromatic compounds	572
5.2.1	Introduction	572
5.2.2	Monocyclic aromatic ions	573
5.2.3	Annulenes	578
5.2.4	Bicyclic nonbenzenoid aromatic compounds	582
5.3	Polycyclic aromatic compounds	584
5.3.1	Introduction	584

5.3.2	Nomenclature	583
5.3.3	General methods of preparation of polycyclic hydrocarbons	585
5.3.4	Linear ortho-fused polynuclear hydrocarbons	594
5.3.5	Non-linear ortho-fused polynuclear hydrocarbons	597
5.3.6	Ortho and peri-fused polynuclear hydrocarbons	600
5.3.7	Reactions of polycyclic aromatic hydrocarbons	606
5.3.8	Spectral properties of polycyclic aromatic hydrocarbons	611
5.3.9	Carcinogenic polycyclic hydrocarbons	613
	<i>Problems</i>	614
	<i>Problems for self Assessment</i>	616
	<i>Solutions</i>	619

6. DISCONNECTION APPROACH 623-699

6.1	Introduction	623
6.2	Disconnection approach	623
6.2.1	Synthons and synthetic equivalents	624
6.2.2	Definitions	626
6.2.3	Guidelines	626
6.2.4	Functional group interconversion	630
6.2.5	One group C-X disconnections	632
6.2.6	Two group C-X disconnections	635
6.2.7	One group C-C disconnections	638
6.2.8	Regioselectivity	645
6.2.9	Alkene synthesis	646
6.2.10	Use of acetylenes in organic synthesis	648
6.2.11	Use of aliphatic nitro compounds in organic synthesis	651
6.3	Two-group C-C disconnections	653
6.3.1	Diels-Alder reaction	653
6.3.2	1,3-Difunctional compounds	656
6.3.3	1,5-Difunctional compounds	664
	(Michael addition and Robinson annelation)	
6.4	The importance of the order of events in organic synthesis	667
6.5	Chemoselectivity	673

6.6	Reversal of polarity (Umpolung)	675
6.7	Cyclisation reactions (Synthesis of cyclic molecules)	678
6.8	Amine synthesis	680
	<i>Problems</i>	684
	<i>Problems for self Assessment</i>	686
	<i>Solutions</i>	688

7. PROTECTING GROUPS 700-740

7.1	Introduction	700
7.2	Protection of alcohols (R-OH)	701
7.2.1	Principle of protection of alcohols	701
7.2.2	Protecting groups for alcohols	701
7.2.3	Protecting groups for 1, 2- and 1, 3-diols	707
7.3	Protection of carbonyl groups	709
7.3.1	Principle of protection of carbonyl compounds	709
7.3.2	Protecting groups for carbonyl compounds	711
7.4	Protection of carboxylic group	718
7.4.1	Principle of protection of carboxylic group	718
7.4.2	Protecting group for carboxylic acids	719
7.5	Protection of amino group	725
7.5.1	Principle of protection of amino group	725
7.5.2	Protecting groups for amines	726
	<i>Problems</i>	735
	<i>Problems for self Assessment</i>	736
	<i>Solutions</i>	737

8. RING SYNTHESIS 741-780

8.1	Introduction	741
8.2	Synthesis of saturated heterocycles	742
8.2.1	Three-membered rings	743
8.2.2	Four-membered rings	744
8.2.3	Five-membered rings	747

8.2.4	Six-membered rings	749
8.3	Aromatic heterocycles in organic synthesis	749
8.4	Use of aromatic heterocycles in organic synthesis	751
8.4.1	Synthesis of alkenes and cycloalkanes	751
8.4.2	Synthesis of alkenes and and cycloalkenes	753
8.4.3	Synthesis of dienes, ene-yne, acetylenes and cycloalkynes	755
8.4.4	Synthesis of aromatic compounds	759
8.4.5	Synthesis of carbonyl compounds	762
8.4.6	Synthesis of carboxylic acids and their derivatives	766
	<i>Problems</i>	772
	<i>Problems for self Assessment</i>	774
	<i>Solutions</i>	777
9.	SYNTHESIS OF COMPLEX MOLECULES	781-800
9.1	Introduction	781
9.2	Synthesis of Camphor	781
9.3	Synthesis of Longifolene	782
9.4	Synthesis of Juvabione	784
9.5	Synthesis of Cortisone	787
9.6	Synthesis of Reserpine	790
9.7	Synthesis of Vitamin D	793
9.8	Synthesis of Fredericamycin A	795
	<i>Problems</i>	796
10.	METAL CARBENES AND OLEFIN METATHESIS	801-828
10.1	Metal Carbenes	801
10.2	Olefine Metathesis	804
10.3	Classification of Olefin Metathesis Reactions	806
10.4	Tebber's Reagent	817
	<i>Problems</i>	820
	<i>Solutions</i>	823
INDEX		829-832
