

MODERN
APPROACH TO

ORGANIC CHEMISTRY

B.Sc. PART-III, SEMESTER-V
(ALL UNIVERSITIES OF HARYANA)

Dr. J.M. Sehgal

Contents

1. NMR Spectroscopy

- 1.1 Introduction
- 1.2 Principle of NMR Spectroscopy
- 1.3 PMR Spectrum : Origin of Signals
- 1.4 Number of Signals : Equivalent and Non-equivalent Protons
- 1.5 Positions of Signals and Chemical Shifts
- 1.6 Peak Area and Proton Counting
- 1.7 Splitting of Signals : Spin-Spin Coupling
- 1.8 Coupling Constants
- 1.9 Magnetic Equivalence of Protons and Rate Processes
- 1.10 Applications of PMR Spectroscopy
- 1.11 Interpretation of PMR Spectra
- 1.12 Limitations of PMR Spectroscopy
- 1.13 PMR Spectra of Some Simple Compounds
- 1.14 Solved Problems on PMR Spectroscopy

1/1 - 1/64

Illustrative Conceptual Questions with Answers

2. Carbohydrates

- 2.1 Introduction
- 2.2 Classification
- 2.3 Nomenclature
- 2.4 D-(+) Glucose, Dextrose or Grape Sugar
- 2.5 D-(-) Fructose, Laevulose or Fruit Sugar
- 2.6 Interconversion of Glucose and Fructose
- 2.7 Chain Lengthening and Chain Shortening in Aldoses
- 2.8 Configurations of Monosaccharides
- 2.9 Experimental Evidence of Absolute Configurations of Aldoses
- 2.10 Epimerisation of an Aldose : Conversion of D-Glucose into D-Mannose
- 2.11 Ring Structure of D-(+)-Glucose : Determination of Ring Size
- 2.12 Ring Structure of D-(-)-Fructose
- 2.13 Structures of Ribose and Deoxyribose
- 2.14 Glycosides
- 2.15 Formation of Ethers
- 2.16 Formation of Esters
- 2.17 Sucrose, Cane-Sugar or Table Sugar
- 2.18 (+)-Maltose
- 2.19 (+)-Lactose
- 2.20 Starch
- 2.21 Cellulose
- 2.22 Reducing and Non-reducing Saccharides

2/1 - 2/62

Illustrative Conceptual Questions with Answers

3. Organometallic Compounds

- 3.1 Introduction
- 3.2 Preparation of Grignard Reagents
- 3.3 Structure of Grignard Reagents
- 3.4 Physical Properties of Grignard Reagents
- 3.5 Chemical Properties : Synthetic Applications
- 3.6 Abnormal Behaviour of Grignard Reagents
- 3.7 Synthetic Utility of Grignard Reagents
- 3.8 Limitations of Grignard Reagents
- 3.9 Preparation of Organolithium Compounds
- 3.10 Physical Properties
- 3.11 Chemical Properties : Synthetic Applications
- 3.12 Preparation of Organozinc Compounds
- 3.13 Physical Properties of Organozinc Compounds
- 3.14 Chemical Properties : Synthetic Applications
- 3.15 Iodomethylene Zinc Iodide

3/1 - 3/28

Illustrative Conceptual Questions with Answers

University Question Papers

1-3
