## *Preface*

1. **The Universe** 1  
Classification of Geological Time • Place of Earth  
• Earth's History • Earth's Interior • Mechanical  
Subdivision • Theory of Isostasy • Theory of  
Continental Drift • The Plates • Plate Boundary  
• Nature of Parallel Plates • Concept of Mass  
Movement • System of Erosion • River System  
• Functions of Rivers • Earth — an Important Planet  
• The Cosmology • Milky Way • Nebulae and Clusters  
of Star • Different Stars
  
2. **Solar System** 49  
Sun—the Central Body • Planetary System  
• Terrestrial Planets • Outer Planets • Other  
Components • The Origin
  
3. **The Earth** 67  
Theories of Evolution • Ancient Theories • History of  
Cooling • Recent Hypotheses • The Meteorites  
• Electromagnetic Theory • Cataclysmic Theories  
• Tidal Theories
  
4. **The Lithosphere** 91  
Mineral Forming Rocks • The Rocks • Kinds of Rock  
• The Division • Some Recognised Rocks • System  
of Sedimentation • System of Diagenesis • System

of Lithification • Colour Amount in Sedimentary Rocks • Some Recognised Sedimentary Rocks • Division of Metamorphic Rocks • Sorts of Metamorphism • Some Recognised Metamorphic Rocks • Cycle of Rock

5. The Soils

119

Components of Soil • Parent Materials • Profile of Soil • Fertility of Soil • Types of Soil • Classification of Soil • Erosion of Soil • Types of Erosion

6. The Oceans

137

Ocean Sediments Classifications • Marine Sediment Distribution • Continental Margins Sediments • Shallow Sea Deposits • Deep-Ocean Basins Sediments • Hydrogenous Materials • The Evaporites • Temperature and Salinity • Water Evaporation • Fresh Water and Sea Water • The Iceberg • Salinity of Water • Salinity Sources • Salinity Distribution • Closed Seas

7. The Glaciers

157

Glacial Landforms • The Formation • Various Types of Glaciers • Surface Features • Glacial Movements • Hanging Valleys • Types of Moraines • The Drumlins • The Eskers • Periglacial Landscapes • Phenomena of Frozen Ground • Process of Frost Action • Periglacial Landscape and Humans • Precambrian Ice Ages • The Cause • Wandering Poles Hypothesis • Hypothesis of Continental Drift • Hypothesis of Carbon Dioxide • Hypothesis of Volcanic Dust • Diastrophism Effects • Solar Radiation Variations • Hypothesis of Simpson • Global Warming and Ice Sheets

8. Water Systems

183

Common Patterns • Various Stream Types • Streams Ordering • The Characteristics • The Modification

	• Major Types of Rivers • Major Deltas • Age and History of Rivers	
9.	<b>Rivers Systems</b>	193
	Dynamics of River Systems • Fluvial Processes • Drainage Basin • The Characteristics • The Variables • River Valley Development • Cross Profile • Land Forms • Drainage System	
10.	<b>The Lakes</b>	209
	The Classification • Erosional Lakes • Depositional Lakes • Tectonic Origin Lakes • Lakes Formed by Landslides • Artificial Lakes	
11.	<b>Mountains and Plains</b>	217
	The Mountains • The Orogeny • Various Types • The Geosyncline • Various Mountain Forms • Types of Mountains • The Plateaus • The Plains • The Rocks • Major Characteristics • Other Types of Rocks	
12.	<b>The Reefs</b>	247
	Meaning and Definition • Various Types • The Atoll • Various Theories of Origin • Theory of Antecedent Platform • Theory of Glacial Control • Theory of Subsidence	
13.	<b>The Volcanoes</b>	255
	Reasons of Volcanic Eruptions • Various Types • Volcanic Mountains • Volcanic Materials • The Occurrence • Other Associated Features • Trouble for Society	
14.	<b>The Earthquakes</b>	269
	The Meaning • Measuring the Magnitude • The Intensity • Distributional Pattern • Scene in India • The Consequences • The Tsunamis • The Forecasting	
	<i>Bibliography</i>	287
	<i>Index</i>	293
