

Programming in C and PC Applications

Includes • dBase III+ • Lotus 1-2-3 • Wordstar

S P RAJAGOPALAN

VIKAS PUBLISHING HOUSE PVT LTD

CONTENTS

Preface v

Section 1 : C

Chapter 1: Introduction to C

- The five program steps 1.3
 - Initialization 1.4
 - Input 1.4
 - Processing 1.4
 - Output 1.4
 - Shutdown 1.4
- The structure of a C program 1.5
- The elements of a C program 1.5
 - Header files 1.6
 - The main() function 1.8
- The Parts of a C function 1.8
 - Function names 1.9
 - The function body 1.10
 - Function arguments 1.10
- Introduction to the C standard library 1.10
 - The ANSI standard library 1.11
 - Components of the standard library 1.12
- Review Questions 1.13*

Chapter 2: C Data Types

- Basic data types 1.14
 - The char data type 1.14
 - The double data type 1.14
 - The float data type 1.15
 - The int data type 1.15
- Data modifiers 1.16
 - The long modifier 1.16
 - The short modifier 1.16
 - The signed modifier 1.16
 - The unsigned modifier 1.16
- Keywords 1.17
- Constants 1.18
 - Integer constants 1.18
 - Floating-point constants 1.18
 - Character constants 1.19

1.1

1.3

1.14

viii ❖ *Programming in C and PC Applications*

- Variable names 1.19
- Understanding C expressions and statements 1.19
- Declaring variables in a program 1.20
 - Defining a variable 1.21
 - Storing a variable 1.21
 - Assignment statement 1.21
- Review Questions* 1.22

Chapter 3: Operators in C

- Basic arithmetic operators 1.23
 - Operator precedence 1.24
 - Parentheses 1.24
 - Associativity 1.25
- Preincrement and postincrement operators 1.27
- Predecrement and postdecrement operators 1.28
- Relational operators 1.30
 - The result of a relational operation 1.30
- Logical operators 1.31
 - The logical AND operator 1.32
 - The logical OR operator 1.33
- Review Questions* 1.34

Chapter 4: Planning and Executing a C Program

- Introduction 1.35
- Differences between compilers and interpreters 1.37
- Error diagnostics 1.39
- Logical debugging 1.39
- Detecting errors 1.39
- Review Questions* 1.40

Chapter 5: Characters and Functions in C

- Getting a single character 1.41
 - Getting a character with `getch()` 1.41
 - The `getchar()` function 1.42
 - The `gets()` function 1.43
 - The null termination character 1.43
 - The character string 1.44
 - The `scanf()` function 1.44
- Escape sequences, the newline character 1.46
- Field width 1.47
- Precision 1.48
- Modifier 1.48
- Different `printf()` formats 1.48
- The `putchar()` function 1.49
- The `puts()` function 1.49
- Review Questions* 1.50

Chapter 6: `if` keyword and Logical Operators in C

- `if` keyword 1.51
- Logical true other than 1 1.52
- Using `if-else` statements 1.52
 - Using `if-else` with multiple statements 1.53
- Programming with `if` and `if-else` 1.54

- The ternary operator 1.55
- Using nested if statements 1.56
- Program loops 1.57
 - Well-behaved loops 1.57
- Creating a loop with the goto statement 1.57
 - Using the exit() function 1.59
- While loops 1.59
- Do-while statement 1.61
 - Comparing the while and do-while statements 1.61
 - Using the break statement with a do-while loop 1.62
- The for loop 1.62
 - The initialization expression 1.63
 - The test expression 1.63
 - The control expression 1.64
 - Visualising a for loop 1.65
 - The break statement in for loops 1.65
 - The continue statement 1.66
- Using nested for loops 1.68
- The switch statement 1.69
 - Using the switch statement 1.70
 - Using the break statement 1.71
- Symbolic constants 1.72
 - The #define preprocessor directive 1.72
 - Advantages of using #define 1.74
- The default keyword 1.74
- Review Questions 1.75

Chapter 7: Functions in C

- Introduction 1.76
 - Function type specifier 1.76
 - Function name 1.77
 - Argument list 1.78
 - Start of function body 1.78
 - Function body 1.78
 - End of function 1.79
- Writing a function 1.79
 - The return statement 1.79
 - Selecting a function header style 1.80
- Function declarations 1.80
 - Function definitions versus function declarations 1.82
 - How the compiler views a function declaration 1.82
 - How the compiler views a function definition 1.83
- Function prototyping 1.83
 - Two varieties of prototypes 1.84
 - The purpose of function prototypes 1.84
 - Testing your compiler's prototype checking 1.85
- Creating your own function declarations and prototypes 1.86
 - Using header files for function declarations 1.86
- Scope of identifiers 1.87
 - Understanding local scope 1.87
 - Variables with global scope 1.89
- Recursion 1.90
- Review Questions 1.90

Chapter 8: Arrays

- Introduction 1.92
- Defining arrays 1.92
 - The sizeof operator 1.93
- Two-dimensional arrays 1.94
 - Starting array elements with 0 1.94
- Initializing character arrays 1.95
- Initializing numeric arrays 1.97
- Three-dimensional arrays 1.98
- Passing arrays to a function 1.98
- Review Questions 1.99*

Chapter 9: Pointers

- Pointer Variable 1.100
- The pointer definition's asterisk 1.101
- Using a pointer 1.101
 - Initializing a pointer variable 1.102
 - Using indirection with a pointer 1.103
 - The three rules for using pointers 1.104
- Using the increment and decrement operators on pointers 1.104
 - Using the decrement operator with a pointer 1.105
 - Using the increment operator with a pointer 1.107
- Advantages of using a pointer 1.108
- Using a null pointer 1.109
 - Using the null pointer in a logical test 1.109
 - Releasing dynamic memory allocations with free() 1.110
- Using a pointer to a function 1.110
- Review Questions 1.112*

Chapter 10: Structures in C

- Introduction 1.113
- Declaring a structure 1.113
- Defining a structure variable 1.114
 - Declaring and defining a structure with one statement 1.115
 - Defining a structure variable without a structure tag 1.116
 - Using an initializer list with a structure 1.116
- Referencing a structure member 1.117
 - Using the dot operator 1.117
 - Using array members of a structure 1.118
- Using structures with function calls 1.119
 - Using return values from functions with structures 1.120
 - Passing a structure to a function 1.120
- Using pointers with structures 1.122
 - Using the arrow operator 1.123
- Arrays of structures 1.124
- Improving code using arrays of structures 1.125
 - Initializing arrays of structures 1.125
- Understanding unions 1.126
- Review Questions 1.127*

Chapter 11: File Organisation

- Introduction 1.129
- Opening a disk file 1.129

- The file structure 1.129
- Predefined file structures 1.130
- Using the fopen() standard library function 1.131
- Coping with fopen() errors 1.132
- Reading a disk file 1.132
- Closing a disk file 1.133
- Reading text files one line at a time 1.134
- Reading files in convenient chunks 1.135
- Reading and writing a data file: A sample program 1.135
 - Getting ready to write the data 1.135
 - Reading the data 1.137
- Writing to the printer 1.138
 - The PRN file in MS-DOS 1.138
 - Writing formatted output to the printer 1.139
- Command line arguments 1.140
- Review Questions 1.141*

Chapter 12: Programming Examples in C

1.143

Section 2 : 1-2-3

2.1

Chapter 1: An Overview

2.3

- Introduction 2.3
- What is 1-2-3 2.3
 - 1-2-3 “electronic” spreadsheet 2.3
 - Spreadsheet commands 2.4
 - Copying cell entries 2.5
 - Recalculating the worksheet 2.5
- Review Questions 2.6*

Chapter 2: Handling Data in 1-2-3

2.7

- Introduction 2.7
 - Entering data into the worksheet 2.7
 - Editing data in the worksheet 2.12
 - Moving around the spreadsheet 2.14
 - Jumping to a cell 2.16
- Using HAL for basic spreadsheet operations 2.16
- Selecting commands from command menus 2.17
- Using ranges in the worksheet 2.18
 - Naming ranges 2.20
 - Using range names to streamline your work 2.21
 - Deleting range names 2.23
 - Erasing ranges 2.23
 - Getting a list of range names 2.23
 - Creating a table of range names 2.24
 - Using worksheet commands 2.25
 - Erasing the worksheet 2.25
 - Setting column widths 2.26
 - Splitting the screen 2.26
 - Freezing titles on the screen 2.27
 - Inserting rows and columns 2.30
 - Deleting rows and columns 2.32
- Review Questions 2.35*

Chapter 3: Print Settings

- Understanding the print default settings 2.36
 - Current printer status 2.36
- Global default hardware-specific options 2.36
 - Other default options : wait, setup, and name 2.38
- Changing the print options 2.39
 - Headers and footers 2.39
 - Borders 2.41
- Review Questions 2.43

Chapter 4: Graphs

- Creating graphs 2.44
 - Creating a simple bar graph 2.44
 - Creating enhanced graphs 2.46
- Printing .PIC (Graph) Files 2.51
 - Using default print graph settings 2.51
 - Changing print graph settings 2.52
- Review Questions 2.53

Chapter 5: Functions in 1-2-3

- Introduction 2.54
 - Mathematical functions 2.54
 - Logarithmic functions 2.56
 - Statistical functions 2.59
 - Advanced statistical functions 2.63
- Review Questions 2.68

Chapter 6: Macros

- What is a macro? 2.69
 - The elements of macros 2.69
 - Function key grammar 2.70
- Creating, using, and debugging macros 2.71
 - Planning your macro 2.71
 - Where to put the macro 2.72
 - Documenting your macros 2.72
 - Naming macros 2.73
- Executing macros 2.75
 - Automatic macros 2.75
 - Editing the macro 2.75
- Review Questions 2.76

Section 3 :dBASE III PLUS

Chapter 1: Introduction to dBASE III PLUS

- Introduction to database 3.3
- Computers in database 3.3
- dBASE III PLUS 3.3
- Database file, record and field 3.4
- Assist mode 3.4
- Review Questions 3.6

Chapter 2: Starting dBASE III PLUS

- Creating a database file 3.7
- Entering data in records 3.10
- Listing the contents of the database file 3.11
- Listing selected fields 3.12
- Searching for specific records with LIST 3.13
- More options with LIST 3.15
- Adding more records with APPEND 3.16
- Review Questions 3.18

Chapter 3: Editing and Deleting Data in dBASE III PLUS

- Displaying information with DISPLAY 3.19
- Searching for information in the database file with LOCATE 3.22
- Searching for information within a field 3.23
- Editing data in a record 3.24
- Editing multiple records with BROWSE 3.26
- Options with BROWSE 3.27
- Editing selected fields with BROWSE 3.28
 - Reducing field width 3.29
- Changing data with CHANGE 3.29
- Moving between records 3.30
- Replacing field contents with REPLACE 3.32
- Deleting unwanted records with DELETE 3.34
- Recalling deleted records with RECALL 3.35
- Removing records permanently with PACK 3.36
- Changing screen settings 3.36
- Condition clause 3.37
- Review Questions 3.38

Chapter 4: The Sort and Index Commands

- Sorting in dBASE III PLUS 3.39
- Sorting information with SORT 3.39
- Sorting on multiple fields 3.41
- Disadvantages of using SORT 3.42
- Indexing database file with INDEX 3.43
- Advantages of indexing over sorting 3.44
 - Small index files 3.44
 - Automatic updating of index files 3.44
- Searching for data in indexed file 3.46
- Finding information with FIND 3.47
- Finding information with SEEK 3.48
- Indexing on multiple fields 3.48
- Date manipulation 3.49
- Converting numeric data to characters with STR() 3.49
- Function keys 3.51
- Review Questions 3.53

Chapter 5: Command Files in dBASE III PLUS

- Introduction 3.55
- Creating a command file 3.56
- Running a command file 3.57
- Programming in dBASE III PLUS 3.57

- DO WHILE-ENDDO() 3.57
- Printing database files using command files 3.59
- Editing a command file 3.61
- Advantages of a command file 3.62
 - Other TRIM functions 3.62
- Adding comments to executable commands 3.63
- Review Questions* 3.63

Chapter 6: Programming in dBASE III PLUS

- Introduction 3.64
- Using IF-ENDIF 3.65
- Handling multiple choices with DO CASE-ENDCASE 3.70
- Macro substitution 3.72
- Review Questions* 3.74

Chapter 7: Mathematical Commands and Other Functions

- Introduction 3.75
- Arithmetic operations 3.75
 - Subtraction 3.76
 - Multiplication 3.76
 - Division 3.76
 - Exponentiation 3.77
- Mathematical commands 3.77
 - AVERAGE 3.77
 - SUM 3.78
 - COUNT 3.79
- Other dBASE III PLUS functions 3.79
 - SQRT() 3.79
 - LOG() 3.79
 - INT() 3.80
 - ROUND() 3.80
 - ABS() 3.80
 - MIN() 3.81
 - MAX() 3.81
 - MOD() 3.81
 - EXP() 3.81
 - LEN() 3.81
- Review Questions* 3.82

Chapter 8: Handling Multiple Databases

- Introduction 3.83
- Opening multiple database files 3.84
- Selecting work area 3.84
- Linking database files with set relation 3.85
 - What is a relation? 3.88
- Updating information with UPDATE 3.88
- Appending records using APPEND FROM 3.90
- Copying records to other files 3.90
- Copying structure of database file 3.91
- Joining two database files with JOIN 3.92
- Review Questions* 3.93

Chapter 9: Programming Examples in dBASE III PLUS

Section 4 : WordStar

4.1

Chapter 1: Introduction to WordStar

- Introduction 4.3
 - On-screen formatting 4.3
 - Word wrap 4.3
 - Other programs 4.3
 - On-screen help 4.3
 - Formatting features 4.4
- Review Questions* 4.5

4.3

Chapter 2: File Handling in WordStar

- Introduction 4.6
 - Changing the logged disk 4.6
 - Listing file names 4.7
 - Getting on-screen help 4.7
 - Opening files 4.7
 - Non-document files 4.7
 - Renaming files 4.8
 - Deleting files 4.8
 - Copying files 4.9
 - Running other programs 4.9
 - Exiting WordStar 4.10
 - Interrupting commands 4.10
 - Avoiding 'disk full' problems 4.11
 - Recovering from 'disk full' problems 4.12
- Review Questions* 4.13

4.6

Chapter 3: Merging Files Using MailMerge

- Introduction 4.14
 - Writing a form letter 4.14
 - Variable names 4.14
 - Variable values 4.15
 - Data files 4.15
 - Matrix documents 4.16
 - Page numbering 4.17
 - Page breaks 4.17
 - Comments 4.17
 - Printing out merged documents 4.18
 - Asking for values 4.19
 - Multiple copies with .AV 4.19
 - Prompting yourself 4.20
 - Checking yourself 4.20
 - Merging whole files 4.20
 - Creating command files 4.21
 - Chain printing 4.21
 - Mailing labels 4.22
 - Alternating letters with envelopes 4.22
- Review Questions* 4.22

4.14

Chapter 4: On-screen Formatting

- Introduction 4.23
 - Setting the Margins 4.23

4.23

- Setting the tabs 4.24
- Setting a temporary left margin 4.24
- Making your own ruler line 4.24
- Centering lines 4.25
- Spacing lines 4.25
- Turning word wrap off 4.25
- Hiding the ruler line 4.25
- Justifying the right margin 4.25
- Turning variable tabs off 4.26
- Hyphenation 4.26
- Hiding control characters 4.27
- Hiding page-break display 4.27
- Special print commands and dot commands 4.28
 - Bold-facing 4.28
 - Double-striking 4.28
 - Underlining 4.29
 - Striking out 4.29
 - Subscripts and superscripts 4.29
 - Overprinting characters 4.29
 - Non-break spaces 4.30
 - Printing special characters 4.30
 - Overprinting lines 4.30
 - Changing pitch 4.31
 - Changing print elements 4.31
 - Changing ribbons 4.31
 - Defining your own print features 4.31
 - Dot commands 4.31
- Review Questions 4.32

Chapter 5: WordStar Commands

- Editing 4.34
 - Basic editing 4.34
 - Place-marking 4.34
 - Searching and replacing 4.34
- Dot commands 4.34
 - Vertical spacing 4.34
 - Horizontal spacing 4.35
 - Pagination 4.35
 - Headers and footers 4.35
 - Miscellaneous 4.35
- Deleting 4.35
 - Formatting 4.35
 - Margins and tabs 4.35
 - Lines 4.36
 - On/off toggles 4.36
- Printing 4.36
 - On/off toggles 4.36
- Locks 4.36
- Filing 4.37
 - Saving files 4.37

4.34

Handling files 4.37
Help 4.37
 Setting the help level 4.37
 Getting help 4.37
Cursor moving and scrolling 4.38
 Moving the cursor 4.38
 Scrolling 4.38
Review Questions 4.39
