RREAL-TIME UML SECOND EDITION DEVELOPING EFFICIENT OBJECTS FOR EMBEDDED SYSTEMS

BRUCE POWEL DOUGLASS

Foreword by Professor David Harel
The Weizmann Institute of Science

001.552

Contents

Figure List.....	xi
About the Author	xv
Foreword by David Harel.....	xvii
Preface to the Second Edition.....	xxiii
Preface to the First Edition.....	xxvii
Acknowledgments	xxx
Chapter 1: Introduction to Real-Time Systems and Objects	1
1.1 What Is Special About Real-Time Systems?	2
1.2 Dealing with Time.....	7
1.3 Model-Based Development	11
1.3.1 Development Activities of the ROPES Process.....	12
1.4 Advantages of Objects.....	16
1.5 Object Orientation with UML.....	19
1.5.1 Objects	20
1.5.2 Attributes	25
1.5.3 Behavior.....	25
1.5.4 Messaging	29
1.5.5 Concurrency.....	31
1.5.6 Classes	31
1.5.7 Relations Among Classes and Objects	34
1.6 UML Diagrams and Notation.....	43
1.7 A Look Ahead	47
1.8 References	47
Chapter 2: Requirements Analysis of Real-Time Systems	49
2.1 Use Cases.....	50
2.1.1 Actors.....	50
2.1.2 Requirements.....	55

2.1.3	Use Case Relations	5
2.1.4	Using Use Cases	5
2.2	Filling Out the Details of the Use Cases	5
2.2.1	Scenarios.....	6
2.2.2	Sequence Diagrams.....	6
2.2.3	Message Properties	6
2.2.4	Capturing Time and Timeliness	6
2.2.5	Statecharts and Use Cases.....	7
2.3	Identifying Use Cases	7
2.4	Looking Ahead	7
2.5	References	7
Chapter 3:	Analysis: Defining the Object Structure.....	79
3.1	The Object Discovery Process.....	80
3.2	Connecting the Object Model with the Use Case Model	81
3.3	Key Strategies for Object Identification.....	83
3.3.1	Underline the Noun Strategy	83
3.3.2	Identify the Casual Objects	86
3.3.3	Identify Services (Passive Contributors).....	88
3.3.4	Identify Real-World Items.....	89
3.3.5	Identify Physical Devices	89
3.3.6	Identify Key Concepts	90
3.3.7	Identify Transactions	91
3.3.8	Identify Persistent Information.....	93
3.3.9	Identify Visual Elements	93
3.3.10	Identify Control Elements.....	97
3.3.11	Apply Scenarios	97
3.4	Identify Object Associations	99
3.5	Object Attributes	102
3.6	Discovering Candidate Classes.....	105
3.7	Class Diagrams.....	106
3.7.1	Elevator Class Diagram Example	109
3.8	Defining Class Relationships	111
3.8.1	Associations	112
3.8.2	Aggregation and Composition.....	114
3.8.3	RTOS Example	114
3.8.4	Associative Classes	118
3.8.5	Generalization Relationships	121

3.9	Looking Ahead	129
3.10	References	130
Chapter 4:	Analysis: Defining Object Behavior.....	131
4.1	Object Behavior	132
4.1.1	Simple Behavior	132
4.1.2	State Behavior	133
4.1.3	Continuous Behavior	134
4.2	Defining Object State Behavior	134
4.3	UML Statecharts	137
4.3.1	Basic Statecharts	138
4.3.2	And-States	150
4.3.3	Submachines	157
4.3.4	Inherited State Models	159
4.3.5	Cardiac Pacemaker Example	161
4.4	The Role of Scenarios in the Definition of Behavior.....	170
4.4.1	Timing Diagrams.....	170
4.4.2	Sequence Diagrams.....	174
4.4.3	Event Hierarchies.....	179
4.5	Defining Operations	180
4.5.1	Types of Operations	182
4.5.2	Strategies for Defining Operations	185
4.6	Looking Ahead	188
4.7	References	188
Chapter 5:	Architectural Design	191
5.1	Overview of Design	192
5.2	What Is Architectural Design?.....	194
5.2.1	Physical Architecture Issues	195
5.2.2	Software Architecture Issues	196
5.3	Representing Physical Architecture in UML	202
5.4	Architectural Patterns.....	205
5.4.1	Master-Slave Pattern.....	207
5.4.2	Microkernel Pattern	209
5.4.3	Proxy Pattern	211
5.4.4	Broker Pattern.....	213
5.5	Concurrency Design	215

5.6	Representing Threads.....	215
5.6.1	System Task Diagram.....	216
5.6.2	Concurrent State Diagrams.....	217
5.7	Defining Threads.....	220
5.7.1	Identifying Threads.....	221
5.8	Assigning Objects to Threads.....	223
5.9	Defining Thread Rendezvous.....	224
5.9.1	Sharing Resources.....	226
5.9.2	Assigning Priorities.....	226
5.10	Looking Ahead.....	227
5.11	References.....	228
Chapter 6:	Mechanistic Design.....	229
6.1	What Is Mechanistic Design?.....	230
6.2	Mechanistic Design Patterns.....	232
6.2.1	Simple Patterns.....	234
6.2.2	Reuse Patterns.....	247
6.3	Looking Ahead.....	260
6.4	References.....	261
Chapter 7:	Detailed Design.....	263
7.1	What Is Detailed Design?.....	263
7.2	Data Structure.....	264
7.2.1	Data Collection Structure.....	270
7.3	Associations.....	271
7.4	Operations.....	274
7.5	Visibility.....	276
7.6	Algorithms.....	277
7.7	Exceptions.....	286
7.8	Summary.....	289
7.9	References.....	290
Appendix A:	Notational Summary.....	291
Appendix B:	The Future of the UML for Real-Time.....	311
Index.....		317
