<i>Preface to the Third Edition</i>	viii
<i>Preface to the Second Edition</i>	ix
<i>Preface to the First Edition</i>	xi
1. Research Methodology: An Introduction	1
1.1 Meaning of Research ✓	1
1.2 Objectives of Research	2
1.3 Types of Research	2
1.4 Research Approaches	4
1.5 Significance of Research ✓	5
1.6 Research Methods versus Methodology	6
1.7 Research and Scientific Method	8
1.8 Research Process - - ✓	9
1.9 Criteria of Good Research	15
1.10 Problems Encountered by Researchers in India	20
2. Defining the Research Problem	22
2.1 What is a Research Problem?	23
2.2 Selecting the Problem	23
2.3 Necessity of Defining the Problem	24
2.4 Technique Involved in Defining a Problem	24
2.5 An Illustration	25
2.6 Conclusion	25

3. Research Design	29
3.1 Meaning of Research Design	29
3.2 Need for Research Design	30
3.3 Features of a Good Design	31
3.4 Important Concepts Relating to Research Design	31
3.4.1 Dependent and Independent Variables	32
3.4.2 Extraneous Variable	32
3.4.3 Control	32
3.4.4 Confounded Relationship	32
3.4.5 Research Hypothesis	33
3.4.6 Experimental and Non-Experimental Hypothesis-Testing Research	33
3.4.7 Experimental and Control Groups	33
3.4.8 Treatments	33
3.4.9 Experiment	34
3.4.10 Experimental Unit(s)	34
3.5 Different Research Designs	34
3.5.1 Research Design in Case of Exploratory Research Studies	34
3.5.2 Research Design in Case of Descriptive and Diagnostic Research Studies	35
3.5.3 Research Design in Case of Hypothesis-Testing Research Studies	38
3.6 Basic Principles of Experimental Designs	38
3.7 Important Experimental Designs	39
3.7.1 Before-and-After Without Control Design	40
3.7.2 After-Only with Control Design	40
3.7.3 Before-and-After with Control Design	41
3.7.4 Completely Randomized Design (C.R. Design)	41
3.7.5 Randomized Block Design (R.B. Design)	44
3.7.6 Latin Square Design (L.S. Design)	45
3.7.7 Factorial Designs	46
3.8 Conclusion	51
4. Design of Sample Surveys	52
4.1 Introduction	52
4.2 Sample Design	52
4.3 Sampling and Non-sampling Errors	54
4.3.1 Sampling Errors	54
4.3.2 Non-sampling Errors	55
4.4 Sample Survey Vs. Census Survey	55
4.5 Types of Sampling Designs	55

- 4.5.1 Non-probability Sampling
- 4.5.2 Probability Sampling 55
- 4.5.3 Complex Random Sampling Designs 56

58

5. Measurement and Scaling

66

- 5.1 Quantitative and Qualitative Data 66
- 5.2 Classifications of Measurement Scales 66
- 5.3 Goodness of Measurement Scales 67
- 5.4 Sources of Error in Measurement 70
- 5.5 Techniques of Developing Measurement Tools 72
- 5.6 Scaling 72
- 5.7 Scale Classification Bases 73
- 5.8 Scaling Techniques 74
- 5.8.1 Comparative Scaling Techniques 75
- 5.8.2 Non-comparative Scaling Techniques 76
- 5.9 Multidimensional Scaling 79
- 5.10 Deciding the Scale 85

87

6. Data Collection

89

- 6.1 Introduction 89
- 6.2 Experiments and Surveys 89
- 6.3 Collection of Primary Data 91
- 6.3.1 Difference between Questionnaire and Schedule 100
- 6.3.2 Guidelines for Constructing Questionnaire/Schedule 101
- 6.3.3 Some Other Methods of Data Collection 102
- 6.4 Collection of Secondary Data 107
- 6.5 Selection of Appropriate Method for Data Collection 108
- 6.6 Case Study Method 109

7. Data Preparation

114

- 7.1 Data Preparation Process 114
- 7.1.1 Questionnaire Checking 114
- 7.1.2 Editing 115
- 7.1.3 Coding 115
- 7.1.4 Classification 116
- 7.1.5 Tabulation 119
- 7.1.6 Graphical Representation 121
- 7.1.7 Data Cleaning 124
- Data Adjusting 124

7.2	Some Problems in Preparation Process	125
7.3	Missing Values and Outliers	126
7.4	Types of Analysis	126
7.5	Statistics in Research	127
8. Descriptive Statistics		129
8.1	Measures of Central Tendency	129
8.1.1	Mean	129
8.1.2	Median	130
8.1.3	Mode	131
8.1.4	Other Averages	131
8.2	Measures of Dispersion	132
8.2.1	Range	132
8.2.2	Mean Deviation	132
8.2.3	Standard Deviation	133
8.3	Measures of Skewness	134
8.4	Kurtosis	136
8.5	Measures of Relationship	136
8.5.1	Covariance	138
8.5.2	Karl Pearson's Coefficient of Correlation	139
8.5.3	Rank Correlation	140
8.6	Association in Case of Attributes	140
8.7	Other Measures	141
8.7.1	Index Numbers	141
8.7.2	Time Series	141
9. Sampling and Statistical Inference		147
9.1	Parameter and Statistic	148
9.2	Sampling and Non-sampling Errors	148
9.3	Sampling Distribution	149
9.3.1	Sampling Distribution of Mean	150
9.3.2	Sampling Distribution of Proportion	150
9.3.3	Student's t -Distribution	151
9.3.4	Chi-square (χ^2) Distribution	151
9.3.5	Snedecor's F -Distribution	152
9.4	Degree of Freedom	152
9.5	Standard Error	152
9.6	Central Limit Theorem	153

9.7	Finite Population Correction	154
9.8	Statistical Inference	154
9.8.1	Point Estimation	154
9.8.2	Interval Estimation	156
9.8.3	Sample Size and its Determination	162
9.8.4	Tests of Significance (Hypothesis Testing)	170
10.	Testing of Hypothesis	179
10.1	What is a Hypothesis?	179
10.2	Basic Concepts Concerning Testing of Hypothesis	180
10.2.1	Null Hypothesis and Alternative Hypothesis	180
10.2.2	Type I and Type II Errors	181
10.2.3	Level of Significance	182
10.2.4	Two-Tailed and One-Tailed Tests	182
10.3	Testing the Hypothesis	183
10.4	Test Statistic and Critical Region	183
10.5	Critical Value and Decision Rule	184
10.6	Procedure for Hypothesis Testing	185
10.7	Hypothesis Testing for Mean	187
10.8	Hypothesis Testing for Proportion	190
10.9	Hypothesis Testing for Variance	191
10.10	Hypothesis Testing for Difference of Two Mean	194
10.11	Hypothesis Testing for Difference of Two Proportions	198
10.12	Hypothesis Testing for Difference of Two Variances	199
10.13	<i>P</i> -Value Approach	202
10.14	Power of the Test	204
10.15	Limitations of the Tests of Hypotheses	206
11.	Chi-Square Tests	235
11.1	Test of Difference of more than Two Proportions	235
11.2	Test of Independence of Attributes	237
11.2.1	Alternative Formula	242
11.2.2	Yates' Correction	242
11.2.3	Magnitude of Association	243
11.2.4	Coefficient of Contingency	243
11.3	Test of Goodness of Fit	244
11.3.1	Goodness of Fit Test for Normal Distribution	245
11.4	Caution in Using Chi Square Tests	247

12. Analysis of Variance	26
12.1 The Anova Technique	26
12.2 The Basic Principle of ANOVA	26
12.3 One Way ANOVA	26
12.3.1 Analysis of Variance Table	26
12.3.2 Short-cut Method for One-way ANOVA	26
12.3.3 Critical Difference	26
12.4 Two Way ANOVA	27
12.4.1 One Observation per Cell	27
12.4.2 More than One Observations Per Cell	27
12.5 Latin-square Design	27
12.6 Analysis of Co-variance (ANOCOVA)	28
13. Other Nonparametric Methods	29
13.1 Sign Tests	29
13.1.1 One Sample Sign Test	29
13.1.2 Two Samples Sign Test (Paired Sign Test)	29
13.2 Wilcoxon Signed Rank Sum Test for Single Population	29
13.2.1 Wilcoxon Signed Rank Sum Test (Single Sample)	29
13.2.2 Wilcoxon Signed Rank Sum Test (Paired Samples) or Wilcoxon Matched Pairs Test	29
13.3 Mann Whitney U Test	29
13.4 Run Test	30
13.5 Kruskal Wallis Test	30
13.6 Spearman's Rank Correlation	30
13.7 Some Features of Non-parametric Tests	30
14. Linear Regression Analysis	31
14.1 Dependent and Independent Variables	31
14.2 Simple Linear Regression Model	31
14.2.1 Least Squares Estimation	31
14.2.2 Coefficient of Determination	31
14.2.3 Standard Error	31
14.2.4 Assumptions or Conditions Required	31
14.2.5 Testing the Hypothesis about the Slope and Correlation Coefficient	32
14.2.6 Confidence Interval Estimate of the Slope	32
14.2.7 Confidence Interval	32

14.2.8	Prediction Interval	326
14.2.9	Using Excel	327
14.3	Multiple Linear Regression Model	328
14.3.1	Least Squares Estimation	329
14.3.2	R^2 and Adjusted R^2 Coefficients	331
14.3.3	Standard Error	331
14.3.4	Assumptions	332
14.3.5	t -Test for the Slopes	333
14.3.6	F -Test (ANOVA)	334
14.3.7	Confidence Interval Estimates of the Regression Coefficients	335
14.3.8	Confidence Interval of Mean Response and Prediction Interval of Individual Response	336
14.4	Problem of Multicollinearity	339
14.4.1	Variance Inflationary Factor	340
14.4.2	Variable Elimination	341
14.5	Qualitative Explanatory Variables	344
14.6	Using SPSS	

15. Factor Analysis

348

15.1	The Mathematical Basis	348
15.2	Important Methods of Factor Analysis	349
15.2.1	Centroid Method	350
15.2.2	Principal Components Method	356
15.2.3	Maximum Likelihood Method	361
15.3	Rotation in Factor Analysis	362
15.4	R -Type and Q -Type Factor Analysis	362
15.5	Merits and Demerits of Factor Analysis	362
15.6	Using SPSS	363

16. Discriminant Analysis

373

16.1	Introduction	373
16.2	Two Group Discriminant Analysis	376
16.2.1	Methodology	377
16.2.2	Assumptions	378
16.2.3	Using SPSS	378
16.2.4	Predicting Group Membership	382
16.3	Multiple Discriminant Analysis	383
16.3.1	Methodology	383
16.3.2	Using SPSS	383

17. Cluster Analysis

- 17.1 Introduction
- 17.2 Distance Measures
- 17.3 Clustering Algorithms
 - 17.3.1 Non-hierarchical Clustering
 - 17.3.2 Hierarchical Clustering
- 17.4 Agglomerative Clustering
 - 17.4.1 Combining Clusters
 - 17.4.2 Using SPSS

18. Other Multivariate Techniques

- 18.1 Characteristics and Applications
- 18.2 Classification of Multivariate Techniques
- 18.3 Some Multivariate Techniques
 - 18.3.1 Path Analysis
 - 18.3.2 Canonical Correlation
 - 18.3.3 Multidimensional Scaling
 - 18.3.4 Multivariate Anova
 - 18.3.5 Latent Structure Analysis
- 18.4 Conclusions

19. Interpretation and Report Writing

- 19.1 Meaning of Interpretation
- 19.2 Techniques of Interpretation
- 19.3 Precautions in Interpretation
- 19.4 Significance of Report Writing
- 19.5 Different Steps in Writing Report
- 19.6 Layout of the Research Report
- 19.7 Types of Reports
- 19.8 Oral Presentation
- 19.9 Mechanics of Writing a Research Report
- 19.10 Precautions for Writing Research Reports
- 19.11 Conclusion

Appendix
