SECOND EDITION

# RESEARCH methodology

A STEP-BY-STEP  
GUIDE FOR BEGINNERS

ranjit kumar

This edition is manufactured in India and is authorized for sale only in India, Bangladesh, Bhutan, Pakistan, Nepal, Sri Lanka and the Maldives. Circulation of this edition outside of these territories is UNAUTHORIZED.

# CONTENTS

<b>Figures</b>	<b>xii</b>
<b>Tables</b>	<b>xv</b>
<b>Preface</b>	<b>xvii</b>
<b>1 Research: a way of thinking</b>	<b>1</b>
Research: a way of examining your practice	2
Applications of research	4
Definitions of research	6
Characteristics of research	7
Types of research	8
Application	9
Objectives	10
Inquiry mode	12
Paradigms of research	13
Summary	14
<b>2 The research process: a quick glance</b>	<b>15</b>
The research process: an eight-step model	16
Steps in planning a research study	20
Step I: formulating a research problem	20
Step II: conceptualising a research design	20
Step III: constructing an instrument for data collection	22
Step IV: selecting a sample	23
Step V: writing a research proposal	23
Steps in conducting a study	24
Step VI: collecting data	24
Step VII: processing data	24
Step VIII: writing a research report	25
Summary	25

<b>Step I Formulating a research problem</b>	<b>27</b>
<b>3 Reviewing the literature</b>	<b>29</b>
Place of literature review in research	30
Bring clarity and focus to your research problem	30
Improve your methodology	31
Broaden your knowledge base in your research area	31
Contextualise your findings	31
Procedure for reviewing the literature	32
Search for existing literature	35
Review the literature selected	35
Develop a theoretical framework	37
Develop a conceptual framework	37
Writing up the literature reviewed	38
Summary	<b>39</b>
<b>4 Formulating a research problem</b>	<b>40</b>
The research problem	40
The importance of formulating a research problem	41
Sources of research problems	43
Considerations in selecting a research problem	44
Steps in the formulation of a research problem	50
The formulation of objectives	51
Establishing operational definitions	53
Summary	<b>54</b>
<b>5 Identifying variables</b>	<b>55</b>
The definition of a variable	56
The difference between a concept and a variable	57
Concepts, indicators and variables	60
Types of variable	60
From the viewpoint of causation	63
From the viewpoint of the study design	64
From the viewpoint of the unit of measurement	66
Types of measurement scale	67
The nominal or classificatory scale	67
The ordinal or ranking scale	68
The interval scale	70
The ratio scale	71
Summary	<b>72</b>
<b>6 Constructing hypotheses</b>	<b>73</b>
The definition of a hypothesis	74
The functions of a hypothesis	75
The characteristics of a hypothesis	76
Types of hypothesis	78
Errors in testing a hypothesis	79
Summary	

<b>Step II Conceptualising a research design</b>	<b>81</b>
<b>7 The research design</b>	<b>83</b>
The definition of a research design	84
The functions of a research design	84
Summary	91
<b>8 Selecting a study design</b>	<b>92</b>
Study designs based on the number of contacts	93
The cross-sectional study design	93
The before-and-after study design	95
The longitudinal study design	97
Study designs based on the reference period	98
The retrospective study design	99
The prospective study design	99
The retrospective-prospective study design	99
Study designs based on the nature of the investigation	100
The experimental study designs	101
Others—some commonly used study designs	108
Action research	108
Feminist research	110
The cross-over comparative experimental design	110
The replicated cross-sectional design	110
Trend studies	111
Cohort studies	112
Panel studies	112
Blind studies	113
Double-blind studies	113
Case studies	113
Summary	113
<b>Step III Constructing an instrument for data collection</b>	<b>115</b>
<b>9 Selecting a method of data collection</b>	<b>117</b>
Methods of data collection	118
Collecting data using primary sources	119
Observation	119
Types of observation	120
Problems with using observation as a method of data collection	120
Situations in which observation can be made	121
The recording of observation	121
The interview	123
Unstructured interviews	123
Structured interview	126
The questionnaire	126
Choosing between an interview schedule and a questionnaire	126

Ethical issues relating to the researcher	314
Avoiding bias	314
Provision or deprivation of a treatment	314
Using inappropriate research methodology	315
Incorrect reporting	315
Inappropriate use of information	315
Ethical issues regarding the sponsoring organisation	316
Restrictions imposed by the sponsoring organisation	316
The misuse of information	316
Summary	316
<b>Step VII Processing data</b>	<b>217</b>
<b>15 Processing data</b>	<b>219</b>
Editing data collected through structured inquiries (quantitative studies)	220
Editing data collected through unstructured interviewing	222
Coding data: introduction	222
Coding quantitative categorical (qualitative and quantitative) data	224
Developing a code book	224
Pre-testing a code book	235
Coding the data	235
Verifying the coded data	240
Coding descriptive quantitative data	240
Developing a frame of analysis for quantitative studies	241
Frequency distributions	242
Cross-tabulations	242
Constructing the main concepts	243
Statistical procedures	243
Developing a frame of analysis for qualitative studies	244
Analysing data	244
The role of computers in research	245
The role of statistics in research	245
Summary	246
<b>16 Displaying data</b>	<b>247</b>
Tables	248
Structure	248
Types of tables	250
Types of percentages	251
Graphs	252
The histogram	253
The bar chart	255
The stacked bar chart	255
The 100 per cent bar chart	255
The frequency polygon	256
The cumulative frequency polygon	258
The stem-and-leaf display	259

The pie chart	259
The line diagram or trend curve	260
The area chart	260
The scattergram	261
Summary	262
<b>Step VIII Writing a research report</b>	<b>263</b>
<b>17 Writing a research report</b>	<b>265</b>
Research writing in general	266
Referencing	266
Writing a bibliography	267
Developing an outline	267
Writing about a variable	269
Summary	271
<b>18 Research methodology and practice evaluation</b>	<b>273</b>
What is evaluation?	274
Why evaluation?	275
Intervention-development-evaluation process	277
Perspectives in the classification of evaluation studies	278
Types of evaluation from a <i>focus</i> perspective	280
Evaluation for planning a program/intervention	281
Process/monitoring evaluation	283
Impact/outcome evaluation	287
Cost-benefit/cost-effectiveness evaluation	291
Types of evaluation from a <i>philosophical</i> perspective	292
Goal-centered/objective-oriented evaluation	293
Consumer-oriented/client-centred evaluation	293
Improvement-oriented evaluation	293
Holistic/illuminative evaluation	293
Understanding an evaluation: the process	294
Involving stakeholders in evaluation	302
Ethics in evaluation	303
Summary	304
<b>Appendix Developing a research project— a set of exercises for beginners</b>	<b>305</b>
<b>References</b>	<b>323</b>
<b>Index</b>	<b>327</b>
