Contents

Part ne
Overview 2

1. **Systems Concepts and the Information Systems Environment** 4
Introduction. The Systems Concept: *Definition.* Characteristics of a System: *Organization. Interaction. Interdependence. Integration. Central Objective.* Elements of a System: *Outputs and Inputs. Processor(s). Control. Feedback. Environment. Boundaries and Interface.* Types of Systems: *Physical or Abstract Systems. Open or Closed Systems. Man-Made Information Systems.* Illustration—A Dynamic Personnel Information System Model.

2. **The System Development Life Cycle** 38
Introduction. The System Development Life Cycle: *Recognition of Need —What Is the Problem? Feasibility Study. Analysis. Design. Implementation. Post-Implementation and Maintenance.* Considerations for Candidate Systems: *Political Considerations. Planning and Control for System Success.* Prototyping.

3. **The Role of the Systems Analyst** 60
Introduction. Definition. Historical Perspective: *The Early Years. The War Effort.* What Does It Take to Do Systems Analysis? *Academic and Personal Qualifications.* The Multifaceted Role of the Analyst: *Change*

Scanned by TapScanner

Agent. Investigator and Monitor. Architect. Psychologist. Salesperson. Motivator. Politician. The Analyst/User Interface: *Behavioral Issues. Conflict Resolution.* The Place of the Analyst in the MIS Organization: *The MIS Organization.* Rising Positions in System Development: *The Paraprofessional. The Technical Writer.* Conclusions.

Part Two
Systems Analysis 90

4. Systems Planning and the Initial Investigation 92
Introduction. Bases for Planning in Systems Analysis: *Dimensions of Planning.* Initial Investigation: *Needs Identification. Determining the User's Information Requirements. Case Scenario. Problem Definition and Project Initiation. Background Analysis. Fact-Finding. Fact Analysis. Determination of Feasibility.*

5. Information Gathering 128
Introduction. What Kinds of Information Do We Need? *Information about the Firm. Information about User Staff. Information about Work Flow.* Where Does Information Originate? Information-Gathering Tools: *Review of Literature, Procedures, and Forms. On-Site Observation. Interviews and Questionnaires. Types of Interviews and Questionnaires.*

6. The Tools of Structured Analysis 164
Introduction. What Is Structured Analysis? The Tools of Structured Analysis: *The Data Flow Diagram (DFD). Data Dictionary. Decision Tree and Structured English. Decision Tables. Pros and Cons of Each Tool.*

7. Feasibility Study 196
Introduction. System Performance Definition: *Statement of Constraints. Identification of Specific System Objectives. Description of Outputs.* Feasibility Study: *Feasibility Considerations. Steps in Feasibility Analysis. Feasibility Report. Oral Presentation.*

8. Cost/Benefit Analysis 232
Introduction. Data Analysis. Cost/Benefit Analysis: *Cost and Benefit Categories. Procedure for Cost/Benefit Determination.* The System Proposal

Part Three
Systems Design 258

9. The Process and Stages of Systems Design 260
Introduction. The Process of Design: *Logical and Physical Design.* De-

Scanned by TapScanner

sign Methodologies: *Structured Design. Form-Driven Methodology—The IPO Charts. Structured Walkthrough.* Major Development Activities: *Personnel Allocation.* Audit Considerations: *Processing Controls and Data Validation. Audit Trail and Documentation Control.*

10. Input/Output and Forms Design **284**
Introduction. Input Design: *Input Data. Input Media and Devices.* Output Design. Forms Design: *What Is a Form? Classification of Forms. Requirements of Forms Design. Carbon Paper as a Form Copier. Types of Forms. Layout Considerations. Forms Control.*

11. File Organization and Data Base Design **320**
Introduction. File Structure. File Organization: *Sequential Organization. Indexed-Sequential Organization. Inverted List Organization. Direct-Access Organization.* Data Base Design: *Objectives of Data Base. Key Terms. Logical and Physical Views of Data. Data Structure. Normalization.* The Role of the Data Base Administrator.

Part Four
System Implementation **356**

12. System Testing and Quality Assurance **358**
Introduction. Why System Testing? What Do We Test for? *The Nature of Test Data.* The Test Plan: *Activity Network for System Testing. System Testing.* Quality Assurance: *Quality Assurance Goals in the Systems Life Cycle. Levels of Quality Assurance.* Trends in Testing. Role of the Data Processing Auditor: *The Audit Trail.*

13. Implementation and Software Maintenance **386**
Introduction. Conversion: *Activity Network for Conversion.* Combating Resistance to Change. Post-Implementation Review: *Request for Review. A Review Plan.* Software Maintenance: *Maintenance or Enhancement? Primary Activities of a Maintenance Procedure. Reducing Maintenance Costs.*

14. Hardware/Software Selection and the Computer Contract **414**
Introduction. The Computer Industry: *Hardware Suppliers. Software Suppliers. Service Suppliers.* The Software Industry: *Types of Software.* A Procedure for Hardware/Software Selection: *Major Phases in Selection. Software Selection. The Evaluation Process.* Financial Considerations in Selection: *The Rental Option. The Lease Option. The Purchase Option.* The Used Computer. The Computer Contract: *The Art of Negotiation. Contract Checklist.*

15. Project Scheduling and Software **444**
Introduction. Why Do Systems Fail? What Is Project Management? *A*

16. **Security, Disaster/Recovery, and Ethics in System Development** 472

Introduction. System Security: *Definitions. Threats to System Security. Control Measures.* Disaster/Recovery Planning: *The Plan.* Ethics in System Development: *Ethics Codes and Standards of Behavior.*

Glossary of Terms 502
