# CONTENTS

## Preface

1. Origin of the Earth	1	-	8
Evolutionary Theories			
Cataclysmic Theories			
2. Interior of the Earth	9	-	17
Seismic Studies			
Free Earth Oscillations			
3. Rocks	18	-	35
Igneous			
Sedimentary			
Metamorphic			
4. The Crust	36	-	56
Continental Crust			
Oceanic Crust			
Origin and Evolution of the Earth's Crust			
Continental and Oceanic Crust : A comparison			
5. Earth Movements	57	-	65
6. Plate Tectonics	66	-	98
Evolution of the Concept			
Continental Drift			
Palaeomagnetism			
Sea floor Spreading			
Plate Tectonics			
Plate Movement			
Mechanism			
Problems			
7. Volcanism	99	-	119
Distribution			
Magma Generation			
Intrusive features			
Extrusive features			
8. Orogeny (Mountain Building)			

<b>9. Denudation</b>	<b>133 – 152</b>
Weathering	
Mass Wasting	
Erosion	
<b>10. Fluvial Landforms</b>	<b>153 – 171</b>
Characteristics of River	
Erosional Landform	
Depositional Landform	
<b>11. Cycle of Erosion</b>	<b>172 – 182</b>
Views of Davis	
Views of Penck	
Davis and Penck : A comparison	
<b>12. Rejuvenated Landforms</b>	<b>183 – 190</b>
Causes of Rejuvenation	
Features Produced by Rejuvenation	
<b>13. Ground Water</b>	<b>191 – 195</b>
<b>14. Karst Landforms</b>	<b>196 – 206</b>
Factors favouring Karst Development	
Erosional Features	
Depositional Features	
<b>15. Marine Landforms</b>	<b>207 – 227</b>
Waves	
Erosional Features	
Depositional Features	
<b>16. Arid Landforms</b>	<b>228 – 243</b>
Origin of Sand	
Erosional Features	
Depositional Features	
<b>17. Glacial Landforms</b>	<b>244 – 273</b>
Movement of Glaciers	
Erosional Features	
Depositional Features	
<b>18. Periglacial Landforms</b>	<b>274 – 287</b>
Periglacial Processes	
Periglacial Features	
<b>Acknowledgements</b>	
<b>Appendix</b>	<b>288</b>
