Table of Contents

List of Tables xiii
List of Programs xiv
List of Figures xv
About the Author xviii
About the Series Editor xix
Acknowledgments xx
Foreword xxii
Preface xxiv
Editor's Prologue xxviii

1 **Hardware Basics** 1
Hardware Components 1
Processor 4
Memory 5
Input/Output Ports 11
System Bus 11
Interrupt Requests 14
Clock 15
Timer 16
Direct Memory Access 16
AT Compatibles and the 80286 Processor 17
80386 and 80486 Processors 18
Memory Map 19
Expanded Memory 20
Extended Memory 22
DOS Extenders 22
High Memory Area 23
Micro Channel Architecture 24
EISA Bus 25
Summary 25

Scanned by TapScanner

2 Problem Solving 27
Hardware or Software? 27
Fault Diagnosis 30
Power-On Self Test 31
Standard Diagnostic Software 33
Advanced Diagnostic Software 34
Third-Party Diagnostics 37
Public Domain and Shareware Diagnostics 42
BASIC Diagnostics 45
Summary 45

3 Power Supply 47
Switched-Mode Power Supplies 48
Power Requirements 49
Testing the Power Supply 52
Diagnosing Problems 53
Replacing the Power Supply 56
Summary 57

4 Motherboard 59
Motherboard Construction 60
Motherboard Components 61
Memory Structure 62
Memory Banks 63
LSI Chip Sets 63
Motherboard Connectors 64
Motherboard Configuration 66
Memory Configuration 70
CMOS RAM Setup for AT Compatibles 71
ROM Shadowing 76
Expansion Cards 77
Card Conflicts 78
Adding Memory 85
Performance Enhancement 86
Diagnosing Problems 88
Motherboard Replacement 90
Summary 92

Scanned by TapScanner

5 **Keyboards** 95
Keyboard Basics 95
XT and AT Keyboards 97
Diagnosing Problems 98
Dismantling and Reassembly 103
Summary 104

6 **Video Display** 105
Monitor Basics 105
Digital and Analog Monitors 108
Laptop Displays 110
Monitor Selection 111
Testing Monitors 112
Display Adapters 116
Dual Monitor Systems 122
Display Problems 124
Summary 128

7 **Floppy Disks** 131
Diskette Basics 131
Diskette Types 134
Diskette Drives 135
Drive Configuration 138
Diskette Controller 139
Diagnosing Problems 140
Drive Misalignment 140
Servicing Drives 144
Diskette Change-Line Problems 146
Reading Diskettes Written by Other Machines 147
Diskette Troubleshooting 148
Diskette Drive Installation 149
Diskette Drive Removal 150
Installing 3.5 In. Drives 150
External Diskette Drives 152
Caring for Diskettes 152
Summary 153

Scanned by TapScanner

8 Hard Disks 155
Hard Disk Basics 156
Recording Media 158
Head Actuators 159
Head Parking 161
Recording Methods 162
Hard Disk Interfaces 164
Hard Disk Controllers 167
Drive Types 169
Cylinder Wraparound 172
Hard Disk Cards 173
Low-Level Formatting 173
Interleaving 176
Skew 177
Disk Optimization 178
Removing a Hard Disk 181
Installing a Hard Disk 181
Setting up a Hard Disk 183
Bad Sectors 185
File Recovery 187
Hard Disk Problems 191
Summary 193

9 Serial Ports 195
Serial Port Basics 195
Asynchronous and Synchronous Communications 198
Serial Port Hardware 200
Managing Serial Communications 201
Handshaking 203
Diagnosing Problems 205
Breakout Box 209
Serial Port Problems 210
Summary 211

10 Serial Devices 213
Serial Printers 213
Plotters 214

Scanned by TapScanner

Mice 215
Modems 219
Null Modems 231
Summary 232

11 Printers 233
Parallel (Centronics) Interface 233
Parallel Ports 234
Types of Printers 236
Dot-Matrix Printers 237
Inkjet Printers 238
Laser Printers 239
Daisywheel Printers 240
Thermal Transfer Printers 241
Preventive Maintenance for Printers 241
Parallel Printer Problems 243
Serial Printer Problems 247
Printer Configuration Problems 248
Line and Page Control Problems 249
Diagnosing Problems 250
Summary 252

12 Tools and Techniques 255
Technician's Toolkit 255
Software Tools 257
Test Meters 259
Removing and Replacing Chips 261
Soldering 263
Replacing Soldered Components 266
Spare Parts 266
When to Call in the Professionals 268
Maintenance Contracts 269
Summary 270

13 Everyday Operations 271
Operating Environment 271
Heat and Cold 272

Scanned by TapScanner

Humidity 274
Dirt and Dust 274
Shock and Vibration 276
Static Electricity 277
Power-Related Problems 278
Wear and Tear 282
Backing Up Hard Disks 283
Summary 284

14 Preventive Maintenance 285
Weekly Maintenance 286
Semiannual Maintenance 287
Replacing Backup Batteries 290
Reformatting Hard Disks 291
Maintaining Printers 291
Summary 292

15 Setup and Optimization 293
Booting the System 293
CONFIG.SYS 294
Device Drivers 297
DOS 4.0 and Expanded Memory 300
AUTOEXEC.BAT 300
Keyboard Utilities 303
Memory Management 304
Disk Partitioning 309
Directory Structure 310
Defragmentation 310
Disk Caches 311
BUFFERS and FASTOPEN 313
Math Coprocessors (Floating Point Units) 313
ROM Shadowing 314
Configuration Problems 315
Summary 317

Scanned by TapScanner

16 Computer Viruses 319
What Is a Virus? 320
Trojan Horses and Logic Bombs 320
Virus Prevention 321
Network Security 323
Virus Symptoms 324
Virus Detection Programs 325
Dealing with a Virus Attack 326
Virus Removal 328
Virus Removal on Networks 330
Backups: The Ultimate Safeguard 330
Summary 330

17 Networking 333
Determining Network Requirements 333
Selecting a LAN 334
Server-Based LANs 334
Peer-to-Peer LANs 335
Zero Slot LANs 336
Multiuser DOS 337
LAN Topologies 338
Ethernet 338
IBM Token Ring 340
Unshielded Twisted Pair 341
Fiber Optics 341
Setting up LANs 342
Summary 343

18 Expanding Your Expertise 345
Building a Toolkit 345
Recordkeeping 346
Sources of Information 346
Going Online 347
Conclusion 351

Scanned by TapScanner

Appendix A Power On Self-Test (POST) Error Codes 353
Appendix B PC Resource Assignments 357
Appendix C Hard Disk Characteristics 361
Appendix D Common PC Viruses 366
Appendix E Associated Disk Contents 368
Acronyms 370
Glossary 374
Trademarks 385
Index 389
