MCSD:

VISUAL BASIC® 6

Distributed Applications

STUDY GUIDE

Michael Lee with Clark Christensen, PhD

Everything You Need to Prepare for—and Pass—
Exam 70-175: Designing and Implementing
Distributed Applications with Microsoft Visual Basic 6.0

Exclusive Exam-Preparation Software
Lets You Master Every Objective

CD Contains Evaluation Edition of
Microsoft SQL Server 7

Microsoft® Certified Professional
Approved Study Guide

SYBEX

Contents at a Glance

Introduction *xxii*

Chapter 1 Designing a Distributed Solution 1

Chapter 2 Designing and Implementing the Data Tier 47

Chapter 3 Accessing Databases with the ActiveX Data Objects 95

Chapter 4 Designing and Implementing the Business Tier 141

Chapter 5 Creating ActiveX Controls 197

Chapter 6 Designing and Implementing the Presentation Tier 237

Chapter 7 Creating a Data-Aware Client 301

Chapter 8 Calling COM Components 325

Chapter 9 Using Microsoft Transaction Server 355

Chapter 10 Creating a Browser-Based Presentation Tier 391

Chapter 11 Creating Help Systems 459

Chapter 12 Error Handling in the Distributed Application 491

Chapter 13 Application Testing and Analysis 521

Chapter 14 Deploying a Distributed Application 547

Appendix A Answers to Review Questions 593

Appendix B Strategies for Successful Test Taking 643

Appendix C Microsoft SQL Server 7 Primer 661

Glossary 677

Table of Contents

Introduction *xxii*

Chapter 1 Designing a Distributed Solution **1**

General Application Architecture 2
File Server Architecture 3
Client/Server Architecture 7
The Services Design Model 9
User Services 10
Data Services 11
Business Services 12
Architectural Options 15
Multiple-Tier Architecture 16
Abstracting Data Access Logic 17
Multiple-Tier Design and Performance 22
Microsoft Transaction Server 23
Scalability 24
Transaction Support 26
Security 28
Data Source Availability with Microsoft Message Queue 28
Optimization of Database Roles 29
Decision-Support Systems 30
Online Transaction Processing Systems 31
The Balancing Act 32
Installing and Configuring Visual Studio 6 Components 33
Installing and Configuring Visual Basic 6 34
Installing SQL Debugging 39
Installing and Using Microsoft Visual SourceSafe 40
Review Questions 43

Chapter 2 Designing and Implementing the Data Tier **47**

Designing the Data Tier 48
The Rules of Normalization 49
Denormalization 55

Scanned by TapScanner

		Creating and Managing Database Objects	58
		Exploring Databases	58
		Viewing and Modifying Tables	62
		Retrieving and Modifying Data with SQL Statements	65
		Retrieving Data with SQL	65
		Modifying Data with SQL	76
		Correlating Data with Join Statements	78
		Using Transactions	84
		Implementing Transactions in SQL Server 7	84
		Creating Stored Procedures	88
		Summary	90
		Review Questions	90
Chapter	**3**	**Accessing Databases with the ActiveX Data Objects**	**95**
		ADO Basics	97
		Getting Comfortable with the ADO Object Model	97
		Implementing the ADO Data Control	100
		Implementing the ADO Model	103
		Using the Connection Object	103
		Using the Recordset Object	108
		Opening a Recordset	114
		Displaying Data in a Recordset	115
		Modifying Data through a Recordset	119
		Using the Command Object	122
		Using Stored Procedures	127
		Summary	136
		Review Questions	136
Chapter	**4**	**Designing and Implementing the Business Tier**	**141**
		Components Defined	143
		Classes	143
		Objects	144
		Components	148
		Designing Components	149
		Collections and Objects	150

Scanned by TapScanner

Designing Properties, Methods, and Events 154
The Nuts and Bolts 157
Creating Object Models 161
Exercise Scenario 162
Exercise Solution 162
Creating Components with Visual Basic 6 165
The Visual Basic Component Project 166
Project Properties 166
Class Properties 171
Preparing the Component Environment 173
Adding Methods to a Component 177
Adding Properties 180
Adding Events 183
Compiling and Registering the Component 185
Using Visual Component Manager 186
Publishing a Component 188
Locating a Component 190
Reusing a Component 190
Summary 191
Review Questions 192

Chapter 5 Creating ActiveX Controls **197**

Creating Simple ActiveX Controls 198
The ActiveX Control Project 199
Creating the Visual Interface 200
Testing the Control 203
Adding Custom Properties, Methods, and Events 205
Adding Methods 205
Adding Properties 206
The ActiveX Control Life Cycle 212
Adding Events 218
Property Pages 220
Using the Property Page Wizard 221
Using Built-In Property Pages 223

Scanned by TapScanner

ActiveX Controls and Data Binding 225
Creating Data Bound Controls 225
Creating a Data Provider Control 228
Summary 232
Review Questions 232

Chapter 6 Designing and Implementing the Presentation Tier 237

Presentation Fundamentals: Forms, Controls, Events, and Data Display 238
Working with Forms 239
Working with Controls 243
Working with Events 255
Advanced Interface Controls 260
Interactive Presentation Features 283
Working with Menus 284
Working with Object Collections and Arrays 288
Summary 297
Review Questions 297

Chapter 7 Creating a Data-Aware Client 301

Ensuring User-Tier Data Integrity 302
Field-Level Validation 303
Form-Level Validation 308
Modifying Forms or Controls Based on Input Values 310
Data Binding: Reaching Beyond the User Tier 313
Visual Basic Data Source Tools 314
Using Manually Bound Controls to Display Data 319
Using the Data Environment to Connect to a Data Source 319
Using the Data Form Wizard to Create Forms with Bound Controls 321
Summary 322
Review Questions 322

Scanned by TapScanner

Chapter 8 Calling COM Components 325

Automation Basics 326
Binding 327
Calling COM Components 329
Object Variables 329
Automating External Objects 333
Calling Custom Components 337
Communicating Asynchronously with Components 343
Using Events 343
Using Callback Procedures 348
Events vs. Callbacks 351
Summary 351
Review Questions 352

Chapter 9 Using Microsoft Transaction Server 355

Transaction Server Fundamentals 356
Transaction Activity 356
Scalability 359
Security 361
Installing and Configuring MTS 361
Definitions 362
Installing MTS 363
Managing MTS Security 365
Creating Components for MTS 374
Requirements of MTS Components 374
The Context Object 376
Reporting Transaction Status 378
Adding Components to Packages 379
Working with Existing Packages 386
Summary 387
Review Questions 388

Chapter 10 Creating a Browser-Based Presentation Tier 391

HTML Overview 392
Structure Tags 394
