

Sample Agreement

Demonstrates zSign field placeholder tags

1. Purpose. The bracketed tags below are placeholders. When this document is sent for signature, each tag becomes an input the recipient fills in; the signed value is drawn over the tag.
2. Field tags. The bracketed placeholders below are field tags. Each tag's party segment must exactly match the recipient's role. Every tag here uses signer, which is zSign's default recipient role.
3. Term. This is a sample and creates no obligations.

RECIPIENT

SIGNATURE

{signature*:signer}

INITIALS

{initials:signer}

FULL NAME

{text*:signer:full_name}

SIGNED ON

{date:signer:signed_on}
